When Patchett chose an early galley of actor and producer Tom Hanks' short story collection to read one night before bed, she had no idea that this single choice would be life changing. It would introduce her to a remarkable woman—Tom's brilliant

assistant Sooki—with whom she would form a profound bond that held monumental consequences for them both. The younger MC was drawn to Juliette's wit and zest for life, and they quickly became friends. Even when careers, marriages, motherhood, moves, and tragedy separated them across decades and continents, their friendship thrived. Then came the day MC saw a shocking photo of Juliette looking exhausted and aged. She pleaded for her friend to visit a doctor, but neither was prepared for the devastating diagnosis: pancreatic cancer. Both women were crushed but determined to make the most of their remaining months together. MC visited Juliette in France and

later Switzerland, where MC agreed to accompany Juliette on her final journey. As the two friends discussed their friendship, lives, and views on death, MC was consumed by doubt. She said that initially she was sorry because she had wanted to be the only student from Sarah Lawrence there. #2 I was always picked to give readings in the coffee shop on Parents' Weekend. ann patchett biography: *There Plant Eyes* M. Leona Godin, 2022-08-30 From Homer to Helen Keller, from Dune to Stevie Wonder, from the invention of braille to the science of echolocation, M. Leona Godin explores the fascinating history of blindness, interweaving it with her own story of gradually losing her sight. “[A] thought-provoking mixture of criticism, memoir, and advocacy. —The New Yorker *There Plant Eyes* probes the ways in which blindness has shaped our ocularcentric culture, challenging deeply ingrained ideas about what it means to be “blind.” For millennia, blindness has been used to signify such things as thoughtlessness (“blind faith”), irrationality (“blind rage”), and unconsciousness (“blind evolution”). But at the same time, blind people have been othered as the recipients of special powers as compensation for lost sight (from the poetic gifts of John Milton to the heightened senses of the comic book hero Daredevil). Godin—who began losing her vision at age ten—illuminates the often-surprising history of both the condition of blindness and the myths and ideas that have grown up around it over the course of generations. She combines an analysis of blindness in art and culture (from King Lear to Star Wars) with a study of the science of blindness and key developments in accessibility (the white cane, embossed printing, digital technology) to paint a vivid personal and cultural history. A genre-defying work, *There Plant Eyes* reveals just how essential blindness and vision are to humanity’s understanding of itself and the

world.
