a different mirror essays: A Different Mirror Ronald Takaki, 2012-06-05 Takaki traces the economic and political history of Indians, African Americans, Mexicans, Japanese, Chinese, Irish, and Jewish people in America, with considerable attention given to instances and consequences of racism. The narrative is laced with short quotations, cameos of personal experiences, and excerpts from folk music and literature. Well-known occurrences, such as the Triangle Shirtwaist Factory Fire, the Trail of Tears, the Harlem Renaissance, and the Japanese internment are included. Students may be surprised by some of the revelations, but will recognize a constant thread of rampant racism. The author concludes with a summary of today's changing economic climate and offers Rodney King's challenge to all of us to try to get along. Readers will find this overview to be an accessible, cogent jumping-off place for American history and political science plus a guide to the myriad other sources identified in the notes.

a different mirror essays: The Other Mirror Kristine Ibsen, 1997-02-25 During the last decade, women's narrative has become a recognized force in Mexican letters. The essays in this collection explore the recent work of nine contemporary Mexican women writers. Many of the works have been translated into English; some, like Laura Esquivel's *Like Water for Chocolate*, have become international best sellers. The unprecedented commercial success of these novels has generated mixed reactions: at the same time that the secondary status afforded women's narrative has come to be questioned in many academic circles, some authors are dissociating themselves from women's writing. The essays in this volume address these issues, providing a much needed contribution to the study of women's narrative.

a different mirror essays: *Distinctively Baptist Essays on Baptist History* Walter B. Shurden, 2005 This collection of essays by different authors is presented as a tribute to Walter B. Buddy Shurden, (distinctively Baptist) church historian, teacher, preacher, author, Baptist apologist extraordinaire. The rationale of this celebration of the lifework and influence of Walter Shurden is well stated, for example, in editor Marc Jolley's preface: [D]uring some of the initial forays of our most-recent and ongoing Fundamentalist-Moderate controversy, there were days when I thought about changing denominations. Shurden's works were instrumental in my remaining a Baptist, not because I could see how Baptists had always had controversies and survived--although that is true--but because he helped me understand that the reason I had been Baptist and would remain so was due to our Baptist distinctives, our freedoms. For so much more, but especially for that understanding, I am forever grateful. Many students, Baptists in the pews, some at the pulpit or lectern, even some who are not distinctively Baptist could testify in like terms regarding the ongoing work and influence of Walter B. Shurden. The essays in this collection of course address some of the primary concerns of Walter Shurden, augmenting that already significant lifework.

a different mirror essays: *A Nation of Peoples* Elliott Robert Barkan, 1999-05-30 The debate over America's multiculturalism has been intense for nearly three decades, dividing opponents into those insisting on such recognition and those fearing that such a formal acknowledgment will undermine the civic bonds created by a heterogeneous nation. Facts have often been the victim in this dispute, and few works have successfully attempted to present the broad spectrum of America's ethnic groups in a format that is readable, current, and authoritative. The chapters in this reference book demonstrate that America has been far more than a nation of immigrants; it has been a nation of peoples—of virtually all races, religions, and nationalities—inclusive of indigenous natives and peoples long present as well as myriad immigrant and refugee groups. Not all groups have equally found America to be a land of opportunity, and the successes of some groups have come at the expense of others. To understand the American experience, the reader must not just study the story of immigrants living on the East Coast, but also the history of those living in the South, Southwest, West, and even Alaska and Hawaii. As a reference book, this volume provides thorough coverage of more than two dozen racial, ethnic, and religious groups in the United States. Each chapter is written by an expert contributor and overviews the experiences of one group or a cluster of related groups. The chapters are arranged alphabetically and cover groups such as African Americans, American Indians, Filipinos, Hawaiians, Mexicans, Mormons, and Puerto Ricans. To the extent possible, each chapter discusses the initial arrival of the group in America; the adaptation of the first generation of immigrants; the economic, political, and cultural integration of the group; and the status of the group in contemporary American society. Each chapter closes with a bibliographical essay, and the volume concludes with a review of the most important general works on America's multicultural heritage.

a different mirror essays: Ethnographic Ways of Knowing Lucinda Carspecken, 2024-06-14 Drawing on the works of ten scholars and public intellectuals ranging over 200 years, this book foregrounds ways of knowing that include but go beyond the cognitive. The book explores the work of Harriet Martineau, Jane Addams, W. E. B. Du Bois, Zora Neale Hurston, Ella Deloria, M. N. Srinivas, Barbara Myerhoff, Orlando Fals Borda, Ronald Takaki and Nawal El Saadawi. The author discusses their multifaceted ethnographic practices and argues that such practices are still under-acknowledged in contemporary research in comparison to cognition and categorization. These scholars were outsiders to their societies in a variety of ways. They highlighted power imbalances in the perception and representation of one group by another and brought direct experience, emotion, narrative, imagination, recognition, self-reflection, activism and cultural humility into their writing, in addition to rationality. The book engages with the authors and their ideas in the context of their times and places. It also reclaims them as methodological predecessors, noting their contributions to what educational ethnography has been and what it could be in the future. Expanding the canon of social research history and providing insight into unique methodological forms, this text will be valuable for scholars and postgraduate students with interests in ethnography, as well as the history of research, anthropology and qualitative methods more broadly.

a different mirror essays: *Other Words* Jace Weaver, 2001 Eloh', a Cherokee word, is usually translated by anthropologists as religion, but it also simultaneously encompasses history, culture, knowledge, law, and land. In this provocative work, Jace Weaver interlaces these seemingly disparate meanings to form a coherent approach to Native American Studies. In nineteen interrelated chapters, Weaver presents a range of experiences shared by native peoples in the Americas, from the distant past to the uncertain future. He examines Indian creative output, from oral tradition to the postmodern wordplay of Gerald Vizenor, and brings to light previously overlooked texts. Weaver also tackles up-to-the-minute issues, including environmental crises, Native American spirituality, repatriation of Indian remains and cultural artifacts, and international human rights.

The emphasis on dreams and the imagination has been proven to excite and motivate students.

a different mirror essays: Political Power in America Anthony R. DiMaggio, 2019-12-01 Introduction to American politics that provides a critical examination of both political institutions and political behavior. Analyzing major political institutions such as Congress, the courts, the presidency, and the media, this book chronicles how the interests of affluent Americans—particularly business, professional, and corporate interests—dominate over those of “average” citizens. Anthony R. DiMaggio examines American political behavior, as it relates to lobbying, citizen activism, media consumption, and voting, to demonstrate how the public is often misinformed and manipulated regarding major political and economic matters. However, record public distrust of the government and the increasing popularity of mass protests suggest that most Americans are deeply unhappy with the political status quo, and many are willing to fight for change. *Political Power in America* details this interplay between a political system dominated by the affluent few and the rise of mass political distrust and protest. It offers information and tools needed to better understand the democratic deficit in American politics, while providing opportunities for discussing what we might do to address the mounting crisis of declining democracy. “An original

and refreshing introductory text on the United States political system. The originality, coupled with an accessibility of critical concepts, makes this book truly one of a kind.” — Mark Major, author of *The Unilateral Presidency and the News Media: The Politics of Framing Executive Power*

a different mirror essays: *Regional Fictions* Stephanie Foote, 2001-03-29 Out of many, one—e pluribus unum—is the motto of the American nation, and it sums up neatly the paradox that Stephanie Foote so deftly identifies in *Regional Fictions*. Regionalism, the genre that ostensibly challenges or offers an alternative to nationalism, in fact characterizes and perhaps even defines the American sense of nationhood. In particular, Foote argues that the colorful local characters, dialects, and accents that marked regionalist novels and short stories of the late nineteenth century were key to the genre’s conversion of seemingly dangerous political differences—such as those posed by disaffected Midwestern farmers or recalcitrant foreign nationals—into appealing cultural differences. She asserts that many of the most treasured beliefs about the value of local identities still held in the United States today are traceable to the discourses of this regional fiction, and she illustrates her contentions with insightful examinations of the work of Sarah Orne Jewett, Hamlin Garland, Gertrude Atherton, George Washington Cable, Jacob Riis, and others. Broadening the definitions of regional writing and its imaginative territory, *Regional Fictions* moves beyond literary criticism to comment on the ideology of national, local, ethnic, and racial identity.

a different mirror essays: *The Anti-Journalist* Paul Reitter, 2024-05-31 In turn-of-the-century Vienna, Karl Kraus created a bold new style of media criticism, penning incisive satires that elicited both admiration and outrage. Kraus's spectacularly hostile critiques often focused on his fellow Jewish journalists, which brought him a reputation as the quintessential self-hating Jew. *The Anti-Journalist* overturns this view with unprecedented force and sophistication, showing how Kraus's criticisms form the center of a radical model of German-Jewish self-fashioning, and how that model developed in concert with Kraus's modernist journalistic style. Paul Reitter's study of Kraus's writings situates them in the context of fin-de-siècle German-Jewish intellectual society. He argues that rather than stemming from anti-Semitism, Kraus's attacks constituted an innovative critique of mainstream German-Jewish strategies for assimilation. Marshalling three of the most daring German-Jewish authors—Kafka, Scholem, and Benjamin—Reitter explains their admiration for Kraus's project and demonstrates his influence on their own notions of cultural authenticity. *The Anti-Journalist* is at once a new interpretation of a fascinating modernist oeuvre and a heady exploration of an important stage in the history of German-Jewish thinking about identity.
