top 10 business consultants: Gatekeepers John C. Coffee Jr., 2006-06-01 In the wake of a series of corporate governance disasters in the US and Europe which have gained almost mythic status - Enron, WorldCom, Tyco, Adelphia, HealthSouth, Parmalat - one question has not yet been addressed. A number of 'gatekeeping' professions - auditors, attorneys, securities analysts, credit-rating agencies - exist to guard against these governance failures. Yet clearly these watchdogs did not bark while corporations were looted and destroyed. But why not? To answer these questions, a more detailed investigation is necessary that moves beyond journalism and easy scapegoating, and examines the evolution, responsibilities, and standards of these professions. John C. Coffee Jr., world-renowned Professor of Corporate Law, examines how these gatekeeping professions

developed, to what degree they failed, and what reforms are feasible. Above all, this book examines the institutional changes and pressures that caused gatekeepers to underperform or neglect their responsibilities, and focuses on those feasible changes that can restore gatekeepers as the loyal agents of investors. This informed and readable view of the players on the contemporary business stage will be essential reading for investors, professionals, executives and business academics concerned with issues of good governance.

Start-up companies cobbled together by young entrepreneurs are placed under one roof in order to share services and resources. This allows them to play major roles in IT, life sciences, industry and a host of other fields in both developing and developed countries. How does Business Incubation (BI) work? How do young entrepreneurs, often operating on a shoestring, succeed in attracting major financing from the public or private sectors, or from public-private-partnerships (PPPs)? Some make it all the way to the stock market, while others crash. Never before has global BI been so well documented in a single book. This is a must-read for
