The killings have the mark of Vampire all over them, and Rowan warns Clive to keep his people in line—or she'll mete out her own brand of justice. Though her dealings with Clive are adversarial, Rowan is intensely aware of her attraction to him. But she can't let it distract her from her duty—to find and battle the killer before more women die. **BLADE TO THE KEEP** Rowan Summerwaite is the only person who can renegotiate the fragile Treaty between the Vampire Nation and the Hunter Corporation, the last line of defense for humanity. A meeting of the Joint Tribunal sends Rowan to the last place she wants to be—The First's Keep. Eliminate the Vampire who attacked her. But as the team is hit with wave after wave of attacks, the tensions between Clive Stewart and a rival Vampire ramp up, with Rowan the woman in the middle. She's not used to being claimed, and Clive is everything she shouldn't want in a man, but she's past denying she's in love. In contrast to the uneven footing falling in love has given her, Rowan is utterly certain she'll locate her quarry. Strong, powerful and connected to the Goddess, she burns with the light of her mission. There's a war brewing, and Rowan will fight it to the death. It's what she was born to do. **AT BLADE'S EDGE** Though she'd hoped the deadly events in Venice would end the threat to the Treaty she's sworn to protect, Rowan found evidence of a grander conspiracy—to destroy the fragile peace that holds humans, Vampires and those with magic back from war. People try to kill Rowan all the time, but when those she cares for are at risk—including her new husband, Scion Clive Stewart—she gets angry. The organization that once gave her a purpose has betrayed her. Now, instead of on a much-anticipated honeymoon, Rowan is in London, gathering allies and evidence. Whatever she needs to drive out the rot within Hunter Corp. and expose whoever is at the top. Rowan is a predator and this threat is prey. She'll burn it down and salt the earth afterward. On her terms.

Her adventures in getting over take her from San Francisco to New York City, from dyke bars to telemarketing outfits, casinos to free clinics. With the signature poet's voice that has won her awards and acclaim, Ali Liebegott investigates the conjoined hearts of hope and addiction in an unforgettable story of what it means to be young and broke in America. ... frank, funny and painfully realistic ... Liebegott has unleashed a book that's part road novel, part portrait of a would-be artist as a young woman and part unabashed romance.—Josh Davis, The Rumpus Cha-Ching!, [Liebegott's] latest novel, is one of those books that cause you to look up, blinking, realizing that you've read 75 pages and your coffee is cold. It's a rush of offtrack betting, impulsive road trips, liquor-fueled make-out sessions, and the sort of low-end jobs that are invisible in most fiction but everywhere in Liebegott's work.—San Francisco Magazine Cha-Ching! is a rush—the clatter of youth on the angry move, the rattling of dreamy gambles in crappy apartments, the desperate crash of falling for someone despite the million reasons why and the bang! bang! bang! of our tender hearts.—Daniel Handler, author of Why We Broke Up Cha-Ching! is so raw with need that I found myself itching that addict's itch to chase the seemingly impossible.—Karolina Waclawiak, deputy editor of The Believer and author of How to Get Into the Twin Palms An open-hearted, deeply romantic story about a fucked-up dyke, her pit bull, her search for love, her tenuous grasp on hope, a pretty girl and the literal spin of the wheel.—Sarah Schulman, author of The Gentrification of the Mind: Witness to a Lost Imagination In the game of American-life-on-the-go hopscotch, Ali Liebegott's heroine Theo just jumped a square ahead of Dean Moriarty ... choosing theo similar books: *Art as Organism* Charissa N. Terranova, 2015-10-10 In this groundbreaking book, Charissa Terranova unearths a forgotten narrative of modernism, which charts the influence that biology, General Systems Theory and cybernetics had on art in the twentieth century. From kinetic and interactive art to early computer art and installations spanning an entire city, she shows that the digital image was a rich and expansive artistic medium of modernism. This book links the emergence of the digital image to the dispersion of biocentric aesthetic philosophies developed by Bauhaus pedagogue Laszlo Moholy-Nagy, from 1920s Berlin to the Massachusetts Institute of Technology in the 1970s. It uncovers seminal but overlooked references to biology, the organism, feedback loops, emotions and the Gestalt, along with an intricate genealogy of related thinkers across disciplines. Terranova interprets anew major art movements such as the Bauhaus, Op Art and Experiments in Art and Technology (E.A.T.), by referencing contemporary insights from architects, embryologists, electrical engineers and computer scientists, among others. This book reveals the complex connections between visual culture, science and technology that comprise the deep history of twentieth-century art.

choosing theo similar books: *Great Transformations* Mark Blyth, 2002-09-16 This book picks up where Karl Polanyi's study of economic and political change left off. Building upon Polanyi's conception of the double movement, Blyth analyzes the two periods of deep seated institutional change that characterized the twentieth century: the 1930s and the 1970s. Blyth views both sets of changes as part of the same dynamic. In the 1930s labor reacted against the exigencies of the market and demanded state action to mitigate the market's effects by 'embedding liberalism.' In the 1970s, those who benefited least from such 'embedding' institutions, namely business, reacted against these constraints and sought to overturn that institutional order. Blyth demonstrates the critical role economic ideas played in making institutional change possible. *Great Transformations* rethinks the relationship between uncertainty, ideas, and interests, achieving profound new insights on how, and under what conditions, institutional change takes place.
