part time business analyst jobs: Recruitment Advertising as an Instrument of Employer Branding Jolanta Łacka-Badura, 2015-10-05 The book offers a linguistic analysis of job advertising as an instrument of employer branding, investigating how the creation of the employer brand and the projection of employee value proposition are realised linguistically in a corpus of online job

advertisements. The study is methodologically grounded in the current approaches to discourse analysis and business/organisational communication, as it is broadly understood, with particular emphasis on genre and register analysis, the language of persuasion and evaluation, as well as the language of (organisational) values. The analysis conducted in the book demonstrates that job advertisements constitute a distinct promotional business genre, a member of the system of genres applied in the job search context, increasingly resembling multi-modal marketing-type ads. The rhetorical structure of online recruitment advertisements confirms the initial hypothesis that job ads contribute to the projection and reinforcement of employer brands. The register of recruitment ads clearly harmonises with the employer branding function of the genre: extremely positive, encompassing a wide range of persuasive strategies, as well as lexico-grammatical choices contributing to the creation of employer brands, job advertising may justifiably be classified as a “paradigm case” of persuasion. With employer branding being deeply rooted in the values emanating from an organisation, the use of linguistic structures communicating or implying the system of attributes and values declared by the employing organisations is a powerful employer branding strategy, widely reflected in the corpus. Taking into account the interdisciplinary character of the analysis, the book will be of interest not only to linguists and business communication scholars, but also to human resource management and public relations researchers and practitioners.

part time business analyst jobs: Making a Difference Rebecca Meehan, John Sharp, 2023-08-31 Making a Difference: Careers in Health Informatics addresses everyday questions from people interested in working in health informatics. Typically, this includes people who work in health care, computer and technology fields, information science, finance / insurance and related areas. The book aims to tell students about various jobs that exist in the health informatics field, what credentials they need to qualify for those jobs, and a brief description about what people in those roles tend to do every day. As faculty members teaching in a Master of Science in Health Informatics program, the authors say that they are fortunate to have eager, bright, and talented graduate students who are invested in related health informatics areas. This could be their experiences in medicine, nursing, clinical care, software engineering, finance, business, library science, data science, or caregiving. Common questions we hear from our students that may be similar to questions among readers include: ‘what jobs are out there?’, ‘what can I do with this degree?’ or ‘what does a health informatics specialist do?’ This book aims to answer some of these questions with a look into a day in the life of people working in this field. The book examines career options, roles, and skill sets important in health informatics across 6 related industries. We want readers to realize that their skills and interests can apply in many areas of the field, not exclusively hospitals. This book highlights 6 unique work segments (hospital systems, long term care, health IT / consumer health organizations, government, consulting, and payer / insurance companies) into which readers may look to expand their career opportunities. The hope is that this book will provide insight into career opportunities students and professionals may be qualified for, and interested in, but simply not aware of. Hiring managers and human resource professionals across the stakeholder groups across the stakeholder groups may also find the book helpful in learning about other roles that may benefit their organizations.

part time business analyst jobs: Labor in America Melvyn Dubofsky, Foster Rhea Dulles, 2014-08-26 Even since the last edition of this milestone text was released six years ago, unions have continued to shed members; union membership in the private sector of the economy has fallen to levels not seen since the nineteenth century; the forces of economic liberalization (neo-liberalism), capital mobility, and globalization have affected measurably the material standard of living enjoyed by workers in the United States; and mass immigration from the Southern Hemisphere and Asia has continued to restructure the domestic labor force. Yet even in the face of anti-union legislation, a continuing decline in the number of organized workers, and the fear of stateless, if not faceless terrorism—the shadow of “911” in which we still live, in preparing this new edition of his classic text Professor Dubofsky has hewn to the lines laid out in the previous seven in seeking to encourage today’s students of labor history to learn about those who built the United States and who will shape its future. In addition to taking the narrative right up to the present, a recent history that includes the election of 2008 as well as the tumultuous blow suffered by the U.S. and world economy in 2008-09, this eighth edition features an entirely new (fourth) bank of photographs and, in light of the avalanche of new scholarly work over the last decade, a complete overhauling of the book’s extensive and critical Further Readings section in order to note the very best works from the profuse recent scholarship that explores the history of working people in all its diversity.
