quotes about building a business: Understanding Women's Entrepreneurship in a Gendered Context Shumaila Yousafzai, Alain Fayolle, Saadat Saeed, Colette Henry, Adam Lindgreen, 2021-05-14 Women entrepreneurs are indeed a formidable force of economic growth and social change, though we still often question the how and why. For the readers who seek to understand the spectrum of gender influences in the context of entrepreneurship, Understanding Women's Entrepreneurship in a Gendered Context: Influences and Restraints widens the contextual focus of women's entrepreneurship and entrepreneurship research by providing powerful insights into the influences and restraints within a diverse set of gendered contexts including social, political, institutional, religious, patriarchal, cultural, family and economic, in which female entrepreneurs around the world operate their businesses. From recognition of a seventh-century businesswoman in Mecca to the construction of a gendered scientific Business Model Canvas, this collection of studies will inspire readers to think differently about theory, patriarchy, trade systems, adoption or transformation and strategies to create inclusive entrepreneurial ecosystems. In doing so, the contributing authors demonstrate not only the importance of studying the contexts in which women's entrepreneurial activities are shaped, but also how female entrepreneurs, through their endeavours, modify these contexts. This book will be of great value to scholars, students and researchers interested in women's entrepreneurship, entrepreneurial ecosystems, gender hierarchy and the transition to gender equality. It was originally published as a special issue of Entrepreneurship & Regional Development.

quotes about building a business: Developing Financial Leadership in Small-Medium Businesses Stewart Barnes, Malcolm Prowle, 2025-03-12 Many small-medium enterprises (SMEs) are very small organisations comprising mainly single-person and micro-businesses but, in the

United Kingdom, there are around 250,000 small-medium businesses (SMBs) which are substantial businesses with turnovers of millions or tens of millions of pounds. A key requirement for thriving SMBs is effective leadership throughout the organisation. One crucial aspect, which is often overlooked, is that of financial leadership. Financial management in SMBs is often seen as a technique-based activity whereby finance staff have a limited role preparing annual financial accounts and disseminating financial information to key individuals in the organisation. They may act reactively by responding to requests for specific financial information. On the other hand, strong financial leadership is proactive, constructive and innovative and plays a critical role in ensuring that organisations stay financially adaptable and can build resilience and sustainability in today's fierce market. The most effective financial leaders have a sophisticated and thorough understanding of their organisation's financial health, and they make decisions grounded in financial realities to use that information in their communication to demonstrate the strategic connection between money, mission and purpose. This research volume asserts that understanding the importance of utilising robust financial management approaches and financial information in making business decisions and assessing business performance is the key. This is especially relevant for SMBs, as they can have a significant influence on countries' economies. It will therefore be of interest to researchers, academics, practitioners and advanced students in the fields of leadership, financial management, entrepreneurship and strategy.
