parkmobile for business: *Community Education and Crime Prevention* Carolyn Siemens Ward, 1998-10-01 Paperback released by IAP in May, 2008 Scholars in various disciplines are recommending comprehensive measures to solve multiple societal as well as individual problems. The philosophy of community education has been overlooked but is a workable, comprehensive approach to addressing crime. As used in this book, community education is a philosophy, process, and program comprised of three overriding and interrelated elements: community empowerment, community problem-solving, and the effort to involve all community members in the pursuit of lifelong learning. The Hyde Park neighborhood in St. Louis has one of the highest rates of reported drug sales and high rates of homicide, robbery, aggravated assault, arson, and burglary. The community lays claim to several crime-inducing variables including population loss, a high percentage of population shift resulting in a higher percentage of black population and boarded-up housing units, a high rate of unemployment, a very low per capita income and a high percentage of citizens living below the poverty line, and a high percentage of female-headed households. Nevertheless, the people of Hyde Park are participating in a crime prevention approach that is applicable to all communities. Insights to urban life and problem solving are provided by community members, covering such topics as policing and how it can be improved. These insights and others offered by the author are supported by theories and philosophies found in the literature. In the process of solving their own problems, community members involve themselves in lifelong learning activities and leadership development. Written in a style that is appealing to the general public as well as academics, it is of special interest to educators, community leaders, criminologists, academics in urban affairs and sociology, social workers, law enforcement agents, and politicians.

parkmobile for business: From Incremental to Exponential Vivek Wadhwa, Ismail Amla, Alex Salkever, 2020-10-06 “This timely book reminds us that innovation is agnostic about where it's created.” —Satya Nadella, CEO, Microsoft Over and over, we see big legacy businesses getting beaten to the punch by energetic little start-ups. It seems like innovation can come from only the bottom up or from the outside in. But tech experts Vivek Wadhwa and Ismail Amla are here to tell you that “big equals slow and stodgy” is a myth. Based on decades of experience working with both the world's leading brands and disruptive start-ups, this book explores the opportunity legacy companies have to create new markets, supercharge growth, and remake their businesses by combining the mindset and tool belt of start-ups with the benefits of incumbency: boatloads of customer data, decades of brand equity, robust distribution channels, enormous financial assets, and more. Wadhwa and Amla go deeply into why the pace and dynamics of innovation have changed so dramatically in recent years and show how companies can overcome obstacles like the Eight Deadly Sins of Stasis. Equally important, they provide a playbook on how to use their insights in your own company, team, or career. This fast-paced, anecdote-rich story rethinks modern innovation—a book every manager, executive, and ambitious employee will want to read.

Martin is a Florida Bar Board Certified Real Estate Lawyer and Adjunct Professor of Law at Stetson University College of Law who, for over forty years, has practiced Florida real estate, probate, and business law. This book assists lawyers in drafting contracts for sale of Florida real estate by the use of example forms, including checklists, listing agreements, contracts for sale of real estate, addendum forms, clauses for real estate contracts, amendment forms, assignment forms, and termination of contract forms. This is a legal forms book and is not a treatise on substantive real estate law. The lawyer should consult Florida Statutes and case law in every case before using any form. No form should be used and no procedure should be followed unless the lawyer understands it and decides that it applies to his or her law practice and to the facts in the particular case. Each lawyer's practice differs in some respects, and all transactions differ, so the lawyer should plan to make changes to these forms accordingly.

parkmobile for business: *Sharing Mobilities* Davide Arcidiacono, Mike Duggan, 2019-10-14 This book examines contemporary urban sharing mobilities, such as shared and public forms of everyday urban mobility. Tracing the social and economic history of sharing mobilities and examining contemporary case studies of mobility sharing services, such as Car2go, BlaBlaCar, and Uber, the authors raise questions about what these changes mean for access to and engagement with the public spaces of transport in the city. Drawing on the thought of Lefebvre, the book considers how contemporary sharing mobilities are affecting people's 'right to the city', with particular attention paid to the privatised, frictionless practices of movement through the city. In addition, the authors ask what has happened to earlier forms of shared mobility and illustrate how some of these practices continue successfully today. Considering the potential that modern incarnations of shared mobilities offer to urban citizens for engaging in meaningful shared mobilities that are not simply determined by the interfaces of technology and market forces, this book will appeal to sociologists and geographers with interests in mobility and urban studies.
