anti terrorism level 1 certification: Impacts of the Fleet Response Plan on Surface Combatant Maintenance Roland J. Yardley, 2006 To achieve a more responsive and more readily deployable fleet of surface combatants, the Navy adopted the Fleet Response Plan (FRP) in 2003 to replace its traditional ship maintenance and readiness cycle. The goal of the FRP is to have non-deployed ships achieve a high level of readiness earlier and to maintain high readiness longer so that they can deploy on short notice. However, a challenge of implementing the FRP is establishing the processes and procedures, as well as a ready industrial base, to facilitate maintenance planning and execution to meet the now unpredictable FRP surge requirements and maintenance demands. By concentrating specifically on the DDG-51 class of destroyers, the authors of this report look at the effects the FRP has had thus far and determine whether maintenance resources are meeting maintenance demands and whether related industry resources have been coordinated effectively. Overall, the authors determine that the initiative appears to have promising effects but that more time will be needed to assess maintenance supply and demand apart from the increase of funding tied to military operations post-September 11, 2001.

anti terrorism level 1 certification: *Training Model for Contingency Operations* Matthew L. Smith, William T. Holden, Harold M. Starry, 2002 This report documents the process and the products of a study examining training and training support for units involved in deployments for contingency operations. The purpose of this study was to assist U.S. Army leaders and training resource managers to better train units, staffs, leaders and soldiers based on the realities and challenges of the 21st century operational environment. It was completed in support of a specific

request made by the U.S. Army Training and Doctrine Command (TRADOC) for assistance in providing training support to Army ground forces preparing for, participating in, or returning from contingency operations. The study began by surveying the existing body of knowledge concerning U.S. military contingency operations and military deployments conducted in the 1990s. The survey's purpose was to identify and codify full spectrum training and training resource requirements for units participating in contingency operations. The survey's findings were then used to develop an improved training model and associated templates, and to recommend changes in current training policies and procedures. The eight principal recommendations address training strategies, training documentation, resourcing, decision-making, and training management.

anti terrorism level 1 certification: A Short Guide to Customs Risk Catherine Truel, 2017-03-02 The historic growth in world trade, large container ships and information technology have triggered profound changes in international trade. A few years ago, customs officers at the border were meticulously checking goods and documents before releasing a shipment to the trader. A business could be confident that a shipment that had cleared customs complied with all applicable regulations. Today, to reduce congestion and give the trade quick access to their goods, customs have introduced risk management principles and a large number of shipments clear customs automatically. Controls have moved from the border to the trader's premises and it is during site visits that customs officers check the business compliance records. Moving from frontier checks to audit based controls has transferred a high level of responsibility and risk to the trader. It is now the duty of the trader to identify and report any error or irregularity and to keep an impeccable audit trail from initial quotation to receipt of payment. For the business, failing to provide satisfactory compliance records will result in delayed shipments and serious disruption in the supply chain. This will in turn impact on financial performance indicators such as Days in Inventory, Days Sales Outstanding and of course Cash Flow. The business will also have to endure in depth customs audits during which customs officers will inspect each step of the audit trail disrupting day-to-day business operation. Errors uncovered during these audits will yield heavy financial penalties and a customs debt. Ultimately, customs risk will impact on shareholders value. Customs and finance reporting should receive the same level of attention. However, if all companies check carefully their tax returns, only a few check their import or export declarations with the same scrutiny. Managing customs risk is often seen as a cost centre but it is also a source of competitive advantage. A sound customs management can reduce or remove

anti terrorism level 1 certification: United States Code United States, 2013 The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited U.S.C. 2012 ed. As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office--Preface.
