small business class online: **Strategies Used by Small Business Leaders to Obtain Government Contracts and Subcontracts** Dr. Damian C. Dunbar, 2019-05-30 Small business leaders (SBLs) underutilize billions of dollars of US government funding for small business subcontracting. The role of small business in the United States is important to local economies as well as a major contributor to the US economy. Using the resource-based view as the conceptual framework for this study, the purpose of this qualitative multiple case study was to explore the strategies five government support sector SBLs in the mid-Atlantic region used to obtain US government subcontract awards to remain sustainable. The selection criteria for this study consisted of small businesses in the mid-Atlantic region that have obtained subcontracts on prime government contracts. The data-collection process included a review of the small business documents and participants' responses to semistructured interviews. The data analysis process included case study analysis and cross-case comparisons using methodological triangulation. Based on the data analysis, themes that emerged from the results of this study included education, experience, and networking related to strategy creation and implementation by the SBLs to obtain subcontracts on prime contracts. The findings of this study may contribute to social change by providing SBLs an opportunity to learn strategies to obtain subcontracts, which could increase organizational opportunities, promote job creation, and help to improve local economies through increases in tax revenues that could help the elderly, children, and others within the community.

small business class online: *Blogging For Small Businesses* RD, *Blogging for Small Businesses* Small business owners are busy! It takes a huge amount of time and energy to get a business off the ground, and that means that beginning business owners are short on everything: time, staff, money, energy, etc. They're committing all their resources just to make sure their business survives. They may have heard about blogging and how it can enhance their business by solidifying relationships with customers, allowing them a platform to demonstrate their expertise, and providing a tool for them to stay in touch with existing customers and build a new customer base. But blogging is hard for most small business owners. Perhaps it's the fear of having to come up with new content on a regular basis, or maybe it's just a technology phobia that keeps many small businesses from starting their own blog. Often it's the last agenda in a long day, and because of fatigue or writer's block, it's an easy task to postpone day after day. "*Blogging for Small Businesses*" is a great resource to address that problem. The author begins by telling a story that any small business owner can relate to. Then he continues by explaining in very simple steps exactly what a blog is and how to get started. Even someone who knows nothing at all about the Internet can follow the clear instructions and detailed explanations in this resource. If you market to small businesses, or if you're a small business yourself and struggling to get online, then "*Blogging for Small Businesses*" is the resource you're looking for.
