Historical Background of Chief Black Hawk

Chief Black Hawk, born in 1767, was a leader of the Sauk tribe, primarily known for his resistance against the United States' expansion into Native American lands. His leadership during the Black

Hawk War of 1832 marked a significant moment in Native American history. The conflict arose when Black Hawk and his followers attempted to reclaim territory in Illinois that had been ceded under disputed treaties. Despite the eventual defeat, Black Hawk's role highlighted the struggle of indigenous peoples to maintain their land and sovereignty. Understanding his life and times provides context to the significance of his descendants and the cultural heritage they carry forward.

Genealogy and Family Lineage

The genealogy of Chief Black Hawk is a subject of interest for historians, anthropologists, and members of the Sauk tribe. His family lineage is traced through both oral tradition and documented records maintained by tribal historians. Black Hawk was part of the British Band, a group within the Sauk tribe, and had several children who continued his lineage. His descendants have maintained their connections to the Sauk community, preserving genealogical records and cultural stories.

Immediate Family and Children

Chief Black Hawk had multiple children, although historical documentation varies regarding their exact number and names. Some of the known children include Neapope and other sons who played roles in the tribe's affairs after Black Hawk's death. These children and their descendants formed the core of the chief's familial legacy, often maintaining leadership roles within the Sauk community.

Documentation and Oral Histories

Genealogical information about the chief's family is preserved through a combination of oral histories and written records. Tribal elders and historians have worked to keep these traditions alive, ensuring that the stories of Chief Black Hawk's descendants are passed down through generations. This dual approach helps validate family ties and cultural identity within the tribe and beyond.

chief black hawk descendants: Cherokee Chief Black Hawk and His Descendants William A. Hinson, 2017-11-02 Large Size 8 1/2 X 11 Softback Genealogy Book with photos 889 pages - When I was about 5 years old and could stand on my tip toes and see what was on the table cloth, my paternal grandmother Virgie would show me photos of my Morgan and Shaver ancestors. She showed me at an early age how I was related to a Native American Iroquoian Cherokee man named Chief Black Hawk, who had a daughter that married a German man named Capt. Windle Miller. She further stated that she had an official document that proved that we were related to this Cherokee Indian. So, being interested, I asked her where is this official document? She told me she looked for it, but it must be lost. Next time I saw her she stated that she loaned it to a distant cousin Lamont Shaver and he never returned it. I new that my grandmother would never lie to me and spent many years researching this Chief Black Hawk. After many years of research and gathering data, I have put together a case for Cherokee Chief Black Hawk being a real person. The evidence I gathered showed that many different areas of proof of his existence. The evidence of Native American family traits were always seen in my own family and distant relatives, all related through the same lineage. I found an old news paper article in the Stanly County News & Press. Several Revolutionary War pension application accounts. Old Land Surveys and Old Land Plat Deeds. The discovery of his daughter's gravesite. And finally the 17 ancestors who all applied to enroll into the Cherokee tribe through the Dawes Rolls of 1896. Clearly, this evidence shows without a doubt that Chief Black Hawk and his daughter Naktika Red Fern or her white name 'Elizabeth Redfern' Miller Davis did exist. This book is the result of putting all that evidence together for my relatives to see and study. As you will see, my long journey into getting to the truth has not been in vain. I know you will enjoy this book as much as I have enjoyed putting it together.

chief black hawk descendants: Cherokee Chief Black Hawk and His Descendants - Book 2: Photo Album William A. Hinson, 2018-02-07 The Cherokees, by similarity of language, have been determined to be a branch of the great Iroquoian family of Indians. They are believed to have emigrated to the Southern Appalachians about the Thirteenth Century. They found the country occupied by various branches of the Muscogee or Creek people, who inhabited the Tennessee River valley to upper East Tennessee and North Carolina; and the headwaters of Tugaloo and Chattahoochie Rivers in Georgia and South Carolina. The Muscogee or Creek Indians are believed to have emigrated from Mexico to the mouth of the Mississippi about the year 1200 AD. The word Muscogee means Mexco-ulgae, Mexican People. Intermittent warfare, lasting through several centuries, was waged for possession of the mountainous country. Eventually, the Creeks, Kusatees, and Uchees, all of Muscogee blood, were forced to the southward. The Shawnees, who occupied Middle Tennessee, were forced northward into Ohio. The Cherokees, by right of conquest, claimed all the mountainous section now embraced in East Tennessee, North and South Carolina, and North Georgia. They claimed in addition as their hunting grounds, Middle Tennessee and Kentucky. De Soto, who traversed the Cherokee country in 1540, found them in substantially the same location as during the English period of settlement. The Cherokees had dealings with Virginia as early as 1689. Their principal affairs, however, were handled by the English through the Colony of South Carolina, and it is from the South Carolina records that we get the first mention of Cherokee chiefs. De Soto visited numerous Cherokee towns, but failed in every instance to mention the name of the chief. The original Cherokee settlement was the old town Kituwah, at the junction of Ocona Lufty and Tuckasegee Rivers. The tribe was from the earliest times divided into seven clans, and a few of the town-names indicate that each clan may have originally occupied a separate village. The seven clans were, Ani-gatugewa, Kituwah People; Ani-kawi, Deer People; Ani-waya, Wolf People; Ani-Sahani, Blue Paint People; Ani-wadi, Red Paint People; Ani-Tsiskwa, Bird People; and Ani-Gilahi, Long Hair People.

chief black hawk descendants: Re-Collecting Black Hawk Nicholas Brown, Sarah E. Kanouse, 2015-06-04 The name Black Hawk permeates the built environment in the upper Midwestern United States. It has been appropriated for everything from fitness clubs to used car dealerships. Makataimeshekiakiak, the Sauk Indian war leader whose name loosely translates to Black Hawk, surrendered in 1832 after hundreds of his fellow tribal members were slaughtered at the Bad Axe Massacre. Re-Collecting Black Hawk examines the phenomena of this appropriation in the physical landscape, and the deeply rooted sentiments it evokes among Native Americans and descendants of European settlers. Nearly 170 original photographs are presented and juxtaposed with texts that reveal and complicate the significance of the imagery. Contributors include tribal

officials, scholars, activists, and others, such as George Thurman, the principal chief of the Sac and Fox Nation and a direct descendant of Black Hawk. These image-text encounters offer visions of both the past and present and the shaping of memory through landscapes that reach beyond their material presence into spaces of cultural and political power. As we witness, the evocation of Black Hawk serves as a painful reminder, a forced deference, and a veiled attempt to wipe away the guilt of past atrocities. Re-Collecting Black Hawk also points toward the future. By simultaneously unsettling and reconstructing the Midwestern landscape, Re-Collecting Black Hawk envisions new modes of peace
