board basics reddit: Russian Nazi Troll Bots! The Busy Person's Guide to How Trump's Trolls Won the Internet, What's Ahead, and What You Can Do Eric Saeger, 2018-08-07 It's beyond dispute that trolls and automated bots helped Donald Trump win the White House in 2016. Some of the troll operations involved were based in Russia, but domestic interests also participated in the invasion. In fact, trolls of all types, from all corners of the internet, came together in a perfect storm of propaganda, disinformation, and political dissent. The confusion wrought by the multi-pronged troll invasion still affects our online spaces today, leaving many questions unanswered. Who are the trolls? What do they want? How do they operate? Why couldn't our intelligence agencies put a stop to Russian and right-wing trolling? Can trolling be stopped? And what's with all the freakin' Nazis? One thing is certain: the troll invasions wouldn't have succeeded if America hadn't been divided on many pressing issues. Deep cultural woes, such as racism, our New Generation Gap, and the slow destruction of the middle class, were part of the toxic environment that allowed trolls to flourish. This book - the first from software expert, award-winning internet troll and long-time underground-culture fixture Eric Saeger - examines all these issues with an impartial eye. The limitations and realities of current technology are explained in clear, simple language, revealing the tactics of everyday trolls and describing how future technology promises to make the internet a safe, livable place for everyone. Most important of all, along the way, you'll see the humor in our dire but salvageable situation. Once we understand the invaders, we'll no longer fear RUSSIAN NAZI TROLL BOTS!

board basics reddit: Them Before Us Katy Faust, Stacy Manning, 2021-02-23 Them Before Us has flipped the script on adult-centric attitudes toward marriage, parenthood, and reproductive technologies by framing these issues around a child's right to be raised by both their mother and father. Set against a backdrop of sound research, the compelling stories throughout each chapter confirm that a child's mental, physical, and emotional well-being depends on being loved by the two people responsible for their existence. It's a paradigm shift that will impact the personal and the political, and reframe every marriage and family conversation across the globe. Them Before Us dispels many prevalent, harmful myths concerning children's rights, such as: • Kids need only love and safety—moms and dads are optional. • Love makes a family—biology is irrelevant. • Marriage is about adults—it has nothing to do with kids. • Children are resilient and will “get over” divorce. • Studies show “no difference” in outcomes for kids with same-sex parents. • Sperm and egg donor kids are fortunate because they are so wanted. • Surrogacy is a great way to help wannabe parents have a baby. • Reproductive technologies are just like adoption. Are you tired of a culture that views adults as victims in family matters, when it's clear that kids are the ones who truly pay the price? If so, we are your people, and this is your movement.

board basics reddit: We, the Data Wendy H. Wong, 2023-10-10 A rallying call for extending human rights beyond our physical selves—and why we need to reboot rights in our data-intensive world. Winner of the 2024 Balsillie Prize for Public Policy Shortlisted, 2024 Lionel Gelber Prize Our data-intensive world is here to stay, but does that come at the cost of our humanity in terms of autonomy, community, dignity, and equality? In *We, the Data*, Wendy H. Wong argues that we cannot allow that to happen. Exploring the pervasiveness of data collection and tracking, Wong reminds us that we are all stakeholders in this digital world, who are currently being left out of the most pressing conversations around technology, ethics, and policy. This book clarifies the nature of datafication and calls for an extension of human rights to recognize how data complicate what it means to safeguard and encourage human potential. As we go about our lives, we are co-creating data through what we do. We must embrace that these data are a part of who we are, Wong explains, even as current policies do not yet reflect the extent to which human experiences have changed. This means we are more than mere “subjects” or “sources” of data “by-products” that can be harvested and used by technology companies and governments. By exploring data rights, facial recognition technology, our posthumous rights, and our need for a right to data literacy, Wong has crafted a compelling case for engaging as stakeholders to hold data collectors accountable. Just as the Universal Declaration of Human Rights laid the global groundwork for human rights, *We, the Data* gives us a foundation upon which we claim human rights in the age of data.
