pressed flowers business: Monuments as Cultural and Critical Objects Thomas Houlton, 2021-11-25 *Monuments as Cultural and Critical Objects* explores monuments as political, psychical,

social, and mystical objects. Incorporating autoethnography, psychoanalysis, deconstruction, postcolonialism, and queer ecology, Houlton argues for a radical, interdisciplinary approach to our monument-culture. Tracing historical developments in monuments alongside contemporary movements such as Rhodes Must Fall and Black Lives Matter, Houlton provides an in-depth critique of monument sites, as well as new critical and conceptual methodologies for thinking across the field. Alongside analysis of monuments to the Holocaust, colonial figures, and LGBTQIA+ subjects, this book provides new critical engagements with the work of D.W. Winnicott, Marion Milner, Jacques Derrida, Edward Said, Eve Sedgwick, and others. Houlton traces the potential for monuments to exert great influence over our sense of self, nation, community, sexuality, and place in the world. Exploring the psychic and physical spaces these objects occupy—their aesthetics, affects, politics, and powers—this book considers how monuments can challenge our identities, beliefs, and our very notions of remembrance. The interdisciplinary nature of *Monuments as Cultural and Critical Objects* means that it is ideally placed to intervene across several critical fields, particularly museum and heritage studies. It will also prove invaluable to those engaged in the study of monuments, psychoanalytic object relations, decolonization, queer ecology, radical death studies, and affect theory.

Methodological choices and theoretical aspects in practice are detailed in reference to the relevant literatures and grounded in 6 case studies the authors have been involved with. The book makes several contributions to the field, centred on how learning with scenario planning is supported by re-framing and re-perception; how this iterative process can be embedded in corporate or government settings, and how it helps those that it supports to do well in today's world. The book is written in an accessible style and will be a useful introductory text as well as a useful guide for the more experienced scenario planning practitioner and scholar.
