black leaders: *We Have No Leaders* Robert C. Smith, 1996-09-26 CHOICE 1997 Outstanding Academic Books This is the first comprehensive study of African American politics from the end of the 1960s civil rights era to the present. Not an optimistic book, it concludes that the black movement has been almost wholly encapsulated into mainstream institutions, co-opted, and marginalized. As a result, the author argues, African American leadership has become largely irrelevant in the development of organizations, strategies, and programs that would address the multifaceted problems of race in the post-civil rights era. Meanwhile, the core black community has become increasingly segregated, and its society, economy, culture, and institutions of governance and uplift have decayed. In exhaustive detail Smith traces this sad state of affairs to certain internal attributes of African American political culture and institutional processes, and to the structure of American politics and its economic and cultural underpinnings. Sure to be controversial, this book challenges both liberal and conservative notions of the black political struggle in the United States. It will serve as a major reference for academic study and a point of departure for political activists.

black leaders: Black Leaders and Ideologies in the South Preston King, Walter Earl Fluker, 2013-09-13 A new collection of philosophical biographies of key figures in Black Southern American social and political thought Frederick Douglass, Booker Washington and Ida Wells. Thurgood Marshall and Martin King are focused upon, together with Howard Thurman, Richard Wright, Fred Gray and Barbara Jordan. All are important in various ways to the movements this book seeks out. From the perspective of liberation, the two high points in the African-American Odyssey are marked by Emancipation in the nineteenth century and Desegregation in the twentieth. Douglass bestriding the first, King and Marshall the second. The thread of resistance runs through most of these philosophical profiles, and the thread of non-violence, with greater or less force, also runs throughout. This volume assumes a distinction between (a) an earlier period when Afro-America was more cohesive and collectively committed to self-improvement despite the odds, and (b) the contemporary period, beyond desegregation, marked by rates never previously rivaled of suicide, joblessness, imprisonment, despair and alienation, especially among black poor. The life stories and philosophies presented here make fascinating reading. This book is a Special Issue of the leading journal, *Critical Review of International Social and Political Philosophy*.

black leaders: African American Leadership Ronald W. Walters, 1999-01-01 Written by two preeminent scholars of the subject, this book provides a panoramic view of the theory, research, and praxis of African American leadership. Walters and Smith offer a great deal to students of black leadership, as well as important strategy and policy recommendations for black leaders. The book first presents a comprehensive assessment of the social science research literature on black leadership. It finds that older studies (1930s to 1960s) dealt with the nascent formation of leadership theory, where blacks were located predominantly in the context of southern politics and had to adopt a conservative to moderate leadership style. The authors also review and evaluate research on black leadership from the 1970s to the present and suggest attention be given to studies of leadership that involve community level leadership, female leaders, black mayors, and black conservatives. *African American Leadership* also focuses on the practice of black leadership.

black leaders: Black Leaders on Leadership P. Leffler, 2014-12-04 Drawing on a wealth of oral interviews, *Conversations on Black Leadership* uses the lives of prominent African Americans to trace the contours of Black leadership in America. black leaders: *The Rise and Fall of Modern Black Leadership* Nelson, H. Viscount 'Berky', 2003-05-13 *The Rise and Fall of Modern Black Leadership* is designed to show how black leaders

responded to the omnipresent racism of twentieth century America. Although the efforts of black leadership eventually succeeded in eradicating de jure discrimination and brought the nation closer to realizing the idealized tenets of American democracy, their achievements occurred at a cost to their influence as leaders of the entire race. Synopses appear on the lives of the influential men and women who comprised the leadership cadre so that readers can understand the motives underlying leadership goals, and comprehend why the lofty objectives of the Civil Rights Movement remain unfulfilled.

The book also suggests a theoretical framework for future research on the impact of Black leadership in America. A wide range of issues are considered in this volume, beginning with the definition of leadership and the concept of Black leadership. black leaders: African Canadian Leadership Erica S. Lawson, Philip S.S. Howard, 2019-08-25 Challenging the myth of African Canadian leadership in crisis, this book opens a broad vista of inquiry into the many and dynamic ways leadership practices occur in Black Canadian communities. Exploring topics including Black women's contributions to African Canadian communities, the Black Lives Matter movement, Black LGBTQ, HIV/AIDS advocacy, motherhood and grieving, mentoring, and anti-racism, contributors appraise the complex history and contemporary reality of blackness and leadership in Canada. With Canada as a complex site of Black diasporas, contributors offer an account of multiple forms of leadership and suggest that through surveillance and disruption, practices of self-determined Black leadership are incompatible with, and threatening to, White structures of power in Canada. As a whole, African Canadian Leadership offers perspectives that are complex, non-aligned, and in critical conversation about class, gender, sexuality, and the politics of African Canadian communities.

black leaders: Introduction to African American Studies Talmadge Anderson, James Benjamin Stewart, 2007 There is an ongoing debate as to whether African American Studies is a discipline, or multidisciplinary or interdisciplinary field. Some scholars assert that African American Studies use a well-defined common approach in examining history, politics, and the family in the same way as scholars in the disciplines of economics, sociology, and political science. Other scholars consider African American Studies multidisciplinary, a field somewhat comparable to the field of education in which scholars employ a variety of disciplinary lenses-be they anthropological, psychological, historical, etc., --to study the African world experience. In this model the boundaries between traditional disciplines are accepted, and researches in African American Studies simply conduct

discipline based on an analysis of particular topics. Finally, another group of scholars insists that African American Studies is interdisciplinary, an enterprise that generates distinctive analyses by combining perspectives from d

black leaders: Contours of African American Politics Georgia A. Persons, 2014-03-31 Contours of African American Politics chronicles the systematic study of African American politics and its subsequent recognition as an established field of scholarly inquiry. African American politics emanates from the demands of the prolonged struggle for black liberation and empowerment. Hence, the study of African American politics has sought to track, codify, and analyze the struggle that has been mounted, and to understand the historic and changing political status of African Americans within American society. The notion of a post-racial America is one that was birthed by the election of Barack Obama as the first African American president of the United States. However, another reality is equally compelling: that for some time now, many African American aspirants for elective office have run against race-specific issues, putting individual desires to win office above the conventionally defined collective interests of black folk. Clearly, the Obama presidential election crystallized a complexity of change that had been underway in America prior to his election. Indeed, did the Obama election signal the end of black politics? Does race remain a useful construct for framing the collective interests of African Americans? Volume III of Contours of African American Politics examines all of these questions in an effort to understand the more poignant question of the future of that which we have known as black politics.

black leaders: Reflections on Leadership Richard A. Couto, 2007-04-26 In Reflections on Leadership fifteen prominent leadership scholars pay tribute to James MacGregor Burns's book, Leadership, a classic in the field of leadership studies.
