case in point 12 download: *Debating German Cultural Identity Since 1989* Kathleen James-Chakraborty, Linda Shortt, 2011 Interdisciplinary views of the debates over and transformation of German cultural identity since unification. The events of 1989 and German unification were seismic historical moments. Although 1989 appeared to signify a healing of the war-torn history of the twentieth century, unification posed the question of German cultural identity afresh. Politicians, historians, writers, filmmakers, architects, and the wider public engaged in memory contests over such questions as the legitimacy of alternative biographies, West German hegemony, and the normalization of German history. This dynamic, contested, and still ongoing transformation of German cultural identity is the topic of this volume of new essays by scholars from the United Kingdom, Germany, the United States, and Ireland. It explores German cultural identity by way of a range of disciplines including history, film studies, architectural history, literary criticism, memory studies, and anthropology, avoiding a homogenized interpretation. Charting the complex and often contradictory processes of cultural identity formation, the volume reveals the varied responses that continue to accompany the project of unification. Contributors: Pertti Ahonen, Aleida Assmann, Elizabeth Boa, Peter Fritzsche, Anne Fuchs, Deniz Göktürk, Kathleen James-Chakraborty, Anja K. Johannsen, Jennifer A. Jordan, Jürgen Paul, Linda Shortt, Andrew J. Webber. Anne Fuchs is Professor of German Literature at the University of St. Andrews, Scotland. Kathleen James-Chakraborty is Professor of Art History at University College Dublin, Ireland. Linda Shortt is Lecturer in German at Bangor University, Wales.

case in point 12 download: *Xenolinguistics* Diana Slattery, 2015-01-06 Are language and consciousness co-evolving? Can psychedelic experience cast light on this topic? In the Western world, we stand at the dawn of the psychedelic age with advances in neuroscience; a proliferation of new psychoactive substances, both legal and illegal; the anthropology of ayahuasca use; and new discoveries in ethnobotany. From scientific papers to the individual trip reports on the Vaults of Erowid and the life work of Terence McKenna, Alexander and Ann Shulgin, and Stanislaw Grof, we are converging on new knowledge of the mind and how to shift its functioning for therapeutic, spiritual, problem-solving, artistic and/or recreational purposes. In our culture, psychonautics, the practices of individuals and small groups using techniques such as meditation, shamanic ritual, ecstatic dance and substances such as LSD and psilocybin for personal exploration, is a field of action and thought in its infancy. The use of psychonautic practice as a site of research and a method of knowledge production is central to this work, the first in-depth book focusing on psychedelics, consciousness, and language. *Xenolinguistics* documents the author's eleven-year adventure of psychonautic exploration and scholarly research; her original intent was to understand a symbolic language system, Glide, she acquired in an altered state of consciousness. What began as a deeply personal search, led to the discovery of others, dubbed xenolinguists, with their own unique linguistic objects and ideas about language from the psychedelic sphere. The search expanded, sifting through fields of knowledge such as anthropology and neurophenomenology to build maps and models to contextualize these experiences. The book presents a collection of these linguistic artifacts, from glossolalia to alien scripts, washed ashore like messages in bottles, signals from Psyche and the alien Others who populate her hyperdimensional landscapes. With an entire chapter dedicated to Terence and Dennis McKenna and sections dedicated to numerous other xenolinguists, this book will appeal to those interested in language/linguistics and the benefits of psychedelic self-exploration, and to readers of science fiction.

case in point 12 download: Judicial Oppression of Child Rights in Democratic States and by International Human Rights Bodies Sonja Grover, 2025-01-11 The book analyzes in depth selected contemporary U.S., Canadian and European landmark and other cases illustrating the nature and impact of the legal regime that undermines child human rights empowerment in many Western democracies. The objectives in writing this book are to (i) encourage a re-evaluation of the legal regime that fosters the erosion of the notion of children as autonomous holders of fundamental human rights and not but subjects with weak derivative rights stemming from parental or family rights; (ii) highlight the courts' proper role in a democracy of protecting child and youth human rights empowerment and to (iii) contribute to fostering an evolution in the historical notion of the court's *patris patriae* doctrine as including the protection and strengthening of child autonomous fundamental human rights and child empowerment. Ultimately then the book highlights through the child rights domain the significant role the courts must and should play in strengthening democratic values and principles.

Since 2000, the Passive and Active Measurement (PAM) conference has provided a forum for presenting and discussing innovative and early work in the area

of Internet measurements. PAM has a tradition of being a workshop-like conference with lively discussion and active participation from all attendees. This event focuses on research and practical applications of network measurement and analysis techniques. This year's conference was held at ETH Zurich, Switzerland. PAM 2010 attracted 79 submissions. Each paper was carefully reviewed by at least three members of the Technical Program Committee. The reviewing process led to the acceptance of 23 papers. The papers were arranged in nine sessions covering the following areas: routing, transport protocols, mobile devices, topology, measurement infrastructure, characterizing network usage, analysis techniques, traffic analysis, and the Web. We are very grateful to Endace Ltd. (New Zealand), Cisco Systems Inc. (USA), armasuisse (Switzerland) and the COST Action TMA whose sponsoring allowed us to keep registration costs low and to offer several travel grants to PhD students. We are also grateful to ETH Zurich for sponsoring PAM as a host.

case in point 12 download: *Child Soldiers in the Age of Fractured States* Scott Gates, Simon Reich, 2010-01-31 Current global estimates of children engaged in warfare range from 200,000 to 300,000. Children's roles in conflict range from armed and active participants to spies, cooks, messengers, and sex slaves. *Child Soldiers in the Age of Fractured States* examines the factors that contribute to the use of children in war, the effects of war upon children, and the perpetual cycle of warfare that engulfs many of the world's poorest nations. The contributors seek to eliminate myths of historic or culture-based violence, and instead look to common traits of chronic poverty and vulnerable populations. Individual essays examine topics such as: the legal and ethical aspects of child soldiering; internal UN debates over enforcement of child protection policies; economic factors; increased access to small arms; displaced populations; resource endowments; forced government conscription; rebel-enforced quota systems; motivational techniques employed in recruiting children; and the role of girls in conflict. The contributors also offer viable policies to reduce the recruitment of child soldiers such as the protection of refugee camps by outside forces, naming and shaming, and criminal prosecution by international tribunals. Finally, they focus on ways to reintegrate former child soldiers into civil society in the aftermath of war.

case in point 12 download: Mission and Evangelism in a Secularizing World Narry F. Santos, Mark Naylor, 2019-02-14 Secularization, as a movement away from a religious orientation to life, is strong in Canada and has influence worldwide. In this volume, missiologists and practitioners across Canada consider how an agenda of Christian mission and evangelism can be advanced in a secularizing environment. How can believers be curious and engaged rather than defensive and fearful? What changes are required from the evangelical community so that there is productive dialogue and action in ways that maintain faithfulness to the cause of Christ? What should the approach of mission be to a new generation steeped in secular narratives? How do we answer negative caricatures of Christian mission in light of the history of Residential Schools? What

examples from the past teach us about developing an irenic approach? What positive trends are currently evident in Canada and around the world that counter the secularizing narrative? These questions and more are considered in this volume by Canadian scholars who recognize the importance of being relevant to society while maintaining integrity with the Gospel message. The essays address secularism in Canadian and worldwide contexts with seriousness, insight, and an underlying theme of hope, recognizing that God's mission has been accomplished, is being accomplished, and will be accomplished.

case in point 12 download: Commercial Contract Law and Arbitration Mads Andenas, Maren Heidemann, 2024-04-30 This book tackles one of the most challenging fields of research and practice in the current global trade environment: integrating doctrines of private and public law for the purpose of international commerce and trade. Traditional concepts of obligatory and proprietary claims and rights reach their limits when placed within an international context of litigation funding, liability and securitisation. Across disciplines, scholars and practitioners are seeking new ways of expanding and reconnecting novel products and services such as data; and the use of international dispute settlement with indispensable constitutional values and democratic processes is also growing. This book combines contributions on current issues in commercial contract and contract law, making an important contribution to the areas of substantive contract law and arbitration procedure that connect issues across disciplines. Exploring both substantive and procedural laws, the book explores unfair terms in non-consumer contracts, which is complemented by a broader contextual discussion of the regulation of platform operators in the European Union; while a discussion of the procedural role of public reporting of investment arbitration awards by the International Centre for the Settlement of Investment Disputes (ICSID) expands on the procedural aspects of arbitration within the wider context of the rule of law debate. Debating policy issues in general private law reform, and including a juxtaposition of a traditionalist continuation-oriented approach and a call for radical reform of entrenched and outmoded private law concepts to suit global commerce, this book will be of interest to students, academics and practitioners working in the area of commercial contract law and arbitration.

The 28 revised full papers presented together with a keynote paper were carefully reviewed and selected from 105 submissions. the papers are organized in topical sections on access methods, advanced query processing, data mining and data warehousing, distance-based queries, mobility and moving points management, modeling and languages, similarity processing, systems and implementation issues.

case in point 12 download: Digital Front-End in Wireless Communications and Broadcasting Fa-Long Luo, 2011-09-29 Covering everything from signal processing algorithms to integrated circuit design, this complete guide to digital front-end is invaluable for professional engineers and researchers in the fields of signal processing, wireless communication and circuit design. Showing how theory is translated into practical technology, it covers all the relevant standards and gives readers the ideal design methodology to manage a rapidly increasing range of applications. Step-by-step information for designing practical systems is provided, with a systematic presentation of theory, principles, algorithms, standards and implementation. Design trade-offs are also included, as are practical implementation examples from real-world systems. A broad range of topics is covered, including digital pre-distortion (DPD), digital up-conversion (DUC), digital down-conversion (DDC) and DC-offset calibration. Other important areas discussed are peak-to-average power ratio (PAPR) reduction, crest factor reduction (CFR), pulse-shaping, image rejection, digital mixing, delay/gain/imbalance compensation, error correction, noise-shaping, numerical controlled oscillator (NCO) and various diversity methods.
