Below are some of the main types of scholarships commonly offered in the field of business:

Merit-Based Scholarships

Merit-based scholarships are awarded to students based on their academic achievements, test scores, or other accomplishments. These scholarships recognize excellence and are often highly competitive. Criteria may include:

- High GPA
- Standardized test scores (SAT, ACT, GMAT)

They can be crucial for students from low-income families, providing them with access to higher education.

Field-Specific Scholarships

Field-specific scholarships target students pursuing particular areas of study within business, such as finance, marketing, or entrepreneurship. These scholarships are often provided by professional organizations, businesses, or educational institutions that aim to promote specific disciplines.

Eligibility Criteria for Business Scholarships

Eligibility criteria for scholarships in business can vary widely depending on the type and provider. However, there are common factors that most scholarship programs consider. Understanding these criteria can help prospective applicants prepare effectively.

Academic Performance

Most scholarships require a certain level of academic performance, typically measured by GPA or standardized test scores. Students are often required to maintain a minimum GPA throughout their studies to continue receiving funding.

Financial Need

Extracurricular Involvement

Many scholarship programs look for students who are actively involved in extracurricular activities, such as clubs, sports, volunteer work, or leadership positions. Demonstrating a well-rounded profile can enhance an applicant's chances of receiving a scholarship.

Essays and Recommendations

Applicants are often required to submit essays outlining their goals, aspirations, and reasons for pursuing a business degree. Letters of recommendation from teachers, employers, or mentors can also play a significant role in the selection process.

scholarship in business: Good Business James O'Toole, Don Mayer, 2013-05-13 This illuminating and practical collection of essays addresses the increasingly important topics of corporate ethics, social responsibility, and sustainability in the context of effective global business strategies. Instead of condemning business, or exhorting corporate leaders to do good, the authors deal with the hot button issues of our time in a cool and rational manner, seeing them as opportunities rather than as problems. As the authors illustrate, there is no necessary trade-off between business leaders doing the right thing, on one hand, and the profitable thing, on the other. They demonstrate that ethics is not peripheral, or in addition to, the central concerns of business. To the contrary, ethics and good citizenship are at the heart of all good business strategies, decisions, and organizational cultures. These essays offer useful examples of how executives can create strategies and cultures that are, both and at the same time, ethical and effective--the essence of GOOD BUSINESS. scholarship in business: Business, Peacebuilding and Sustainable Development Jason Miklian, Rina Alluri, John Elias Katsos, 2019-05-29 The intersection of business, peace and sustainable development is becoming an increasingly powerful space, and is already beginning to show the capability to drive major global change. This book deciphers how different forms of corporate engagement in the pursuit of peace and development have different impacts and outcomes. It looks specifically at how the private sector can better deliver peace contributions in fragile, violent and conflict settings and then at the deeper consequences of this agenda upon businesses, governments, international institutions and not least the local communities that are presumed to be the beneficiaries of such actions. It is the first book to compile the state-of-the-field in one place and is therefore an essential guide for students, researchers, policy-makers and practitioners on the role of business in peace. Without cross-disciplinary engagement, it is hard to identify where the cutting edge truly lies, and how to take the topic forward in a more systematic manner. This edited book brings together thought leaders in the field and pulls disparate strands together from business ethics, management, international relations, peace and conflict studies in order to better understand how businesses can contribute to peacebuilding and sustainable development. Before businesses take a deeper role in the most complicated and risky elements of sustainable development, we need to be able to better explain what works, why it works, and what effective business efforts for peace and development mean for the multilateral institutional frameworks. This book does just that.
