words to describe a business culture: *Swimming with Sharks* Gavin Moffat, 2018-10-22
Swimming with Sharks will inspire a-ha moments that will make it more fun to be at work, or maybe even make it possible for your business to survive the turbulent economic seas that seem

synonymous with building a business in the 21st century. Entrepreneur, marketing and communications expert Gavin Moffat found remarkable parallels between his two passions, consulting to businesses as they navigate through change, and SCUBA and technical diving. While one seems to be all work and the other all play, achieving success in either requires very similar approaches. Gavin's style is to the point, irreverent, and frequently funny. This book is a conversation with a friend who asks questions that may make you squirm a little or maybe even wriggle in discomfort. But they're questions that will make you think, and change the way you think too. Including contributions from other smart disruptive thinkers, *Swimming with Sharks* offers exceptional food for thought on these topics and provides guidelines on how to take action. Know where you're going. Plan properly, and then stick to the plan, unless it doesn't make sense any more. Make sure you've got the equipment you need. Maintain your equipment, and your skills. Make sure everyone on the team knows what's got to be done. Go on, have the adventure. Review what's working and what isn't. Do it all again, because that was fun, wasn't it? In business, as in life and sport, you never know it all. Lifelong learning is the name of the game. You can always improve, do things differently and add more value to your customers. You can never tick learning off your to-do list.

words to describe a business culture: Chinese Business Culture Andrea Schulz, 2006-11-23
Inhaltsangabe: Abstract: The aim of this Masters thesis is to explain Chinese business culture. In order to understand why Chinese business culture is different from European or American business culture, for example, it is necessary to know the roots of Chinese cultural values: what is the specific Chinese context which made it possible that China bore its unique business culture? Which specific values are valid in China today? How do they influence Chinese business conduct? This Master s thesis explains the development and constitution of Chinese business culture. Furthermore, with reference to the latest literature about the topic and additional field research in a private company in China, this Masters thesis reveals recent changes in Chinese business cultural values. Because business culture is influenced by variables such as globalisation or the political system, it represents a dynamic value system over the long term. Thus, this Masters thesis updates academic knowledge about this topic. Moreover, it addresses questions that have been raised by academic authors. Whenever I found a remark in literature which raised up an interesting issue for further research, I noted the hint down and included it into my survey. Thereby, I try to add new perspectives to the topic of Chinese business culture. In total, this Masters thesis should therefore be a useful and topical guide to Chinese business culture.
