puget sound business journal seattle: Community Economic Development in Social Work Steven D. Soifer, Joseph B. McNeely, Cathy Costa, Nancy Pickering-Bernheim, 2014-11-18 Community economic development (CED) is an increasingly essential factor in the revitalization of low- to moderate-income communities. This cutting-edge text explores the intersection of CED and social work practice, which both focus on the well-being of indigent communities and the empowerment of individuals and the communities in which they live. This unique textbook emphasizes a holistic approach to community building that combines business and real-estate development with a focus on stimulating family self-reliance and community empowerment. The result is an innovative approach to rehabilitating communities in decline while preserving resident demographics. The authors delve deep into the social, political, human, and financial capital involved in effecting change and how race and regional issues can complicate approaches and outcomes. Throughout, they integrate case examples to illustrate their strategies and conclude with a consideration of the critical role social workers can play in developing CED's next phase.

puget sound business journal seattle: Classical Seattle Melinda Bargreen, 2015-10-01 The past 50 years have seen a tremendous arts boom in Seattle, which has given the city not only internationally recognized classical music institutions but also great performance halls to showcase their work and that of visiting artists. From Igor Stravinsky's presence as guest conductor at the World's Fair in 1962, to Speight Jenkins's masterly production of Wagner's Ring cycle, to the work of benefactors such as Jack and Becky Benaroya, Seattle is deservedly well known as a city of the musical arts. In Classical Seattle, Melinda Bargreen documents the lives of prominent figures in the local classical music world. Informed by Bargreen's experience as a music critic and drawing on interviews she conducted over several decades, the 35 biographical profiles presented here illuminate the conductors, performing artists, composers, arts organizers, and arts leaders who have shaped Seattle's classical music community and made world-class performances possible. Among the individuals featured are University of Washington virtuosos, Seattle Symphony maestros and musicians, and Seattle Opera directors. Classical Seattle was made possible in part by a grant from 4Culture's Heritage Program.

puget sound business journal seattle: *Frontier Cities* Jay Gitlin, Barbara Berglund, Adam Arenson, 2012-12-18 Macau, New Orleans, St. Louis, Pittsburgh, and San Francisco. All of these metropolitan centers were once frontier cities, urban areas irrevocably shaped by cross-cultural borderland beginnings. Spanning a wide range of periods and locations, and including stories of eighteenth-century Detroit, nineteenth-century Seattle, and twentieth-century Los Angeles, *Frontier Cities* recovers the history of these urban places and shows how, from the start, natives and newcomers alike shared streets, buildings, and interwoven lives. Not only do frontier cities embody the earliest matrix of the American urban experience; they also testify to the intersections of colonial, urban, western, and global history. The twelve essays in this collection paint compelling portraits of frontier cities and their inhabitants: the French traders who bypassed imperial regulations by throwing casks of brandy over the wall to Indian customers in eighteenth-century Montreal; Isaac Friedlander, San Francisco's Grain King; and Adrien de Pauger, who designed the Vieux Carré in New Orleans. Exploring the economic and political networks, imperial ambitions, and personal intimacies of frontier city development, this collection demonstrates that these cities followed no mythic line of settlement, nor did they move lockstep through a certain pace or pattern of evolution. An introduction puts the collection in historical context, and the epilogue ponders the future of frontier cities in the midst of contemporary globalization. With innovative concepts and a rich selection of maps and images, *Frontier Cities* imparts a crucial untold chapter in the construction of urban history and place.

puget sound business journal seattle: City and Enterprise Erik Braun, Leo Van de Berg, 2018-10-24 This title was first published in 2003. While in the past, corporate community involvement was mainly considered a form of philanthropy, nowadays the argument is gaining credit that corporate community involvement is not only a matter of ethics, but also of self-interest. As companies recognize their interest in the welfare of the city, they may become inclined to invest in some way in that city's welfare. Assuming that the interests of public and private stakeholders tend to converge as companies become aware of their interest in an attractive environment, then corporate community involvement may bring along a new type of public-private partnership, as an instrument of urban regeneration. Bringing together comparative case studies from Amsterdam, Chicago, Leeds, London, Munich, New York, Seattle, St. Louis and The Hague, this considers the potential implications of corporate community involvement for the sustainable development of cities and the creation of cross-sector partnerships. It analyses the involvement of companies in urban challenges in the fields of education, employment, safety, affordable housing and the living environment. It also looks at the efforts made to establish strategic partnership between enlightened corporations and public authorities. The book reveals that pro-active firms attach much value to investments in their urban environment as part of their corporate strategy. But it also shows that cities do not yet take full advantage of these arising opportunities.

puget sound business journal seattle: *The Food and Drink of Seattle* Judith Dern, 2018-08-10

Offers a comprehensive exploration of Seattle's cuisine from geographical, historical, cultural, and culinary perspectives. From glaciers to geoducks, from the Salish Sea with swift currents sweeping wild salmon home from the Pacific Ocean to their original spawning grounds, to settlers, immigrants, and restaurateurs, Seattle's culinary history is vibrant and delicious, defining the Puget Sound region as well as a major U.S. city. Exploring the Pacific Northwest's history from a culinary perspective provides an ideal opportunity to investigate the area's Native American cooking culture, along with Seattle's early boom years when its first settlers arrived. Waves of immigrants from the mid-1800s into the early 1900s brought ethnic culinary traditions from Europe and beyond and added more flavor to the mix. As Seattle grew from a wild frontier settlement into a major twentieth century hub for transportation and commerce following World War II, its home cooks prepared many All-American dishes, but continued to honor and prepare the region's indigenous foods. Taken altogether and described in the pages of this book, it's quickly evident few cities and regions have culinary traditions as distinctive as Seattle's.

puget sound business journal seattle: *Cities and Nature in the American West* Char Miller, 2010-09-28 In less than a century, the American West has transformed from a predominantly rural region to one where most people live in metropolitan centers. *Cities and Nature in the American West* offers provocative analyses of this transformation. Each essay explores the intersection of environmental, urban, and western history, providing a deeper understanding of the complex processes by which the urban West has shaped and been shaped by its sustaining environment. The book also considers how the West's urban development has altered the human experience and perception of nature, from the administration and marketing of national parks to the consumer roots of popular environmentalism; the politics of land and water use; and the challenges of environmental inequities. A number of essays address the cultural role of wilderness, nature, and such activities as camping. Others examine the increasingly pervasive power of the West's urban areas and urbanites to redefine the very foundations and future of the American West.

puget sound business journal seattle: *[Emerald Cities](#)* Joan Fitzgerald, 2010-03-18 Here is a refreshing look at how American cities are leading the way toward greener, cleaner, and more sustainable forms of economic development. In *Emerald Cities*, Joan Fitzgerald shows how in the absence of a comprehensive national policy, cities like Chicago, New York, Portland, San Francisco, and Seattle have taken the lead in addressing the interrelated environmental problems of global warming, pollution, energy dependence, and social justice. Cities are major sources of pollution but because of their population density, reliance on public transportation, and other factors, Fitzgerald argues that they are uniquely suited to promote and benefit from green economic development. For cities facing worsening budget constraints, investing in high-paying green jobs in renewable energy technology, construction, manufacturing, recycling, and other fields will solve two problems at once, sparking economic growth while at the same time dramatically improving quality of life. Fitzgerald also examines how investing in green research and technology may help to revitalize older industrial cities and offers examples of cities that don't make the top-ten green lists such as Toledo and Cleveland, Ohio and Syracuse, New York. And for cities wishing to emulate those already engaged in developing greener economic practices, Fitzgerald shows which strategies will be most effective according to each city's size, economic history, geography, and other unique circumstances. But cities cannot act alone, and Fitzgerald analyzes the role of state and national government policy in helping cities create the next wave of clean technology growth. Lucid, forward-looking, and guided by a level-headed optimism that clearly distinguishes between genuine progress and exaggerated claims, *Emerald Cities* points the way toward a sustainable future for the American city.

puget sound business journal seattle: *Seattle Sports* Terry Anne Scott, 2020-08-17 Seattle

Sports: Play, Identity, and Pursuit in the Emerald City, edited by Terry Anne Scott, explores the vast and varied history of sports in this city where diversity and social progress are reflected in and reinforced by play. The work gathered here covers Seattle's professional sports culture as well as many of the city's lesser-known figures and sports milestones. Fresh, nuanced takes on the Seattle Mariners, Supersonics, and Seahawks are joined by essays on gay softball leagues, city court basketball, athletics in local Japanese American communities during the interwar years, ultimate, the fierce women of roller derby, and much more. Together, these essays create a vivid portrait of Seattle fans, who, in supporting their teams—often in rain, sometimes in the midst of seismic activity—check the country's implicit racial bias by rallying behind outspoken local sporting heroes.

puget sound business journal seattle: *Sports Fans, Identity, and Socialization Exploring the Fandemonium* Adam C. Earnheardt, Paul M. Haridakis, Barbara S. Hugenberg, 2012-01-01 Once deemed an unworthy research endeavor, the study of sports fandom has garnered the attention of seasoned scholars from a variety of academic disciplines. Identity and socialization among sports fans are particular burgeoning areas of study among a growing cadre of specialists in the social sciences. *Sports Fans, Identity, and Socialization*, edited by Adam C. Earnheardt, Paul Haridakis, and Barbara Hugenberg, captures an eclectic collection of new studies from accomplished scholars in the fields such as communication, business, geography, kinesiology, media, and sports management and administration, using a wide range of methodologies including quantitative, qualitative, and critical analyses. In the communication revolution of the twenty-first century, the study of mediated sports is critical. As fans use all media at their disposal to consume sports and carry their sports-viewing experience online, they are seizing the initiative and asserting themselves into the mediated sports-dissemination process. They are occupying traditional roles of consumers/receivers of sports, but also as sharers and sports content creators. Fans are becoming pseudo sports journalists. They are interpreting mediated sports content for other fans. They are making their voice heard by sports organizations and athletes. Mediated sports, in essence, provide a context for studying and understanding where and how the communication revolution of the twenty-first century is being waged. With their collection of studies by scholars from North America and Europe, Earnheardt, Haridakis, and Hugenberg illuminate the symbiotic relationship among and between sports organizations, the media, and their audiences. *Sports Fans, Identity, and Socialization* spurs both the researcher and the interested fan to consider what the study of sports tells us about ourselves and the society in which we live.

puget sound business journal seattle: *Discrimination and Disparities* Thomas Sowell, 2019-03-05 An enlarged edition of Thomas Sowell's brilliant examination of the origins of economic disparities Economic and other outcomes differ vastly among individuals, groups, and nations. Many explanations have been offered for the differences. Some believe that those with less fortunate outcomes are victims of genetics. Others believe that those who are less fortunate are victims of the more fortunate. *Discrimination and Disparities* gathers a wide array of empirical evidence to challenge the idea that different economic outcomes can be explained by any one factor, be it discrimination, exploitation, or genetics. This revised and enlarged edition also analyzes the human consequences of the prevailing social vision of these disparities and the policies based on that vision—from educational disasters to widespread crime and violence.
