beast academy 1a book: Família: mitos ancestrais e crise da maternidade - 1a Ed - 2025 Fernanda Las Casas, 2025-09-17 O livro Família: Mitos Ancestrais e Crise da Maternidade, de Fernanda Las Casas, aborda a história do papel das mulheres no projeto parental ao longo dos tempos, analisando desde a Pré-História até a contemporaneidade no Brasil, desconstruindo mitos sobre a natureza da vulnerabilidade feminina e questionando o lugar da mulher na família e na sociedade. O texto demonstra que a percepção da vulnerabilidade feminina é construída socialmente, não sendo um traço biológico imutável. Nas análises históricas, verifica-se que as narrativas sobre a Pré-História foram criadas majoritariamente por estudiosos homens, com base em poucas evidências e muita subjetividade, reforçando uma visão de mulheres frágeis e relegadas ao cuidado, enquanto os homens eram representados como caçadores e provedores, protagonista das sociedades humanas. O livro argumenta que a vulnerabilidade feminina é incidental (contextual, não essencial) e deriva de construções sociais, jurídicas e culturais alimentadas por mitos ancestrais travestidos de verdades biológicas. Mais ainda, afirma que as conquistas legais e sociais das mulheres não foram suficientes para superar as desigualdades, e a maternidade passou a ser questionada diante da divisão desigual do trabalho de cuidado, da baixa valorização do trabalho doméstico e da persistência do abandono paterno. O livro ao abordar a construção de Mitos Ancestrais que permeiam os relacionamentos humanos, esclarece como se deu a construção de estereótipos de gênero bem como o desdobramento na divisão sexual do trabalho, consequências que impactam a vida de homens e mulheres, reverberando em suas famílias e em processos judiciais. A análise reforça a necessidade de reconhecer a incidência histórica e estrutural da vulnerabilidade feminina no projeto parental como socialmente construída e possível de ser alterada de acordo com os avanços sociais, jurídicos e culturais. Essas guestões, aprofundadas no livro, fundamentam-se em um recorte interdisciplinar (Direito, Sociologia, Antropologia, História, Psicologia) e defendem a superação dos mitos ancestrais para promover igualdade e justiça nas relações familiares e de gênero.
