skills to develop in business: *Indigenous Tourism* Michelle Aicken, Chris Ryan, 2010-02-17 In a world characterized by an encroaching homogeneity induced by the growth of multi-national corporations and globalization, the causes of difference accrue new levels of importance. This is as true of tourism as in many other spheres of life - and one cause of differentiation for tourism promotion is the culture of Indigenous Peoples. This offers opportunities for cultural renaissance, income generation and enhanced political empowerment, but equally there are possible costs of creating commodities out of aspects of life that previously possessed spiritual meaning. This book examines these issues from many different perspectives; from those of product design and enhancement; of the aspirations of various minority groupings; and the patterns of displacements that occur - displacements that are not simply spatial but also social and cultural. How can these changes be managed? Case studies and analysis is offered, derived from many parts of the globe including North America, Asia and Australasia. The contributors themselves have, in many instances, worked closely with groups and organizations of Indigenous Peoples and attempt to give voice to their concerns. The book is divided into various themes, each with a separate introduction and commentary. The themes are Visitor Experiences, Who manages Indigenous Cultural Tourism

Product, Events and Artifacts, Conceptualisation and Aspiration. In a short final section the silences are noted – each silence representing a potential challenge for future research to build upon the notions and lessons reported in the book. The book is edited by Professor Chris Ryan from New Zealand, and Michelle Aicken of Horwath Asia Pacific.

skills to develop in business: Building Your Ideal Private Practice Lynn Grodzki, 2015-03-16 A much-anticipated second edition to this classic practice-building text. Building Your Ideal Private Practice, a best-seller in its genre, is now fully revised after its original publication in 2000. Much has changed for therapists in private practice over the past fifteen years, including the widespread encroachment by insurance and managed care into the marketplace, the density of new therapists as over 600,000 therapists nation-wide try to stay viable, and the role of the Internet in marketing services. The revision of Building Your Ideal Private Practice is a comprehensive guide, updated with six new chapters and targeted for therapists at all stages of private practice development. It covers the essential how-to questions for those starting out in practice and explains the common pitfalls to avoid. For those already in practice, worried about profitability in an age of increasing competition, the author offers informed strategies such as the best way to create websites and other online marketing to find clients, and then goes further to explain how to retain the new breed of fickle clients who shop for therapists online, but are hard to satisfy. Other new chapters support veteran therapists edging towards retirement, including how to sell a therapy business for a profit or whether to stay working solo or expand into a more lucrative group business model. The revision comprises a complete, easy to use and fascinating business plan that shows therapists not just what to do, but also who to be in order to succeed. It adds depth, up-to-date information and a wealth of strategies to the original book, often referred to as the “bible” for therapists in private practice. Like the original, the revision conveys the author’s experience, optimism and warmth as she presents case examples, checklists and exercises to make the business advice come alive. Whether you have insurance-based or a fee-for-service practice, this book will help you thrive.
