calculus online problems: Modern Problems in PDEs and Applications Marianna Chatzakou, Joel Restrepo, Michael Ruzhansky, Berikbol Torebek, Karel Van Bockstal, 2024-07-15 The principal aim of the volume is gathering all the contributions given by the speakers (mini courses) and some of the participants (short talks) of the summer school Modern Problems in PDEs and Applications held at the Ghent Analysis and PDE Center from 23 August to 2 September 2023. The school was devoted to the study of new techniques and approaches for solving partial differential equations, which can either be considered or arise from the physical point of view or the mathematical perspective. Both sides are extremely important since theories and methods can be developed independently, aiming to gather each other in a common objective. The aim of the summer school was to progress and advance in the problems considered. Note that real-world problems and their applications are classical study trends in physical or mathematical modelling. The summer school was organised in a

friendly atmosphere and synergy, and it was an excellent opportunity to promote and encourage the development of the subject in the community.
