c by discovery 4th edition: *Discovering the North-West Passage* Glenn M. Stein, 2015-10-14 From 1850 to 1854, the ambitious Commander Robert McClure captained the HMS Investigator on a voyage in search of the missing Franklin Expedition, which sailed from England into the Arctic in 1845 to map the last uncharted section of the North-West Passage. The Investigator and her consort the Enterprise were to pass through the Bering Strait from the west but a Pacific storm separated them, never to meet again. Obsessed with traversing the passage, McClure pressed on and HMS Investigator spent three years trapped in pack ice in Mercy Bay before the crew abandoned ship on foot. This book chronicles the voyage in detail. McClure and his relationships with his officers are at the heart of the story of the arduous journey, vividly illustrated by the paintings of Lt. Samuel Cresswell.

January 2015 Cumulative Pocket Part The Litigation Handbook On West Virginia Rules of Civil Procedure - Fourth Edition provides a meaningful and thorough starting point for any practitioner seeking a fundamental understanding of the application of the West Virginia rules of civil procedure. For ease and convenience, the material in this new Handbook has been organized to correspond with actual rule citations. For example, § 12(b)(6) of the Handbook corresponds with Rule 12(b)(6) of the rules of civil procedure. Therefore, if a practitioner knows the particular rule citation under consideration, he or she need only find the corresponding section citation in this Handbook for a discussion of the particular rule. The Fourth Edition cites per curiam opinions issued by the state Supreme Court and also provides federal case law construing the federal rules of civil procedure. As the practitioner knows, West Virginia's rules of civil procedure are patterned after the federal rules. With this knowledge in mind, the Handbook offers as persuasive authority federal decisions construing the federal rules. As a practical matter, the Handbook limits its use of federal case law to areas that the state Supreme Court has not issued controlling opinions upon. This Handbook is an invaluable tool for both the bench and bar. Order Litigation Handbook on West Virginia Rules of Civil Procedure Fourth Edition for your office today!

c by discovery 4th edition: Vitamin C Stephen M. Sagar, 2022-08-15 Vitamin C: A 500-Year Scientific Biography from Scurvy to Pseudoscience is the compelling story of the history and science behind vitamin C. Vitamin C begins with scurvy, which afflicted Europe for four hundred years and killed millions. The reasons that a disease whose cure was known from the outset persisted over that time are at once baffling and familiar, and these trials eventually lead to invention of the science of epidemiology. Author Stephen M. Sagar MD then chronicles the discovery of vitamins at the beginning of the twentieth century, a story that encapsulates the rise of a scientific approach to nutrition but with surprising twists and turns. As vitamin science became more acquainted with the mainstream, scientist Linus Pauling reached new heights of fame and influence by popularizing the practice of taking megadoses of vitamin C to prevent colds - a claim that was not necessarily backed by data. This kickstarted the growth of the \$40 billion vitamin and supplement industry, which has since prospered all while ignoring science. This unique and engrossing narrative reveals how medical science functions in the real world and how it has changed over the centuries. Featuring swashbuckling sailors, arctic explorers, penny-pinching bureaucrats, academicians with clashing egos, and intrepid scientists working in malaria-infested jungle laboratories, the story of C is in many ways the story of how science gets done (and undone). From the trial and error of early explorers to the scientific breakthroughs made by biochemists and the birth of the modern supplement industry, this revelatory book tells the story of how cherished beliefs, self-interest, and politics often intertwine with scientific progress.

drawn from a variety of settings around the world. Many articles are recent and report contemporary developments in dental care. The intended audience includes dental students and practitioners, those engaged in dental research and other health care professionals. For students and tutors, it covers the undergraduate curriculum, and the exercises and solutions make it ideal for course use. For practitioners and researchers it provides the first principles of study design, accessing the dental literature, and the preparation and publication of original dental research.

c by discovery 4th edition: **Coming Out of the Classroom Closet** Karen M Harbeck, 2014-03-05 This landmark book empowers educators to become visible, positive influences and role models for gay and lesbian students in their classrooms and schools. As most homosexual educators, and even students, remain invisible due to possible hostilities of "coming out," this eye-opening book presents recent research to help gay and lesbian teachers break their silence. It encourages them to speak out on issues of homosexuality where curricula, civil rights, personal freedoms, and social entitlements are concerned. It promotes the development of school-based intervention for gay, lesbian, and bisexual students. While the controversy over education and homosexuality is one of the most personally threatening in this nation's history, the timely research presented in Coming Out of the Classroom Closet will hearten gay and lesbian educators to continue to strive for fair treatment as peers and for equal representation in educational materials. Pointing to reports of greater social support and legal protection than is assumed by most in the educational system, this book should be required reading for all persons concerned about continuing to provide high-quality education at all levels--college and university, secondary, and even elementary. Chapters of Coming Out of the Classroom Closet look closely at many issues surrounding the issue of homosexuality in schools, including a history of treatment of gay and lesbian educators and their legal rights; effects of internalized homophobia on homosexual educators; gay and lesbian student's perceptions of their counselors and teachers ability to understand and help; beliefs, lack of knowledge, and lack of training of counselors and teachers about the needs of gay and lesbian youth; images of gays and lesbians in sexuality and health textbooks; important AIDS education; and the issue of homophobia.
