ashok kumar homeland security book: Pariah Politics Shamit Saggat, 2010-12-02 Pariah Politics breaks new ground in examining the issue of western Islamist extremism from the perspective of government. It links underlying causes to the capacity of governments to respond directly and to influence others. The book contains four main messages. Focusing on causes, not symptoms. The book identifies four big causal drivers: settled disadvantage, social isolation, grievance and oppositional cultures, and the volatile dynamics of global Islam. Governments can hope to influence the first two, using existing and innovative policy levers. The scope to make big changes in the latter two is severely limited. The circle of tacit support. Action by government to counter terrorism has relied too heavily on security policy measures to intercept or disrupt men of violence. This emphasis is misplaced. Though important, this fails to address the moral oxygen for violence and confrontation that exists within Muslim communities. Better focus and better levers. Ministers and officials need to think and act smart. They need to push ahead with social inclusion policies to broaden opportunity. They need to make more use of community-based strategies to isolate extremism. They need to promote civil society actions so that affected communities can take control of their own reputational future. And, they desperately need to avoid making things worse. Reputations matter. The pariah status of western Muslims has worsened by the fallout from terrorism. Few have anything good to say about western Muslims; still fewer can imagine an optimistic future. Yet earlier demonised groups, such as Jews or Asian refugees, have overcome significant hurdles, moving from pariahs to paragons. A credible willingness to tackle extremism is the most important first step to a reputational turnaround.

ashok kumar homeland security book: Chinese Americans Jonathan H. X. Lee, 2015-11-12
This in-depth historical analysis highlights the enormous contributions of Chinese Americans to the professions, politics, and popular culture of America, from the 19th century through the present day. While the number of Chinese Americans has grown very rapidly in the last decade, this group has long thrived in the United States in spite of racism, discrimination, and segregation. This comprehensive volume takes a global view of the Chinese experience in the Americas. While the focus is on Chinese Americans in the United States, author Jonathan H. X. Lee also explores the experiences of Chinese immigrants in Canada, Mexico, and South America. He considers why the Chinese chose to leave their home country, where they settled, and how the distinctive Chinese American identity was formed. This volume is organized into four sections: historical overview; political and economic life; cultural and religious life; and literature, the arts, and popular culture. Detailed essays capture the essence of everyday life for this immigrant group as they assimilated, established communities, and interacted with other ethnic groups. Alphabetically arranged entries describe the political, social, and religious institutions begun by Chinese Americans and explores their roles as business owners, activists, and philanthropic benefactors for their communities.

ashok kumar homeland security book: FOOD SECURITY IN INDIA S. Ramaswamy, L. Surulivel, 2019-06-06 Chapter - I Introduction, Chapter - II Food Security: Inter and Intranational Perspectives, Chapter - III Concepts, Theories and Food Security Aspects, Chapter - IV Profile of the Study Area, Chapter - V Food Security among Socially Excluded Communities in Rural Tamil Nadu, Chapter - VI Summary of Major Findings and Conclusion, References The right to food and freedom from hunger re-emerged during 1990s. The historical World Food Summit was held in Rome in 1996, in which 185 countries participated and signed the 'Rome Declaration on World Food Security' which reaffirmed the right of everyone to have access to safe and nutritious food. Consequently, the right to adequate food is recognized as a fundamental human right. The world communities, further pledged in 2000 to cut the number of the world's hungry people to half between 1990 and 2015, as one of the Millennium Development Goals (United Nations, 2008). Food security is an important means to realize the right to food. It means the assured access to adequate food to all members of the household throughout the year. The Nobel Laureate, Amartya Sen (1981) has suggested a framework of food entitlement in order to understand the genesis of hunger and the access to food. According to him, own production, stored wealth, employment, kinship and government transfers are all possible sources of food entitlement. Food security as defined by Food and Agriculture Organisation of the United Nations (FAO, 2005) "exists when all people, at all times, have physical, social and economic access to sufficient, safe and nutritious food that meets their dietary needs and food preference for an active and healthy life". Household food security is the application of this concept to the family level, with individuals within the households as the focus of concern. India has been witnessing the phenomenon of erratic monsoon consistently. It has serious implications on the food sufficiency and food security of the country. Poor monsoons also affect the welfare of people in terms of availability of drinking water and employment opportunities. Studies on food security have not been carried out in Rural Tamil Nadu by academic and specialized research institutions.

ashok kumar homeland security book: India and Pakistan Duncan McLeod, 2008 Are India and Pakistan rivals or enemies? Duncan McLeod theorizes the levels and culture of violence between India and Pakistan since partition and independence in 1947, moving the debate away from historical reiteration to instead theorize on the nature and culture of violence between these two states.
