bobby joe long confession: *Sexual Murder* Louis B. Schlesinger, 2021-03-22 Sexual Murder: Catathymic and Compulsive Homicides is the culmination of the author's 45 years of experience with, and studying, sexually motivated homicide. Sexual murders are generally of two types — catathymic and compulsive. Catathymic homicides are caused by a breakthrough of underlying sexual conflicts. They can be unplanned, explosive (acute) attacks or planned murders stemming from a chronic obsession with, or disturbed attachment to, the victim. In compulsive homicides, a fusion of sex and aggression results in a powerful internal drive which pushes the offender to seek out victims to kill — and the killing itself is sexually gratifying. These murders also may be planned or unplanned. In compulsive homicides that are unplanned, the urge breaks through and disrupts the offender's controls when a victim of opportunity crosses his path. The compulsive offender who plans his crimes often eludes law enforcement, and as a result he can have multiple (serial) victims over extended periods of time. Both forms of sexual murder — the catathymic and the compulsive — are presented in this volume from a clinical-descriptive perspective encompassing case studies with analysis. Recent advances in empirical research in sexual murder—including findings from the joint research project between John Jay College of Criminal Justice and the FBI Behavioral Analysis Unit in Quantico—has published many important studies. These include such topics as necrophilia, foreign object insertions in sexual homicide, ritual and signature and temporal patterns in serial sexual homicide, mass murder, crime scene staging in homicide, and undoing (symbolic reversal) at homicide scenes. All such research will be included and incorporate into this fully updated Second Edition, including approximately fifty new clinical case studies.

bobby joe long confession: *Criminal* Tom Gash, 2016-05-05 The way we see and understand crime falls into two types of story that, in essence, have been told and retold many times throughout human history - in fiction, as in fact. Criminality is either a selfish choice, an aberration; or a forced choice, the product of social factors. These two stories continue to dominate both our views of and responses to crime. And, says Tom Gash, they are completely wrong. In seeking to dispel the myths that surround and inform our views of crime, *Criminal* argues that our obsession with 'big arguments' about crime's causes can lead us to mistake individual cases as proof of universal rules.

How, he asks, can we suspend our knee-jerk reactions, and begin to understand crime for what it is: as a risk that can be managed and reduced.

bobby joe long confession: Extreme Killers Michael Newton, 2021-07-13 For fans of true crime, this fourth entry in the Profiles in Crime series presents history's most "elite" serial killers—master murderers who stretched the psychic envelope and racked up the largest number of victims. Historical in scope and international in breadth, this collection of true-crime stories chronicles 15 of the most infamous "extreme killers" who ever lived—those with the largest number of confirmed kills, in many cases more than 50. The subjects range from 15th-century French child killer Gilles de Rais, purportedly the model for the folk legend of "Bluebeard," to Henry Lee Lucas and Otis Toole, who inspired the film *Henry: Portrait of a Serial Killer*; to Samuel Little, America's most prolific serial killer with 60 confirmed and 93 claimed murdered, to Mikhail Popkov, dubbed "The Werewolf" by Russian media for having slain more than 70 women between 1992 and 2010.

bobby joe long confession: A Wilderness of Error Errol Morris, 2012-09-04 Academy Award-winning filmmaker and former private detective Errol Morris examines the nature of evidence and proof in the infamous Jeffrey MacDonald murder case. Early on the morning of February 17, 1970, in Fort Bragg, North Carolina, Jeffrey MacDonald, a Green Beret doctor, called the police for help. When the officers arrived at his home they found the bloody and battered bodies of MacDonald's pregnant wife and two young daughters. The word "pig" was written in blood on the headboard in the master bedroom. As MacDonald was being loaded into the ambulance, he accused a band of drug-crazed hippies of the crime. So began one of the most notorious and mysterious murder cases of the twentieth century. Jeffrey MacDonald was finally convicted in 1979 and remains in prison today. Since then a number of bestselling books—including Joe McGinniss's *Fatal Vision* and Janet Malcolm's *The Journalist and the Murderer*—and a blockbuster television miniseries have told their versions of the MacDonald case and what it all means. Errol Morris has been investigating the MacDonald case for over twenty years. *A Wilderness of Error* is the culmination of his efforts. It is a shocking book, because it shows us that almost everything we have been told about the case is deeply unreliable, and crucial elements of the case against MacDonald simply are not true. It is a masterful reinvention of the true-crime thriller, a book that pierces the haze of myth surrounding these murders with the sort of brilliant light that can only be produced by years of dogged and careful investigation and hard, lucid thinking. By this book's end, we know several things: that there are two very different narratives we can create about what happened at 544 Castle Drive, and that the one that led to the conviction and imprisonment for life of this man for butchering his wife and two young daughters is almost certainly wrong. Along the way Morris poses bracing questions about the nature of proof, criminal justice, and the media, showing us how MacDonald has been condemned, not only to prison, but to the stories that have been created around him. In this profoundly original meditation on truth and justice, Errol Morris reopens one of America's most famous cases and forces us to confront the unimaginable. Morris has spent his career unsettling our complacent assumptions that we know what we're looking at, that the stories we tell ourselves are true. This book is his finest and most important achievement to date.

bobby joe long confession: The Brain Defense Kevin Davis, 2017-02-28 Called "the best kind of nonfiction" by Michael Connelly, this riveting new book combines true crime, brain science, and courtroom drama. In 1991, the police were called to East 72nd St. in Manhattan, where a woman's body had fallen from a twelfth-story window. The woman's husband, Herbert Weinstein, soon confessed to having hit and strangled his wife after an argument, then dropping her body out of their apartment window to make it look like a suicide. The 65-year-old Weinstein, a quiet, unassuming retired advertising executive, had no criminal record, no history of violent behavior—not even a short temper. How, then, to explain this horrific act? Journalist Kevin Davis uses the

perplexing story of the Weinstein murder to present a riveting, deeply researched exploration of the intersection of neuroscience and criminal justice. Shortly after Weinstein was arrested, an MRI revealed a cyst the size of an orange on his brain's frontal lobe, the part of the brain that governs judgment and impulse control. Weinstein's lawyer seized on that discovery, arguing that the cyst had impaired Weinstein's judgment and that he should not be held criminally responsible for the murder. It was the first case in the United States in which a judge allowed a scan showing a defendant's brain activity to be admitted as evidence to support a claim of innocence. The Weinstein case marked the dawn of a new era in America's courtrooms, raising complex and often troubling questions about how we define responsibility and free will, how we view the purpose of punishment, and how strongly we are willing to bring scientific evidence to bear on moral questions. Davis brings to light not only the intricacies of the Weinstein case but also the broader history linking brain injuries and aberrant behavior, from the bizarre stories of Phineas Gage and Charles Whitman, perpetrator of the 1966 Texas Tower massacre, to the role that brain damage may play in violence carried out by football players and troubled veterans of America's twenty-first century wars. The Weinstein case opened the door for a novel defense that continues to transform the legal system: Criminal lawyers are increasingly turning to neuroscience and introducing the effects of brain injuries—whether caused by trauma or by tumors, cancer, or drug or alcohol abuse—and arguing that such damage should be considered in determining guilt or innocence, the death penalty or years behind bars. As he takes stock of the past, present and future of neuroscience in the courts, Davis offers a powerful account of its potential and its hazards. Thought-provoking and brilliantly crafted, *The Brain Defense* marries a murder mystery complete with colorful characters and courtroom drama with a sophisticated discussion of how our legal system has changed—and must continue to change—as we broaden our understanding of the human mind.
