The confluence of gender and theatre has long created intense debate about representation, identification, social conditioning, desire, embodiment, and lived experience. As this handbook demonstrates, from the conventions of early modern English, Chinese, Japanese and Hispanic theatres to the subversion of racialized binaries of masculinity and femininity in recent North American, African, Asian, Caribbean and European productions, the matter of gender has consistently taken centre stage. This handbook examines how

critical discourses on gender intersect with key debates in the field of theatre studies, as a lens to illuminate the practices of gender and theatre as well as the societies they inform and represent across space and time. Of interest to scholars in the interrelated areas of feminist, gender and sexuality studies, theatre and performance studies, cultural studies, and globalization and diasporic studies, this book demonstrates how researchers are currently addressing theatre about gender issues and gendered theatre practices. While synthesizing and summarizing foundational and evolving debates from a contemporary perspective, this collection offers interpretations and analyses that do not simply look back at existing scholarship, but open up new possibilities and understandings. Featuring essential research tools, including a survey of keywords and an annotated play list, this is an indispensable scholarly handbook for anyone working in theatre and performance.
