reno business park: Weed Empire Adam Bierman, 2025-04-22 From the cofounder of MedMen, this is the true, unfiltered inside tale of the mainstreaming of an outlaw industry: the growers, dealers, lobbyists, tycoons, and titans of industry that created corporate cannabis. Adam Bierman wasn't planning on selling weed—or developing a network of cannabis stores, or safeguarding his money in shoeboxes, or facing off with gangbangers in dark corners of parking lots, or taking on the public markets and justice system itself to bring the world America's first public cannabis unicorn. But, of course, not everything goes according to plan. Weed Empire is an inside look at the story behind MedMen, America's first cannabis unicorn and the world's first globally recognized cannabis brand. It's the underdog story of how a kid from the suburbs entered the cannabis scene and later reimaged weed for the mainstream, jumping at an opportunity to shift the conversation about legalizing marijuana. And it's the tale of how a one-room studio dispensary eventually turned into a public company valued at over \$2 billion—led by a CEO with no college degree, and with politicians, entertainment moguls, and Wall Street heavyweights on his team. An unconventional but intensely authentic memoir, Weed Empire is more than just an account of MedMen's colorful history—it's also a cautionary tale of the high cost of ambition. Adam refuses to pull any punches in his tell-all story, documenting MedMen's decade-long rise as well as all the extraordinary behind-the-scenes moments, the slog of passing cannabis legislation, and the exhausting battle to start a public company, bring a dream to the world, and hold a family—and himself—together through the madness.

reno business park: **Reno, Las Vegas, and the Strip** Eugene P. Moehring, 2014-09-15 Eugene P. Moehring analyzes the development of Reno and Las Vegas since 1945 with special

emphasis on the years after 1970. Major factors that shaped the development of both cities were the growth of corporate gaming and megaresorts and increased personal leisure and affluence. Moehring provides an engaging, informative, and readable history of the divergent paths that Reno and Las Vegas took over the past forty years. Reno, the nation's gambling mecca in the 1950s, led the way, developing the successful tourist economy that Las Vegas later embraced. Through the 1970s the two cities resembled each other greatly, but Las Vegas grew to achieve global significance, while Reno slowly declined, searching for new industries to power its future. Moehring shows that the development of the Las Vegas Strip was crucial to southern Nevada's success. The casinos, hotels, and entertainments of the Strip, and the workers they supported, formed a new urban center ringed by offices, residences, shopping, and a major university. In effect, it became a third metropolis, governed by county commissioners, larger than Reno and Las Vegas combined. Moehring brings the story of the three cities to the present day, examining lessons learned from the Great Recession and the efforts under way in all three metropolises to diversify their economies. Moehring makes an important contribution with the only current study of Nevada's cities, focusing on urban development issues rather than social history or the gaming industry. As the service economy continues to grow, not only in Nevada but throughout the United States, Moehring's work has many implications for urban studies and particularly the study of urban development in other metropolitan areas.
