turkish 777 business class review: *Emerging Market Multinationals in Europe* Louis Brennan, Caner Bakir, 2016-06-17 This book makes a timely and highly stimulating contribution to the discourse on emerging-market multinationals, (EMNCs), as Foreign Direct Investment (FDI) in Europe from emerging countries (especially from the BRICs - Brazil, Russia, India, China) continues to grow in significance. Unsurprisingly, the emergence of EMNCs from emerging economies raises a wide range of challenges and opportunities for scholars, business professionals, and policymakers alike. While explaining the sudden rise of these companies has become a major concern among scholars, we have very limited knowledge on drivers, motivations, strategies, and impact of these EMNCs in Europe and their policy implications. This volume provides fresh insights into EMNCs activities and their impact in Europe. The contributors argue that EMNCs combine various country specific advantages, existing firm-specific advantages (exploitation), and/or new FSAs (exploration) in their FDI, and that there is considerable heterogeneity across EMNCs, even those from the same southern economy. Highlighting the importance of considering this divergent behaviour when implementing future European FDI policies, this book will be of interest to students and scholars of European Politics, International Political Economy, International Business and European Integration.

turkish 777 business class review: *Bankrupt Representation and Party System Collapse* Jana Morgan, 2011-11-30 In recent decades, Bolivia, Colombia, Italy, and Venezuela have all faced the turmoil and democratic crisis of party system collapse. In *Bankrupt Representation and Party System Collapse*, Jana Morgan analyzes the causes of such collapse. She does so through a detailed examination of Venezuela's traumatic party system decay as well as comparative analysis of seven other countries. Collapse occurs when the party system as a whole is unable to provide adequate linkage between society and the state, failing to furnish programmatic representation, integration of major societal interests, or clientelist exchanges. Linkage decays when party systems face challenges that jeopardize their core strategies at the same time that they are constrained in their ability to adapt and to confront these threats. If this decay is unchecked and linkage of all sorts fails, then the bankrupt party system collapses.

turkish 777 business class review: *The Connected City* Zachary P. Neal, 2012-08-06 The *Connected City* explores how thinking about networks helps make sense of modern cities: what they are, how they work, and where they are headed. Cities and urban life can be examined as networks, and these urban networks can be examined at many different levels. The book focuses on three levels of urban networks: micro, meso, and macro. These levels build upon one another, and require distinctive analytical approaches that make it possible to consider different types of questions. At one extreme, micro-urban networks focus on the networks that exist within cities, like the social relationships among neighbors that generate a sense of community and belonging. At the opposite extreme, macro-urban networks focus on networks between cities, like the web of nonstop airline flights that make face-to-face business meetings possible. This book contains three major sections organized by the level of analysis and scale of network. Throughout these sections, when a new methodological concept is introduced, a separate 'method note' provides a brief and accessible

introduction to the practical issues of using networks in research. What makes this book unique is that it synthesizes the insights and tools of the multiple scales of urban networks, and integrates the theory and method of network analysis.

turkish 777 business class review: **Making of the West, Volume II: Since 1500** Lynn Hunt, Thomas R. Martin, Barbara H. Rosenwein, Bonnie G. Smith, 2012-01-04 Students of Western civilization need more than facts. They need to understand the cross-cultural, global exchanges that shaped Western history; to be able to draw connections between the social, cultural, political, economic, and intellectual happenings in a given era; and to see the West not as a fixed region, but a living, evolving construct. These needs have long been central to The Making of the West. The book's chronological narrative emphasizes the wide variety of peoples and cultures that created Western civilization and places them together in a common context, enabling students to witness the unfolding of Western history, understand change over time, and recognize fundamental relationships.
