quotes for business women: The Business of Women's Empowerment Sofie Tornhill, 2019-08-29 With catchphrases like "smart economics" and "the business case for gender equality," global corporations are increasingly involved in gender and development politics in the Global South. This book focuses on an emblematic example of this tendency to interrogate the proposed win-win relationship between corporate profit opportunities and the economic advancement of

women in marginalized economic positions. The Coca-Cola Company's 5by20 program has won broad recognition for its global reach and ambitious goal: to economically empower five million female micro-entrepreneurs across its supply chain before the end of 2020. Based on situated engagements with program implementers and participants in Mexico and South Africa, the study moves beyond the unequivocally positive effects conveyed by the program's rhetoric. It examines the appropriation of social values to strengthen the brand; the use of self-help psychology to enhance entrepreneurial conduct and exempt weak economic results; and the recasting of women's precarious labor in terms of entrepreneurship - which conceals structural causes of poverty and impediments of sustainable business development. Providing unique insights into the premises and effects of corporate solutions to gender inequality in the Global South, the book contributes to debates on the relations between neoliberal capitalist expansion and feminist emancipatory endeavors.

quotes for business women: Arab Women in Arab News Amal Al-Malki, David Kaufer, Suguru Ishizaki, Kira Dreher, 2012-03-15 This book addresses east-west understandings of Arab women as portrayed through translated media. The vast majority of media studies on Arab women are western-based. They study the effect of western stereotypes in western media depictions of Arab women. There is a vast scholarly literature tracing western stereotypes of Arab women from medieval times to the present. From 1800, the dominant western stereotype of Arab women depicts them as passive and oppressed. Thirty years of social science media research in the west has shown that media images of Arab women reinforce this two hundred year old stereotype. Much of this research has studied silent image bites of Arab women, where women are pictured in veils and their own voices are replaced by western captions or voice-overs. This book sets out to answer this question. To answer it, we contracted with a global news translation service from the Middle East to collect and translate a sample of 22 months of new summaries from 103 Arab media sources belonging to 22 Arab countries. Filtering the summaries that contained one or more female keywords (e.g., woman, mother, aunt, sister, she) yielded 2,061 summaries between September 2005 and June of 2007. Using the 2,061 summaries as input data, a coding scheme was developed for active and passive female behaviors based on verb-phrase analysis and conventions of English-language news-reporting.

quotes for business women: Anonymous in Their Own Names Susan Henry, 2021-04-30 *Anonymous in Their Own Names* recounts the lives of three women who, while working as their husbands' uncredited professional partners, had a profound and enduring impact on the media in the first half of the twentieth century. With her husband, Edward L. Bernays, Doris E. Fleischman helped found and form the field of public relations. Ruth Hale helped her husband, Heywood Broun, become one of the most popular and influential newspaper columnists of the 1920s and 1930s. In 1925 Jane Grant and her husband, Harold Ross, started the *New Yorker* magazine. Yet these women's achievements have been invisible to countless authors who have written about their husbands. This invisibility is especially ironic given that all three were feminists who kept their birth names when they married as a sign of their equality with their husbands, then battled the government and societal norms to retain their names. Hale and Grant so believed in this cause that in 1921 they founded the Lucy Stone League to help other women keep their names, and Grant and Fleischman revived the league in 1950. This was the same year Grant and her second husband, William Harris, founded White Flower Farm, pioneering at that time and today one of the country's most celebrated commercial nurseries. Despite strikingly different personalities, the three women were friends and lived in overlapping, immensely stimulating New York City circles. Susan Henry explores their pivotal roles in their husbands' extraordinary success and much more, including their problematic marriages and their strategies for overcoming barriers that thwarted many of their contemporaries.

quotes for business women: Daily Life in the Colonial City Keith T. Krawczynski, 2013-02-20 An exploration of day-to-day urban life in colonial America. The American city was an integral part of the colonial experience. Although the five largest cities in colonial America--Philadelphia, New York, Boston, Charles Town, and Newport--held less than ten percent of the American population on the eve of the American Revolution, they were particularly significant for a people who resided mostly in rural areas, and wilderness. These cities and other urban hubs contained and preserved the European traditions, habits, customs, and institutions from which their residents had emerged. They were also centers of commerce, transportation, and communication; held seats of colonial government; and were conduits for the transfer of Old World cultures. With a focus on the five largest cities but also including life in smaller urban centers, Krawczynski's nuanced treatment will fill a significant gap on the reference shelves and serve as an essential source for students of American history, sociology, and culture. In-depth, thematic chapters explore many aspects of urban life in colonial America, including working conditions for men, women, children, free blacks, and slaves as well as strikes and labor issues; the class hierarchy and its purpose in urban society; childbirth, courtship, family, and death; housing styles and urban diet; and the threat of disease and the growth of poverty.

quotes for business women: De Gruyter Handbook of Women Entrepreneurs in Emerging Economies Helle Neergaard, Maribel Guerrero, Breda Kenny, 2024-12-02 Whilst women-owned businesses have a significant positive impact on poverty reduction and social exclusion, we know far too little about women's entrepreneurship in an emerging economy context. This handbook aims to fill that void by giving voice to women entrepreneurs who are far too often overlooked or even invisible. The chapters offer varied perspectives on the challenges that women entrepreneurs in emerging markets experience, foremost among these the lack of resources, education, and access to finance, as well as gender-related inequalities, and the impact of social expectations. The handbook portrays how, despite these challenges, women use creative and work-around strategies to access resources, build networks and grow their businesses. De Gruyter Handbook of Women Entrepreneurs in Emerging Economies brings together contributions from leading experts in the field and is a must-read for academic scholars and postgraduate students interested in gender and entrepreneurship diversity.
