turkish airlines business class: Flying Ahead of the Airplane Nawal K. Taneja, 2016-04-15 Airlines willing to develop insight from foresight relating to the expected 'step phase changes' will eventually improve their margins. However, the backward-looking airline, managed using old strategic levers and short-term metrics, will cease to exist, merge, shrink, become more dependent on government support, or become irrelevant. 'Management innovations' are not going to deliver the required improvements; innovation within management is essential for airlines' survival. In *Flying*

Ahead of the Airplane, Nawal Taneja analyzes global changes and thought-provoking scenarios to help airline executives adjust and adapt to the chaotic world. Drawing on his experience of real airline situations worldwide, the author concludes that there is a gulf between what executives are doing now and what they need to do to stay ahead of the curve. To close this gap, the author suggests that airline executives focus on just three relevant initiatives: a) aligning business and technology strategies, b) redesigning organization structures to centralize the role of the scheduling function, and c) developing relevant brands that integrate social networking technology. To support this third initiative, the book provides insights on branding from 20 fascinating non-aviation case studies from around the world. Flying Ahead of the Airplane will assist practitioners in airlines of every size to integrate future trends into their mainstream thinking and launch flexible business models to manage risk and compete effectively in the 'flattening world'.

turkish airlines business class: The Global Code Clotaire Rapaille, 2025-09-23 For decades, Clotaire Rapaille's work focused on how people's relationships with the most important concepts in their lives—love, health, and money, for instance—are guided by subconscious cultural messages. But recently, he has uncovered a new phenomenon: a global unconscious, or core values and feelings that are consistent worldwide—the result of our constant interconnectedness. He has also identified a new group who are paving the way for the future of decision-making: the Global Tribe. These individuals are fluent in the language of culture, untied to any notion of nationalism or ideology. They are defining the key values driving our new world economy, with profound implications for how companies market their products and services. Rapaille takes us on a journey through China, Brazil, India, England and everywhere in between to discover the new standards for luxury, pleasure, technology and education. How can elite brands compete in a world of knockoffs? How can universities maintain their prestige when a cheap master's degree or doctorate is only a click away? We must speak the language of the Global Tribe in order to succeed. Building on seven years of research, Rapaille analyzes how this new mindset has taken hold in various regions, and

how marketers and service providers can tailor their offerings and marketing accordingly. The Global Code is an invaluable glimpse at how our new multi-sphere world is affecting us all.
