umb business checking: *Business and Society* Danica Purg, Alenka Braček Lalić, Jennifer A. Pope, 2018-06-26 The world of business is constantly evolving and management education institutions will likely face a number of challenges in keeping up with these changes. While most books focus on the needs of management education institutions, this work addresses the needs of the corporate world in the era of the Fourth Industrial Revolution. Featuring an extensive research study spanning 11 countries, it offers a unique perspective on the business challenges and developmental needs of companies in emerging and recently emerged economies, and on the missing links between those needs and management education. Using both company-specific and country-level data, the book provides businesses and educators with rare insights and recommendations on strengthening existing partnerships (or establishing them anew) between management education institutions and the corporate sector in order to make management education relevant for the 21st century. The book argues that 'relevance' should take the center-stage of all higher education institutions in order to accomplish their third mission, namely service to society. This is especially important for management education institutions, whose mission is to mold future managers and leaders who can have a significant influence on economic success and the wellbeing of society.

umb business checking: Logic, Language and Reasoning Hans Jürgen Ohlbach, U. Reyle, 2012-12-06
This volume is dedicated to Dov Gabbay who celebrated his 50 birthday in October 1995. Dov is one of the most outstanding and most productive researchers we have ever met. He has exerted a profound influence in major fields of logic, linguistics and computer science. His contributions in the areas of logic, language and reasoning are so numerous that a comprehensive survey would already fill half of this book. Instead of summarizing his work we decided to let him speak for himself. Sitting in a car on the way to Amsterdam airport he gave an interview to Jelle Gerbrandy and Anne-Marie Mineur. This recorded conversation with him, which is included gives a deep insight into his motivations and into his view of the world, the Almighty and, of course, the role of logic. In addition, this volume contains a partially annotated bibliography of his main papers and books. The length of the bibliography and the broadness of the topics covered there speaks for itself.
