sharyland business park: *Managed Migrations* Cristina Salinas, 2018-11-14 Needed at one moment, scorned at others, Mexican agricultural workers have moved back and forth across the US-Mexico border for the past century. In South Texas, Anglo growers' dreams of creating a modern agricultural empire depended on continuous access to Mexican workers. While this access was officially regulated by immigration laws and policy promulgated in Washington, DC, in practice the migration of Mexican labor involved daily, on-the-ground negotiations among growers, workers, and the US Border Patrol. In a very real sense, these groups set the parameters of border enforcement policy. *Managed Migrations* examines the relationship between immigration laws and policy and the agricultural labor relations of growers and workers in South Texas and El Paso during the 1940s and 1950s. Cristina Salinas argues that immigration law was mainly enacted not in embassies or the halls of Congress but on the ground, as a result of daily decisions by the Border Patrol that growers and workers negotiated and contested. She describes how the INS devised techniques to facilitate high-volume yearly deportations and shows how the agency used these enforcement practices to manage the seasonal agricultural labor migration across the border. Her pioneering research reveals the great extent to which immigration policy was made at the local level, as well as the agency of Mexican farmworkers who managed to maintain their mobility and kinship networks despite the constraints of grower paternalism and enforcement actions by the Border Patrol.

sharyland business park: *Fencing in Democracy* Miguel Díaz-Barriga, Margaret E. Dorsey, 2020-01-31 Border walls permeate our world, with more than thirty nation-states constructing them. Anthropologists Margaret E. Dorsey and Miguel Díaz-Barriga argue that border wall construction manifests transformations in citizenship practices that are aimed not only at keeping migrants out but also at enmeshing citizens into a wider politics of exclusion. For a decade, the authors studied the U.S.-Mexico border wall constructed by the Department of Homeland Security and observed the political protests and legal challenges that residents mounted in opposition to the wall. In *Fencing in Democracy* Dorsey and Díaz-Barriga take us to those border communities most affected by the wall

and often ignored in national discussions about border security to highlight how the state diminishes citizens' rights. That dynamic speaks to the citizenship experiences of border residents that is indicative of how walls imprison the populations they are built to protect. Dorsey and Díaz-Barriga brilliantly expand conversations about citizenship, the operation of U.S. power, and the implications of border walls for the future of democracy.

sharyland business park: *Desarrollo sostenible en la frontera norte de México*: César M.

Fuentes , Sergio Peña , 2018-08-02 *Desarrollo sostenible en la frontera norte de México: Reflexiones para una agenda de acción* expone un conjunto de problemáticas referidas al desarrollo sostenible aplicado a ciudades y territorios localizados en la frontera norte de México, y en algunos casos a pares de ciudades transfronterizas. En este libro se presentan una serie de trabajos inscritos en el componente urbano y ambiental, que constituyen un esfuerzo por superar la deuda que el enfoque del desarrollo aún tiene en términos de resultados concretos para las condiciones de vida de las personas más allá de temáticas como el aumento de emisiones de CO2, el incremento del uso del vehículo propio y el congestionamiento vehicular. En ese sentido, la línea argumental de este trabajo es entender el desarrollo sostenible como un proceso reflexivo y crítico orientado a la mejora continua de las condiciones sociales, culturales, económicas, ambientales e institucionales de un país y sus territorios, mediante la consideración de los contextos particulares en que tiene lugar la sostenibilidad del desarrollo. Las contribuciones que aquí se presentan buscan resaltar diversos temas pertinentes para las áreas urbanas de la frontera norte y la región transfronteriza, unos más visibles que otros, pero que tocan fibras sensibles de la sostenibilidad en la vida de las poblaciones que habitan la frontera norte de México.

sharyland business park: *The Wind Doesn't Need a Passport* Tyche Hendricks, 2010 There are other books dealing with life at the border, but none as intelligent, searching, objective or encompassing as Tyche Hendricks' vivid evocation of this region--its people, its landscape, its industry, its problems and its unique culture.—Peter Schrag, author of *Not Fit for Society: Immigration and Nativism in America* This vivid, evocative book made me think of the Robert Frost line, 'Something there is that doesn't love a wall.' Tyche Hendricks' multilayered portrait of the human communities that transcend the U.S.-Mexico border should remind us all of what an artificial thing barriers, fences and checkpoints are. Maybe, just maybe, someday we, like so much of western Europe, can do without them.—Adam Hochschild, author of *Bury the Chains* This is an ambitious undertaking and Hendricks excels, finding stories along the way that illustrate the clash between, within and along that nearly 2,000-mile stretch of territory. Her reporting illustrates that for many U.S.-Mexico border residents, the international bridge is something you cross on your way to visit family, shop for groceries, get to a doctor or work.—Macarena Del Rocio Hernandez, University of Houston Dear President Obama, next time you are at Camp David spend a couple of hours reading *The Wind Doesn't Need a Passport*. While the Health Care overhaul may well come to define your presidency, immigration will define the future of our country. In this marvelous book—rigorously grounded, smartly argued, beautifully crafted, Tyche Hendricks captures, in stories of biblical proportion, the contours of the magical line that at once unites us and divides us as Americans and as neighbors of our indispensable partner in the South. Ms. Hendricks's book, Mr. President, will remind you just what is at stake in getting immigration reform right. All Californians, Texans, and Arizonians, who think they know the border, should read this book. It is essential reading for our times.—Marcelo M. sharyland business park: The Untold Story of the Lower Colorado River Authority John Williams, 2016-01-04 Arguably, no other institution has transformed the heart of Texas like the Lower Colorado River Authority. Born in the Great Depression of the 1930s, LCRA built a chain of dams and brought predictability to the cycles of extreme droughts and floods that had long plagued Austin and other communities. It also brought hydroelectric power—and with that, modern-day civilization—to the hard-scrabble regions of Central and South Texas. With those achievements, and the support of powerful political leaders like Lyndon Johnson, LCRA for years was touted as one of the state's major success stories. But LCRA has never been a stranger to controversy, and while it continues to provide much of the energy and water that fuels the economic engine of Austin and beyond, most people know very little about LCRA. In this book, readers will learn about the forces of nature and politics that combined to create LCRA; the colorful personalities who operated, supported, or fought with the agency; its spectacular successes, periodic blunders, and occasional failures; and its evolution into one of the largest public power organizations in Texas.
