vital farms business model: Every Purchase Matters Paul Rice, 2025-04-08 From the founder and CEO of Fair Trade USA, a critical account of the past, present and future of conscious capitalism--the change it has wrought in the world and the potential it still has to confront our greatest challenges. We all have the power to change the world through the products we buy. This simple premise has driven the growth of the conscious consumer movement for decades. Indeed, what started with a handful of niche sustainability brands has exploded into the mainstream with labels like Organic, Non-GMO, and Fair Trade Certified now adorning products in major retailers across the country. Yet the true promise of ethical sourcing and conscious consumerism has not been fully realized. Paul Rice has dedicated his career to helping consumers and businesses embrace the power they have to protect the environment and improve the lives of farmers and workers on the far side of our global supply chains. In Every Purchase Matters, Rice reveals the untold story of the Fair Trade movement and its significance for us all. Calling on the close relationships he cultivated over the last forty years with the pioneers of ethical sourcing—CEOs, activists, grassroots farmer leaders, and consumer advocates—Rice gives voice to the visionaries and practitioners who are making sustainable business the new normal. These protagonists share successes and failures, lessons learned, and their extraordinary impact in communities around the world. Their stories illuminate how sustainability is good not only for people and planet but also for business. Whether you're a consumer, a business leader, or an investor, Every Purchase Matters offers a rich and persuasive case for conscious capitalism—the change it has brought and the potential it still has to create a more just, equitable, and sustainable world.

vital farms business model: The Profiteers Christopher Marquis, 2024-05-14 An exposé of how society pays for corporations' free lunch and the cost of environmental damage, low wages, systemic discrimination, and cheap goods. In an age when business leaders solemnly profess dedication to principles of environmental and social justice, Christopher Marquis's provocative investigation into the real costs of doing business reveals the way that leaders of the corporate world gaslight to evade responsibilities by privatizing profits and socializing costs. "Who pays?" for the resulting climate and environmental damage, racism, low wages, and cheap goods: the average citizen and the taxpayer. By bringing to light ideas that today are on the fringe but rapidly making their way into the mainstream, Marquis outlines a new regenerative paradigm for business in society. He tells of a group of pioneers trying to not just reform but transform the way business is conducted all over the world. By taking novel actions to reimagine business operations in responsible ways, minimize their negative impacts, and create new ways for business to properly absorb their hidden costs, these leaders provide blueprints to move the needle on vexing social and environmental issues. What's in it for leaders of the corporate world? The model of reform presented provides clear guidance on how to get ahead of the curve as an emerging economic order is formed. No business can lead from the front if it is morally-backward looking. History has shown time and again that those who get out in front of emerging changes in our social and environmental landscape protect themselves from

inevitable eclipse.
