td bank grants for small business: *The Banks We Deserve* Oscar Perry Abello, 2025-02-04 We've never done anything big in this country without little banks. Yet the number of community banks in the US has been steadily declining for decades, giving way to big banks that have little connection to the communities they claim to serve. The massive, unprecedented shift toward such a highly concentrated banking sector has weakened our ability to take action at a community level and leaves many people, especially those who have been historically marginalized, without access to capital. In *The Banks We Deserve*, journalist Oscar Perry Abello argues that community banking has a crucial role to play in addressing urgent social challenges, from creating a more racially just economy to preparing for a changing climate. At their best, community banks unleash the agency and aspirations of the communities that establish them. Abello challenges people working on racial justice, community development, or addressing climate change to start more community banks or credit unions as part of their work, while also calling for policies and regulatory reforms that will help tilt the landscape back in favor of community banking. *The Banks We Deserve* tells the stories of new community banks — like Adelphi Bank, in Columbus, Ohio, the first new Black bank in 20 years; or Walden Mutual Bank in Concord, New Hampshire, the first new mutual bank since 1973 and the first chartered specifically to finance a more sustainable food system; or Climate First Bank, in St. Petersburg, Florida, which has grown exponentially since opening for business in 2021. He hopes these stories inspire others to take some of these same daunting-but-not-impossible steps. For a community or industry that is being ignored by big banks, the idea of starting up a new bank or credit union rarely figures as an option. In *The Banks We Deserve*, Abello shows advocates, organizers, and innovators that it can be done, that it is being done, and describes a path to support more community banks and credit unions.

td bank grants for small business: De Gruyter Handbook of Entrepreneurial Finance David Lingelbach, 2022-05-09 As of early 2022, seven of the ten largest firms in the world by market capitalization had been funded through various types of entrepreneurial finance. This handbook provides an up-to-date survey of what we know about this significant phenomenon in all its forms, and where our knowledge about it needs to head from here. The handbook embraces a wide range of established and emerging academic and practitioner voices across the globe to explore the theoretical and practical flux and tension in the field. Until recently, most studies have taken a supply side perspective, focusing on the perspective of those who provide funding to new ventures. This book takes a different, demand side perspective, beginning with the entrepreneur and gradually broadening our view to include close by and then more distant funding sources. Following this approach, it is organized into four parts detailing the individual level (founders' resources, bricolage and bootstrapping, effectuation and portfolio entrepreneurship); the inner circle (informal financing, business groups, incubators and accelerators); the wider world (formal debt, microfinance, venture capital, corporate venture capital, business angels, government funding and family offices); and emerging perspectives (non-Western perspectives, gender, indigenous perspectives, post-conflict and disaster zones and ethics). The introduction considers the general state of the field, while the conclusion takes on additional topics relevant to entrepreneurial finance, such as decentralized

finance, big data, behavioral economics, financial innovation and COVID-19, as well as possible ways in which entrepreneurial finance can have a greater impact on other disciplines. This handbook will be a core reference work for researchers, practitioners, and policy makers seeking an up-to-date academic survey of entrepreneurial finance. It can also be used as a primary text in Ph.D. seminars in entrepreneurship, entrepreneurial finance, and finance. Instructors in Master's level courses in entrepreneurial finance and venture capital will also find the book of benefit.
