open business account td bank: COVID-19: Paving the Way for a More Sustainable World Walter Leal Filho, 2021-05-25 This book gathers and disseminates opinions, viewpoints, studies, forecasts, and practical projects which illustrate the various pathways sustainability research and practice may follow in the future, as the world recovers from the COVID-19 pandemic and prepares itself to the possibilities of having to cope with similar crisis, a product of the Inter-University Sustainable Development Research Programme (IUSDRP) <https://www.haw-hamburg.de/en/ftz-nk/programmes/iusdrp.html> and the European School of Sustainability Science and Research (ESSSR) <https://esssr.eu/>. The COVID-19 pandemic has led to severe human suffering, and to substantial damages to economies around the globe, affecting both rich countries and developing ones. The aftermath of the epidemic is also expected to be felt for sometime. This will also include a wide range of impacts in the ways sustainable development is perceived, and how the principles of sustainability are practised. There is now a pressing need to generate new literature on the connections between COVID-19 and sustainability. This is so for two main reasons. Firstly, the world crisis triggered by COVID-19 has severely damaged the world economy, worsening poverty, causing hardships, and endangering livelihoods. Together, these impacts may negatively influence the implementation of sustainable development as a whole, and of the UN Sustainable Development Goals in particular. These potential and expected impacts need to be better understood and quantified, hence providing a support basis for future recovery efforts. Secondly, the shutdown caused by COVID-19 has also been having a severe impact on teaching and research, especially -but not only - on matters related to sustainability. This may also open new opportunities (e.g. less travel, more Internet-based learning), which should be explored further, especially in the case of future pandemics, a scenario which cannot be excluded. The book meets these perceived needs.

open business account td bank: Confessions of an International Banker Sean Hickey, 2013-03 From the City of London to the deserts of Arabia, the former Soviet states, and sub-Saharan Africa, this book traces the life and career of a man who has been a banker in some remarkably challenging environments over a period of half a century. The author has counted bales of cotton in Yemen, dodged Israeli bombs in Lebanon, financed exports from Romania in the days of Ceausescu, been a banker to a member of a ruling family in the Gulf, conducted business in the sauna of a bank in Kazakhstan, and met Her Majesty Queen Elizabeth II. In his spare time, he has taken an active part in amateur theater groups in the countries in which he has lived, served as a member of committees administering cemeteries, and been a warden appointed by the British Embassy to assist their citizens in times of trouble. As well as being an engrossing story of banking in many varied

countries, the book includes chapters about the background to the problems of some of the places in which he has worked that show a clear understanding of the history and politics involved. Having lived in the Middle East for much of his life, he comments on the Arab Spring, and his long and diverse banking career has enabled him to write incisively on events in the industry in recent years. He draws conclusions on both of these momentous stories.

open business account td bank: *Employee Ambassadorship* Michael W. Lowenstein, 2017-04-04 There have been a number of professional and academic studies, in multiple industries, linking employee attitudes and behaviors with the value customers perceive in their experiences. Through targeted research, and resultant training, communication, process, and reward and recognition programs, what we define as ambassadorship formalizes the direction in which employee engagement has been trending toward for years. Simply, the trend is optimizing employee commitment to the organization and its goals, to the company's unique value proposition, and to the customer. This is employee ambassadorship, a state beyond satisfaction and engagement where all employees are focused on, and tasked with, delivering customer value as part of their job description, irrespective of location, function or level. There is growing general agreement that both developing employee ambassadors and customer advocates should receive high priority and emphasis if an enterprise is going to be successful. What building ambassadorship does mandate, however, is that having employees focus on the customer will definitely drive more positive experiences and stronger loyalty behavior (for both stakeholder groups). Because antecedent approaches to employee engagement (through research and application) are principally about productivity and alignment, and offer an organization only modest insight about level or degree of customer-centricity, more connection between employee behavior and customer behavior builds focus, effectiveness, and profitability. That is what the content/scope of Employee Ambassadorship will help provide.
