women business conference: She's the Boss Debra Michals, 2025 In the years after World War II, as women were being pushed from wartime jobs for returning soldiers, government and business leaders--and women themselves--saw small business ownership as a viable economic solution. In just five years, US women owned nearly a million of the nation's businesses. In the decades since, women have moved increasingly into business ownership, often outpacing male start-ups so that today, they own more than fourteen million businesses, 40 percent of all US companies. *She's the Boss* chronicles the forces that made entrepreneurship attractive to women. In rich detail, Debra Michals shares the stories of the countless women of all races, ethnicities, genders, and abilities who contributed to this important history. The book also explores the intersection of women's personal choices within changing social, political, and economic factors, such as the rising divorce rates of the 1960s and 1970s, ongoing workplace and credit discrimination, civil and women's rights activism and activist entrepreneurs, the 1970s recession and 1980s Reagan Revolution, and more recently, the internet, crowd-funding, and social entrepreneurship.

women business conference: Women Entrepreneurs and the Global Environment for Growth Candida G. Brush, Anne de Bruin, Elizabeth J. Gatewood, Colette Henry, 2010-01-01 Women's entrepreneurship research and the understanding of factors influencing the growth of women-owned business advanced significantly over the last decade. Yet, challenges remain. Women Entrepreneurs and the Global Environment for Growth provides wide-ranging insights on the challenges women entrepreneurs face growing their businesses and how these may be addressed. This volume is rooted in research and considers growth challenges both contextually and firm specific, provoking current thought and enriching the current literature on gender and entrepreneurship. Part one highlights how contextual factors, and especially social and familial settings of entrepreneurs, have a differential impact on men and women. Part two examines strategies, constraints and enablers of growth and performance. The authors aptly demonstrate that a well-focused gender lens is necessary to better explain the phenomenon of women's entrepreneurship. Extending previous studies about women's entrepreneurship, this volume is unique in its application of research from the Diana Project, a path breaking initiative dating from 1999 to study female entrepreneurial success. Contributions from an international cast of authors make this a comprehensive and broadly appealing reference work.
