rice university undergraduate business: Baptizing Business Bradley C. Smith, 2020-07-27

Baptizing Business sifts through popular perceptions regarding the relationship between business and religion and the agenda of conservative Christian business leaders, drawing on personal interviews with the most diverse group of evangelical executives yet studied. While stereotypes and previous research both emphasize the perceived incompatibility of religious mandates and business objectives, Bradley C. Smith argues that evangelical executives experience tension not because business and religion are inherently opposed, but because they are made to feel like second-class citizens by members of their own faith communities. Indeed, in cases of apparent conflict between faith and business, evangelical executives insist that it is faith, not business, that must be reconceived. Smith reveals that evangelical business leaders are as inclined to export business concepts into other domains as to import religious objectives into business contexts, prompting us to reconsider the direction of influence between religious and economic life. *Baptizing Business* is filled with compelling stories that paint a nuanced, unbiased picture of the increasing influence of intensely religious business leaders. The spirit of capitalism, defined by Max Weber as a positive attitude toward work and wealth, finds ongoing embrace and new expression in evangelical executives and their accounts, with implications for our understanding of the faith at work movement, evangelicalism, and the role of religion among elites.

rice university undergraduate business: *60 Minutes to Success* Alice A. Adams, Ronald T. Adams, Rachel A. Seff, 2000-10-16 Just after a promising job interview and before the job offer, many of today's applicants are marched through an unassuming ritual called "the business lunch" so prospective employers can determine whether or not candidates have "the right stuff." And while it may look innocent enough, this one meal often "makes or breaks" the applicant's future with the interviewing corporation. Most college career counselors and many business schools prepare new grads for the job search with good baseline education and technical information, interview techniques, resume-writing skills and corporate research pointers but few of today's job candidates have any guidance about conducting a successful business lunch/second interview. That's when Rachel Seff - director of the University of Houston's College of Business Career Center, Dr. Ron Adams, a veteran educator and Alice Adams, a former professor and current employment writer with The Houston Chronicle joined forces and developed the manuscript, "60 Minutes To Success: The Ultimate Guide to Power Lunching.

rice university undergraduate business: *Entrepreneurship Programs and the Modern University* Michael H. Morris, Donald F. Kuratko, Jeffrey R. Cornwall, 2013-08-01 At IUs Kelley School of Business, we believe in the power of entrepreneurial thinking, with a relentless pursuit of excellence in the research and teaching of entrepreneurship and innovation across our entire campus. This book on academic entrepreneurship offers one of the most comprehensive approaches to understanding the framework and strategies for building effective entrepreneurship programs within universities today. I truly believe all universities, regardless of their current stage of development of their entrepreneurship programs, will materially benefit from the ideas in this book. Daniel C. Smith, former Dean, Kelley School of Business, Indiana University and current CEO, Indiana University Foundation, US I am a believer in the concept of the entrepreneurial university, and think our institutions of higher learning must learn to think and act in more entrepreneurial ways. The kind of entrepreneurial culture which this book champions can transform student lives, invigorate university campuses, and make a fundamental difference in our communities. Burns Hargis, President, Oklahoma State University, US After more than 30 years of impressive growth, what have we learned about building world-class entrepreneurship programs within universities? After tracing the evolution of entrepreneurship within institutions of higher learning, the authors explore the key elements that constitute a comprehensive entrepreneurship program. Best practices at leading universities and differing kinds of academic environments are highlighted. They examine multiple aspects of program management and infrastructure, including curriculum and degree program development, where entrepreneurship is administratively housed, how it is organized, and approaches to staffing and resource acquisition. The perspectives shared in the book enable university presidents, entrepreneurship students, provosts, deans, entrepreneurship program directors, faculty members, and others to better capitalize upon the empowering and transformative potential of entrepreneurship.

The book argues that the only way destructive conflicts can be resolved on a lasting basis is through profound collaboration, which can be embedded in performance

structures by questioning biases, and becoming aware of limiting mindsets and traditions, that keep parts of society subjugated. It offers a wide range of constructive approaches that lead to higher awareness, thus, better understanding and focus on stakeholders. Finally, it presents examples of diversity-engendered issues and their resolutions from around the globe.

rice university undergraduate business: Forgotten Minorities in Organizations Dianna L.

Stone, Brian Murray, Kimberly M. Lukaszewski, James H. Dulebohn, 2023-03-01 People have long made invidious distinctions between individuals (e.g., the clean and the unclean, good and evil, black and white, sacred and profane, etc.) (Smith, 1996), and these distinctions affect the degree to which individuals experience prejudice, unfair discrimination, and oppression in organizations and society as a whole. As a result, there has been an increased interest in research on these distinctions and unfair discrimination in organizations. Despite this research, most of the studies have focused on only a subset of minorities including African Americans, women, older workers, and people with physical disabilities (Dipboye & Colella, 2005). A number of other minorities have been forgotten or neglected by organizational researchers including people with neurological or psychological disabilities, veterans, Native Americans, people with a criminal history, and those who come from low socioeconomic or poor backgrounds. Thus, the primary purposes of this issue of Research in HRM is to foster research on "Forgotten Minorities" or those who are members of groups that have been excluded from organizations and neglected by organizational research. In view of these arguments, this issue (a) presents a brief review of the organizational research on the exclusion and repudiation of people who are forgotten minorities, (b) offers directions for future research on these outgroup members, and (c) considers key implications for practice that can facilitate the inclusion of forgotten minorities in organizations.

Robert Kudlak, Ralf Barkemeyer, Lutz Preuss, Anna Heikkinen, 2022-08-26 The Impact of Corporate Social Responsibility: Corporate Activities, the Environment and Society adds to the current debate on the societal-level impacts of corporate social responsibility (CSR). This edited volume offers conceptual and empirical contributions highlighting various dimensions of CSR impacts. What differentiates the book from others is that we examine the impact of CSR at the societal level, rather than focussing only on those at occur at the level of the firm. The book's contributions present novel perspectives that comprise, among others, empirical analyses of CSR activities, accounts of impacts in various geographic locations, and state-of-the-art reviews of extant literature on the topic. The practical examples and theory-building presented here help us to better capture the societal impacts of contemporary CSR practice. This book will appeal to scholars and students as well as practitioners and policy makers interested in practical and theoretical aspects of CSR impacts at the societal-level.
