aswath damodaran lectures: The Blue Cascade Mike Scotti, 2012-05-15 In this searing and beautifully written memoir, Marine Lieutenant and CNN Op-Ed contributor Mike Scotti charts a course from the front lines of Iraq back home to New York, showing how sometimes the hardest battle is the one after the war. Sometimes the hardest battle is the one after the war. As one of the soldiers on the front line of Operation Iraqi Freedom, Lieutenant Scotti was taught that weakness is what gets you killed: no hesitation, focus your energies on your objective, and complete the mission. Upon returning from war, Scotti approached his new life the same way. He ignored the creeping depression and numbness he called The Blue Cascade and charged ahead toward his goal to get an MBA, secure a high-paying finance job, and retire young and rich. But he was being eaten away inside, and scenes of drunken emotion and raging violence were becoming more and more frequent. Years after returning from active combat, he eventually found himself contemplating suicide. Through a series of powerful events, Scotti was ultimately able to find a path to healing and begin his journey back to life, finally emerging with the following wisdom for fellow sufferers of post-traumatic stress: It's ok if you are not ok.

aswath damodaran lectures: *The Best Writing on Mathematics 2018* Mircea Pitici, 2018-12-04 The year's finest mathematical writing from around the world This annual anthology brings together the year's finest mathematics writing from around the world. Featuring promising new voices alongside some of the foremost names in the field, *The Best Writing on Mathematics 2018* makes available to a wide audience many pieces not easily found anywhere else—and you don't need to be a mathematician to enjoy them. These essays delve into the history, philosophy, teaching, and everyday aspects of math, offering surprising insights into its nature, meaning, and practice—and taking readers behind the scenes of today's hottest mathematical debates. James Grime shows how to build subtly mischievous dice for playing slightly unfair games and Michael Barany traces how our appreciation of the societal importance of mathematics has developed since World War II. In other essays, Francis Su extolls the inherent values of learning, doing, and sharing mathematics, and Margaret Wertheim takes us on a mathematical exploration of the mind and the world—with glimpses at science, philosophy, music, art, and even crocheting. And there's much, much more. In addition to presenting the year's most memorable math writing, this must-have anthology includes an introduction by the editor and a bibliography of other notable pieces on mathematics. This is a must-read for anyone interested in where math has taken us—and where it is headed.
