clark creative education review: **Science and Drama: Contemporary and Creative Approaches to Teaching and Learning** Peta J White, Jo Raphael, Kitty van Cuylenburg, 2021-12-03 This edited volume presents interdisciplinary and transdisciplinary approaches to drama and science in education. Drawing on a solid basis of research, it offers theoretical backgrounds, showcases rich examples, and provides evidence of improved student learning and engagement. The chapters explore various connections between drama and science, including: students' ability to engage with science through drama; dramatising STEM; mutuality and inter-relativity in drama and science; dramatic play-based outdoor activities; and creating embodied, aesthetic and affective learning experiences. The book illustrates how drama education draws upon contemporary issues

and their complexity, intertwining with science education in promoting scientific literacy, creativity, and empathetic understandings needed to interpret and respond to the many challenges of our times. Findings throughout the book demonstrate how lessons learned from drama and science education can remain discrete yet when brought together, contribute to deeper, more engaged and transformative student learning.

clark creative education review: Children's Creative Inquiry in STEM Karen Janette Murcia, Coral Campbell, Mathilda Marie Joubert, Sinead Wilson, 2022-04-05 This edited volume brings together international research that explores children's creativity in STEM inquiry. It takes the position that creativity is relevant in all aspects of life and is essential for adaptable and innovative thinking. The research informed content of the book, highlights both challenges and opportunities for growing children's creativity. The book focuses on fostering children's creativity and natural curiosity in the world around them through STEM inquiry. Through STEM inquiry, children are learning through a cross- disciplinary approach where they apply concepts from multiple fields as they are thinking creatively, problem solving and constructing solutions. Educators play a critical role in encouraging children's creativity by modelling creativity, providing creative projects for children and importantly, establishing rich culturally connected environments where children have the resources, conditions and opportunities for acting and thinking creatively. The book provides a lens for looking at children's creativity in a range of different cultural settings. It offers insight and guidance to future research and will build educators' capacity for developing children's creative practices.

clark creative education review: **Critical and Creative Research Methodologies in Social Work** Lia Bryant, 2016-03-09 Social work research is concerned with complex social issues closely connected to communities of people who are marginalized and oppressed. This volume develops critical and creative research methodologies that place questions of social justice at their centre and take innovative approaches to collecting, analysing, interpreting and presenting research data. The first section of the book examines textual data produced from an array of methodologies focused on the spoken and/or written word. These approaches allow those who are often silenced to speak by providing space and time to capture memory and meanings that may not come to light in a time driven structured research method like an interview or a questionnaire. The second section of the book discusses visual methods, including an examination of historical artefacts like, photographs and objects, and participant engagement with art, specifically clay sculpture and drawings. Both sets of methods examine the concept of 'time', that is, how we understand time, as in our past memories, how we develop relationships and knowledge over time. These creative and critical methods provide new insights into ways of undertaking social research in social work which captures the complexity of social experiences, problems and meanings that are, more often than not, embedded in time and place.

clark creative education review: *Underachievement in Gifted Education* Kristina Henry Collins, Javetta Jones Roberson, Fernanda Hellen Ribeiro Piske, 2023-08-30 This book provides an opportunity for researchers, professionals, and practitioners working directly with gifted individuals to engage with and examine the concept of underachievement of highly capable and talented individuals from different perspectives. Chapters written by experts in gifted education from diverse backgrounds explore underachievement in principle, illuminate underachievement as a response to written and unwritten policy and practice, showcase ranges of intellectual capability outside of traditional academic subjects, shift deficit views of not meeting rigid expectations to honoring interests and cultural values of the individual, and provide suggested and proven practices and services as solutions to bridge the gaps in achievement and performance for gifted and talented

students. Expertly blending theory with practice, *Underachievement in Gifted Education* is a must read for all practitioners, educators of gifted individuals, and researchers seeking more opportunities to help students align how they choose to exhibit their talent and efforts with external and internal expectations, personal interests, and cultural values to reach their maximum potential.

clark creative education review: Creations David H Cropley, 2025-03-25 This edited book explores creative products (i.e. Creations) as part of the seven C's of creativity framework. Through nine chapters, leading scholars in the field explore five different domains (education, crime/terrorism, music, science and engineering) addressing the nature of the creations in each given domain, and the criteria by which creations in that domain are judged. Drawing together key, underpinning concepts from the science of creativity, the book delves into the history of creativity research applied to products to then explore new concepts that are impacting on research, especially the role of artificial intelligence in supporting the development and assessment of creative products.
