cia gateway for contractors: Dirty Wars Jeremy Scahill, 2013-04-23 A New York Times bestseller Now also an Oscar-nominated documentary In *Dirty Wars*, Jeremy Scahill, author of the New York Times bestseller *Blackwater*, takes us inside America's new covert wars. The foot soldiers in these battles operate globally and inside the United States with orders from the White House to do whatever is necessary to hunt down, capture or kill individuals designated by the president as enemies. Drawn from the ranks of the Navy SEALs, Delta Force, former Blackwater and other private security contractors, the CIA's Special Activities Division and the Joint Special Operations Command (JSOC), these elite soldiers operate worldwide, with thousands of secret commandos working in more than one hundred countries. Funded through black budgets, Special Operations Forces conduct missions in denied areas, engage in targeted killings, snatch and grab individuals and direct drone, AC-130 and cruise missile strikes. While the Bush administration deployed these ghost militias, President Barack Obama has expanded their operations and given them new scope and legitimacy. *Dirty Wars* follows the consequences of the declaration that the world is a battlefield, as Scahill uncovers the most important foreign policy story of our time. From Afghanistan to Yemen, Somalia and beyond, Scahill reports from the frontlines in this high-stakes investigation and explores the depths of America's global killing machine. He goes beneath the surface of these covert wars, conducted in the shadows, outside the range of the press, without effective congressional oversight or public debate. And, based on unprecedented access, Scahill tells the chilling story of an American citizen marked for assassination by his own government. As US leaders draw the country deeper into conflicts across the globe, setting the world stage for enormous destabilization and blowback, Americans are not only at greater risk -- we are changing as a nation. Scahill unmasks the shadow warriors who prosecute these secret wars and puts a human face on the casualties of unaccountable violence that is now official policy: victims of night raids, secret prisons, cruise missile attacks and drone strikes, and whole classes of people branded as suspected militants. Through his brave reporting, Scahill exposes the true nature of the dirty wars the United States government struggles to keep hidden.

cia gateway for contractors: Poisoning the Pacific Jon Mitchell, 2020-10-12 In this devastating exposé, investigative journalist Jon Mitchell reveals the shocking toxic contamination of

the Pacific Ocean and millions of victims by the US military. For decades, US military operations have been contaminating the Pacific region with toxic substances, including plutonium, dioxin, and VX nerve agent. Hundreds of thousands of service members, their families, and residents have been exposed—but the United States has hidden the damage and refused to help victims. After World War II, the United States granted immunity to Japanese military scientists in exchange for their data on biological weapons tests conducted in China; in the following years, nuclear detonations in the Pacific obliterated entire islands and exposed Americans, Marshallese, Chamorros, and Japanese fishing crews to radioactive fallout. At the same time, the United States experimented with biological weapons on Okinawa and stockpiled the island with nuclear and chemical munitions, causing numerous accidents. Meanwhile, the CIA orchestrated a campaign to introduce nuclear power to Japan—the folly of which became horrifyingly clear in the 2011 meltdowns in Fukushima Prefecture. Caught in a geopolitical grey zone, US territories have been among the worst affected by military contamination, including Guam, Saipan, and Johnston Island, the final disposal site of apocalyptic volumes of chemical weapons and Agent Orange. Accompanying this damage, US authorities have waged a campaign of cover-ups, lies, and attacks on the media, which the author has experienced firsthand in the form of military surveillance and attempts by the State Department to impede his work. Now, for the first time, this explosive book reveals the horrific extent of contamination in the Pacific and the lengths the Pentagon will go to conceal it.

Employees who desperately pull the plugs are too late. Restarting is pointless; the computers are locked. And now the attackers ask each victim for money. This is hijack software. It is just one example of how vulnerable the digital world has made us. Based on the cases he investigated over a period of six years, award-winning Dutch journalist Huib Modderkolk takes the reader on a tour of the corridors and back doors of the globalised digital world. He reconstructs British-American espionage operations and reveals how the power relationships between countries enable intelligence services to share and withhold data from each other. Looking at key players including Edward Snowden, Russian hackers Cozy Bear and Evgeniy Bogachev, 'the Pablo Escobar of the digital era', Modderkolk opens our eyes to the dark underbelly of the digital world with the narrative drive of a thriller.

cia gateway for contractors: *The Anti-Globalist Manifesto* Jerome R. Corsi, 2024-08-13 In his new book, *The Anti-Globalist Manifesto: Ending the War on Humanity*, bestselling author Jerome Corsi puts out a call for action to reverse the totalitarian goals of the New World Order globalists. Corsi addresses that these demons are well advanced in their planned "One World Government" takeover aimed at establishing an atheistic utopia that will have no respect for traditional human rights. Comfortable that their transhuman aspirations are achievable, the Malthusian elite is waging a war on humanity that embraces global depopulation as a means of preventing Earth's abundant natural resources for themselves. Tracing this dystopian nightmare back to the assassination of President John F. Kennedy on November 23, 1963, as the day the deep state went rogue in a conspiracy involving the CIA, the Pentagon, the State Department, and the Department of Justice to affect a coup d'état that would allow the military industrial complex to go to war in Vietnam, the

deep state has created an ongoing Truman Show—a series of never-ending psychological operations designed to induce citizens worldwide to surrender freedoms to government in return for security. With the premise that the globalist elite uses systems of mass manipulation and social engineering to induce the world's population to accept the implementation of the reforms it has already decided to implement, Corsi sets a detailed plan for organizing global resistance against the subversives who now sit at the top of the institutions of world government and finance. The Anti-Globalist Manifesto is a call to action to restore God to our lives, as those of us fighting for a return to personal freedoms and limited government, ending the war on humanity and driving once and for all time the New World Order globalists back to Hell where they belong.
