america through the lens exercises: Pope Francis and the Search for God in America

Maria Clara Bingemer, Peter J. Casarella, 2021-06-25 In Tutti Fratelli, Pope Francis has called again for a “culture of encounter,” But how should his theology, pastoral practice, and social message be understood and applied in the Church of the Americas, a single but complex reality that extends from South to North? This volume offers analyses from experts looking back to the Argentine pontiff’s first fateful encuentros in the Americas as a help for understanding the present reality of the Church in the Western Hemisphere. The group includes theologians, historians, and political scientists, and the unique contribution of the volume lies in the panoramic perspective offered by the book as a whole. The initial essays set the stage for the volume as a whole, offering rich insight into Argentine and Latin American history, the world from which the Pope came and to which he returned in 2015, as well as surveying the impact of the Latin American “theology of the people” on the Pope’s visit to the U.S. Additional essays address theological, historical, and pastoral engagements that cut across several of the visits. The final group of essays is dedicated to the visits themselves and is arranged in the order that they occurred. Pope Francis and the Search for God in América is offered to all the members of the Church in América, South and North, old and young, with the hope that it will spur even more thought, reflection, prayer, and service.

america through the lens exercises: *Black Veteranality* Bryon L. Garner, 2025-07-25 How

does military service collide with Black identity in a racially stratified America? Black Veteranality is

an examination of the intersection of race, patriotism, and military service from the perspective of Black veterans, offering a robust framework for reimagining American patriotism and reframing veteran identity. Black veteranality emerges through an interdisciplinary synthesis of W.E.B. Du Bois' foundational concept of double consciousness—the psychological duality Black Americans experience when negotiating racialized identity formations— and Veteran Critical Theory's (VCT's) structural analysis of institutional power dynamics shaping military service members. Through critical ethnography and narrative interviews, this conceptual framework interrogates monolithic veteran narratives by documenting how Black service members simultaneously embody patriotic ideals through military service while confronting systemic racism's psychological toll and navigate what critical race scholars term the White gaze—a hegemonic social mechanism that perpetuates exclusion through perpetual scrutiny of Black veterans' cultural authenticity and national belonging. Essential reading for scholars of African American studies, American studies, veteran studies, and military professions, this work bridges academia and activism, proving true loyalty lies in confronting systemic inequities.

america through the lens exercises: *Latin America Confronts the United States* Tom Long, 2015-11-19 *Latin America Confronts the United States* offers a new perspective on US-Latin America relations. Drawing on research in six countries, the book examines how Latin American leaders are able to overcome power asymmetries to influence US foreign policy. The book provides in-depth explorations of key moments in post-World War II inter-American relations - foreign economic policy before the Alliance for Progress, the negotiation of the Panama Canal Treaties, the expansion of trade through the North American Free Trade Agreement, and the growth of counternarcotics in Plan Colombia. The new evidence challenges earlier, US-centric explanations of these momentous events. Though differences in power were fundamental to each of these cases, relative weakness did not prevent Latin American leaders from aggressively pursuing their interests vis-à-vis the United States. Drawing on studies of foreign policy and international relations, the book examines how Latin American leaders achieved this influence - and why they sometimes failed.

america through the lens exercises: Violence in America Robert Klein, Victor Schermer, 2018-10-11 Violence is a growing problem in American society, and hardly a day goes by that we don't hear about yet another heart-wrenching episode of mass violence. Such events, unfortunately, are only the most public manifestation of violence in America. The full nature and extent of daily violence, the various and pervasive forms it takes, and the enormous social, emotional, moral, and economic consequences that result, remain largely outside of our awareness. More importantly, our ability to identify the root causes and know how best to effectively intervene remains limited. Most investigations in this field have focused on the individual psychodynamic characteristics of the perpetrators. The underlying group dynamic factors that include consideration of broader social, cultural, socioeconomic, and historical variables have received less attention. This volume brings together for the first time a collection of distinguished group psychotherapists, all of whom have been trained to recognize both individual psychodynamic characteristics and group dynamic factors, to apply the lessons learned through years of clinical practice to arrive at a deeper understanding of the etiology, treatment, and prevention of violence. This book was originally published as a special issue of the International Journal of Group Psychotherapy.
