Maibach, 2017-11-21 This book provides comprehensive information on the alternative (non-animal) dermal toxicity test methods currently available for industrial, regulatory, and academic use and also explores potential future developments. It encompasses all areas of dermal toxicity, including skin irritation, skin corrosion, skin sensitization, UV-induced effects, and skin genotoxicity. An individual chapter is devoted to each test method, with coverage of the scientific basis, validation status and regulatory acceptance, applications and limitations, available protocols, and potential role within testing strategies. In addition, perspectives from the test developer are presented, for example regarding critical steps in the protocol. The closing section

addresses areas that may be of relevance for the future of dermal toxicity safety testing, including the validation and regulatory acceptance of integrated testing strategies, novel complex skin models, and high-throughput screening techniques.

pg mason business center: The ^AComing Prosperity Philip Auerswald, 2012-04-02 Large countries with burgeoning populations such as China, India, and Brazil have economies that have grown exponentially over the last few decades, and projections indicate that they will continue to do so for some time to come. Philip Auerswald's The Coming Prosperity argues that this introduction of the majority of the world's population into the global economy should be considered a source of great opportunity. Auerswald links personal, social entrepreneurship narratives with global movements, in which 'the rise of the rest' are not threats to the world's stability but rather unique opportunities to discover new pathways toward progress and prosperity.

Kaya, 2007-10-04 The basic tools include chapters on the theory and practice of application of microbial control agents (MCAs) (Section I), statistical considerations in the design of experiments (Section II), and three chapters on application equipment and strategies (Section III). Section IV includes individual chapters on the major pathogen groups (virus, bacteria, microsporidia, fungi, and nematodes) and special considerations for their evaluation under field conditions. This section sets the stage for subsequent chapters on the impact of naturally occurring and introduced exotic pathogens and inundative application of MCAs. Twenty-three chapters on the application and evaluation of MCAs in a wide variety of agricultural, forest, domestic and aquatic habitats comprise Section VII of the Field Manual. In addition to insect pests, the inclusion of mites and slugs broadens the scope of the book.
