access us history textbook: *The First U.S. History Textbooks* Barry Joyce, 2015-08-27 This book analyzes the common narrative residing in American History textbooks published in the first half of the 19th century. That story, what the author identifies as the American "creation" or "origins" narrative, is simultaneously examined as both historic and "mythic" in composition. It offers a fresh, multidisciplinary perspective on an enduring aspect of these works. The book begins with a provocative thesis that proposes the importance of the relationship between myth and history in the creation of America's textbook narrative. It ends with a passionate call for a truly inclusive story of who Americans are and what Americans aspire to become. The book is organized into three related sections. The first section provides the context for the emergence of American History textbooks. It analyzes the structure and utility of these school histories within the context of antebellum American society and educational practices. The second section is the heart of the book. It recounts and scrutinizes the textbook narrative as it tells the story of America's emergence from "prehistory" through the American Revolution—the origins story of America. This section identifies the recurring themes and images that together constitute what early educators conceived as a unified cultural narrative. Section three examines the sectional bifurcation and eventual re-unification of the American History textbook narrative from the 1850s into the early 20th century. The book concludes by revisiting the relationship between textbooks, the American story, and mythic narratives in light of current debates and controversies over textbooks, American history curriculum and a common American narrative.

access us history textbook: *Not Another U.S. History Textbook* Adam Strube, 2024-01-15 Why on earth would two history nerds use their own free time to write another US history textbook? Well, that, intelligent human, is the right question. This work breaks from the traditional memorization of who, what, when, where, and focuses on why and how. The former is popular in schools due to its efficiency in quantification for testing. You're either right or wrong about remembering facts. But it's so boring that most students turn off their brains once they set foot in the class, and that habit continues well into old age, if not recognized and corrected. Why and how are more subjective, therefore harder to grade. But with their asking, people become re-centered in our collective story, where they belong. Only then can proper context be understood, and criticism and perspective be applied. We believe this approach to be the missing link in our education and understanding of current issues, norms, and discussion points. Hopefully, after reading this work, each reader's critical thinking will activate around all history permanently. That will certainly aid humanity's evolution and communication. Wait, does that mean this book can be categorized as self-help? Argue away!

access us history textbook: Learning to Hide Tricia Hagen Gray, 2024-02-01 Just inside the school doors from the back parking lot, in the farthest reaches from the school entrance, there is a short corridor that leads to the hallway that houses Washington River High School's two English Learning classrooms. These classrooms offer both safe sanctuary for the school's growing population of Latinx students and a troublingly hidden space that allows most of the school and community to maintain the pretense of the generally prosperous, White, neighbor-helping-neighbor place of their myopic nostalgia. This Mayberry-like imaginary excludes the divisive sociopolitical battles of the last decade that have earned Washington River both local and national attention for a city ordinance that would fine landlords who rented to undocumented residents, a de jure policy that became de facto racial profiling. The English Learning classrooms are thus sites for the work of learning English and other academic subjects alongside the more abstract but no less important work of constructing citizen identities. In these spaces, adolescent Latinx newcomers negotiate and assert complicated claims about how they get to be of Washington River High School, the wider community of Washington River, and of the United States. As established residents and newcomers interact with each other (or not) in Washington River, they confront people who are linguistically, culturally, racially, and socially different from themselves. The polarized and contentious sociopolitical context of the United States in the wake of Donald Trump's election to the United States presidency in 2016 provides the backdrop to this nine-chapter book. The book centers the experiences of newcomer students as they construct citizen identities within the microcontext of their classroom and school and the macro-context of a changing and polarized United States. While this is an account of the local context of Washington River, the issues raised—welcome, unwelcome, belonging, and claiming rights—are not particular to Washington River. As part of the changing sociocultural landscape of

the Midwestern United States, in which historically distinct groups come together in common spaces, Washington River High School offers an example of the concurrently familiar and uncomfortable ways that new receiving communities in the New Latino Diaspora (Hamann & Harklau, 2015; Hamann, Wortham, & Murillo, 2002) “host newcomers” (Lamphere, et al., 1992) within the common and complex institution of high school.

Covering subjects that span two hundred years, from Columbus’s arrival to the Boston Massacre, from women’s suffrage to Japanese internment, History in the Making exposes the changing values, priorities, and points of view that have framed—and reframed—our past. “Interesting and useful . . . convincingly illustrates how texts change as social and political attitudes evolve.” —Booklist “Students, teachers, and general readers will learn more about the past from these passages than from any single work, however current, that purports to monopolize the truth.” —Ray Raphael, author of Founding Myths

access us history textbook: Teaching Social Studies to Multilingual Learners in High School Mark Newman, Xiaoning Chen, 2021-11-15 Teaching Social Studies to Multilingual Learners in High School: Connecting Inquiry and Visual Literacy to Promote Progressive Learning explores effective strategies for teaching social studies to diverse learners. The centerpiece is a visual literacy framework that integrates inquiry, primary source analysis, and visual literacy to provide a progressive learning sequence to meet the varied needs of learners. The visual literacy framework brings together related aspects of progressive, sequential learning into a cohesive whole. It has an adaptable structure that allows teachers to customize learning activities to meet individual student needs. The progressive learning sequence has varied modes of learning that help teachers move students from basic to proficient to advanced levels of support. The book is organized into two related parts. The first three chapters provide important content and context on social studies, multilingual learner education, and the visual literacy framework. The remaining chapters discuss civics, U.S. history, world history, geography, and economics and social sciences. Each chapter defines the subject area, briefly traces its development as a high school subject over time, and then offers classroom exercises for using the visual literacy framework in these disciplines. The exercises are plotted so that differing levels of the visual literacy framework are explored throughout the book.
