template business model canvas word: Visualising Business Transformation Jonathan Whelan, Stephen Whitla, 2020-01-24 Business transformation typically involves a wide range of visualisation techniques, from the templates and diagrams used by managers to make better strategic choices, to the experience maps used by designers to understand customer needs, the technical models used by architects to propose possible solutions, and the pictorial representations used by change managers to engage stakeholder groups in dialogue. Up until now these approaches have always been dealt with in isolation, in the literature as well as in practice. This is surprising, because although they can look very different, and tend to be produced by distinct groups of people, they are all modelling different aspects of the same thing. Visualising Business Transformation draws them together for the first time into a coherent whole, so that readers from any background can expand their repertoire and understand the context and rationale for each technique across the transformation lifecycle. The book will appeal to a broad spectrum of readers involved in change, whether that is by creating change models themselves (strategists, architects, designers, engineers, business analysts, developers, illustrators, graphic facilitators, etc.), interpreting and using them (sponsors, business change managers, portfolio/programme/project managers, communicators, change champions, etc.), or supporting those involved in change indirectly (trainers, coaches,

mentors, higher education establishments and professional training facilities).

template business model canvas word: Enterprise Design Fundamentals Jan L. G. Dietz, Hans B. F. Mulder, 2025-05-05 This textbook explains the fundamentals of Enterprise Design. It emphasizes two separations of concerns when (re)designing enterprises to keep the work

intellectually manageable. The first one is between function and construction, thus between the enterprise business and the enterprise organisation. The second one is between the essential model of the organisation (the ontology of the enterprise) and the implementation model. With these two intellectual tools it is possible to conceive and put into effect any change in a manageable and responsible way. To this end, the book is divided into three parts: Introduction, Theories, and Applications. Part I contains the three introductory chapters. In chapter 1 the reader is introduced to the discipline of Enterprise Engineering, in which a design-oriented view is taken toward organisations. Chapter 2 discusses the often-confused distinction between Enterprise Engineering and Enterprise Architecture, and chapter 3 introduces Enterprise Design as one of the conceptual pillars of Enterprise Engineering. Next, Part II outlines the constituting theories of Enterprise Design. Chapter 4 first provides an overview of all Enterprise Engineering theories and their position in a clarifying framework. Then chapters 5 through 10 contain extended summaries of the theories that underly the notion of Enterprise Design. Every chapter is divided in three parts: foundations, elaborations, and discussions. Eventually, Part III is about the application of the theories. Chapter 11 contains an extensive description of the DEMO (Design and Engineering Methodology for Organisations) methodology, specifically of the DAO method, which guides the (re)design of enterprises. In chapters 12 to 14 exercises are presented and discussed for the use of DEMO to the (re)design of enterprises. These exercises in organisational redesign and digital transformation are particularly suited as course material. In chapter 15, practical applications of DEMO in various industrial areas are reported. In addition to a solid theoretical presentation of Enterprise Design, this book also contains many exercises and examples of its practical application. This combination makes the book perfectly suited for courses on Enterprise Design and Enterprise Engineering, including DEMO as the principal methodology in Enterprise Engineering.
