start a business india: *The Role of Business Incubators in the Economic Growth of India* Apoorv R. Sharma, Balvinder Shukla, Manoj Joshi, 2019-07-08 To study the role of business incubators in the economic growth of India, it is imperative to understand whether or not incubators reduce the mortality of start-ups. Are incubators instrumental in providing an effective platform for accelerating the growth of start-ups? Do the existing incubators meet the expectations of start-ups? Are incubated start-ups able to attract funding from venture capitalists? These are only some of the questions that fall within the scope of this research. In this book, the authors explore the subject in-depth in an attempt to respond to them. For the purpose of this study, primary and secondary research data were used. In the context of American, European and Chinese incubator industries, this data was readily available. However, due to its nascent stage, there was not enough secondary data available in the context of the Indian incubation industry. Therefore, primary research was

carried out. Thus, in order to design the research, structured interviews with the founders of start-ups and incubator managers were conducted. The findings of the study reveal that, despite the gaps between the offering of incubators and the expectations of start-ups, there is a positive impact of business incubators on job creation, wealth generation and the creation of intellectual property.

The fact that nearly 33 percent of new firms fail within the first two years while twenty percent fail within four to five years of their existence makes it evident that while many people are highly motivated to start new firms, motivation alone is not sufficient, rather it should be coupled with relevant information, a strong business idea, a well-crafted business plan, and sound execution to maximize chances for success.
