small business credit cards chase: Fintech, Small Business & The American Dream Karen G. Mills, 2024-06-21 Small businesses are the backbone of the U.S. economy. They are the biggest job creators and offer a path to the American Dream. But for many, it is difficult to get the capital they need to operate and succeed. In *Fintech, Small Business & the American Dream*, former U.S. Small Business Administrator and Senior Fellow at Harvard Business School, Karen G. Mills, focuses on the needs of small businesses for capital and how technology will transform the small business lending market. This is a market that has been plagued by frictions: it is hard for a lender to figure out which small businesses are creditworthy, and borrowers often don't know how much money or what kind of loan they need. Every small business is different; one day the borrower is a dry cleaner and the next a parts supplier, making it difficult for lenders to understand each business's unique circumstances. Today, however, big data and artificial intelligence have the power to illuminate the opaque nature of a smallbusiness's finances and make it easier for them access capital to weather bumpy cash flows or to invest in growth opportunities. Beginning in the dark days following the

2008-9 recession and continuing through the crisis of the Covid-19 Pandemic, Mills charts how fintech has changed and will continue to change small business lending. In the new fintech landscape financial products are embedded in applications that small business owners use on daily basis, and data powered algorithms provide automated insights to determine which businesses are creditworthy. Digital challenger banks, big tech and traditional banks and credit card companies are deciding how they want to engage in the new lending ecosystem. Who will be the winners and losers? How should regulators respond? In this pivotal moment, Mills elucidates how financial innovation and wise regulation can restore a path to the American Dream by improving access to small business credit. An ambitious book grappling with the broad significance of small business to the economy, the historical role of credit markets, the dynamics of innovation cycles, and the policy implications for regulation, this second edition of *Fintech, Small Business & the American Dream* is relevant to bankers, regulators and fintech entrepreneurs and investors; in fact, to anyone who is interested in the future of small business in America.

small business credit cards chase: The Impact of Public Policy on Consumer Credit Thomas A. Durkin, Michael E. Staten, 2012-12-06 As both the twenty-first century and the new millennium opened and the old eras passed into history, individuals and organizations throughout the world advanced their listings of the most significant people and events in their respective specialties. Possibly more important, the tum of the clock and calendar also offered these same observers a good reason to glance into the crystal ball. Presumably, the past is of greatest interest to most people when it permits better understanding of the present, and maybe even limited insight into the outlook. In keeping with the reflective mood of the time, the staff and friends of the Credit Research Center (CRC) at Georgetown University's McDonough School of Business noted that the beginning of the new millennium also marked the beginning of the second quarter-century of the Center's existence. The Center began at the Krannert Graduate School of Management at Purdue University in 1974 and moved to the McDonough School of Business at Georgetown University in 1997. The silver anniversary of its founding offered the occasion for creating more than another listing of significant past accomplishments and milestones. Rather, it offered the opportunity and, indeed, a mandate for CRC as an academic research center, to undertake a retrospective and future look into the status of research questions pertaining to consumer credit markets. For this reason, the Center organized a research conference which was held in Washington, D. C.
