clark creative education answers: Principles, Practices, and Creative Tensions in Progressive Higher Education Katherine Jelly, Alan Mandell, 2017-03-23 In this multi-faceted case study of one progressive institution of adult higher education, the editors and contributors to the volume lay out significant challenges confronting not just non-traditional post-secondary colleges and universities but all institutions of higher education in today's rapidly changing context. Contending that nontraditional institutions are especially challenged in these turbulent times, they argue that these organizations' distinctive academic programs are among the most threatened in the landscape of higher education today. The 19 essays that make up this volume highlight and examine key creative tensions, rich interplays of emphases and values in higher education, in order to illuminate and address more intentionally the questions that we must address: Can we make constructive use of these tensions? Can we recognize what is at stake? And can we chart a course that will both respond innovatively to rapid change and sustain a vision and the purposes and principles on which that vision rests? Taken as a whole, this volume sheds light on the questions and creative tensions that can, with thoughtful attention, help to keep an alternative, progressive vision of adult higher education alive.

clark creative education answers: Creative Encounters, Appreciating Difference Sam Gill, 2018-11-15 Across the world from personal relationships to global politics, differences—cultural, religious, racial, gender, age, ability—are at the heart of the most disruptive and disturbing concerns. While it is laudable to nurture an environment promoting the tolerance of difference, *Creative Encounters, Appreciating Difference* argues for the higher goal of actually appreciating difference as essential to creativity and innovation, even if often experienced as stressful and complex. Even encounters that are apparently harmful and negatively valued (arguments, conflict, war, oppression) usually heighten the potential for creativity, innovation, movement, action, and identity. Drawing on classic encounters that have played a significant role in the founding of the academic study of religion and the social sciences, this book explores in some depth the dynamics of encounter to reveal both its problematic and creative aspects and to develop perspectives and strategies to assure encounters both include the appreciation of difference and also are recognized as creative and innovative. The two examples most extensively considered show that the academic study of the peoples indigenous to North America and to Australia involved creative constructions (concoctions) of primary examples in order to establish and give authority to academic theories and definitions. Rather than damning these examples as “bad scholarship,” this book considers them to be encounters engendering creative constructions that are distinctive to academia, yet their potential for harm must be understood. Most important to the book is a persistent development of perspectives and strategies for understanding and approaching encounters in order to assure the appreciation of difference is accompanied by the potential for creativity and innovation. Specific perspectives and strategies are related to naming, moving, gesture, and play and, particularly relevant to religion, the development of an aesthetic of impossibles. Since these historical examples engage highly relevant present concerns—the distinction of real and fake, truth and lie, map and territory—the threading essays show how these more or less classic examples might contribute to

appreciating these contemporary concerns that are generated in the presence of difference.

clark creative education answers: Education As the Cultivation of Intelligence Michael E. Martinez, 2014-04-08 The book argues that the intellectual abilities that are crucial to modern life correspond to the cognitive functions that are reasonably called intelligence. These intellectual abilities are learnable and we have the knowledge to teach them directly.

clark creative education answers: Ludic Inquiries Into Power and Pedagogy in Higher Education Amelia Walker, Helen Grimmett, Alison L. Black, 2024-08-30 This book interrogates the role games and playfulness bear in both formal education and informal social learning. Responsive to contemporary social and ecological challenges, this book especially explores games' interactions with social power. On one hand, games sometimes operate to reinforce ideologies that normalise social injustice and environmental disregard. On the other, games offer rich possibilities for questioning such ideologies and encouraging change. Strongly interdisciplinary, the book assembles 20 chapters written by 50 experts across fields including education, game design, cultural studies, sociology, Indigenous studies, disability studies, queer studies, STEM, legal studies, history, creative writing, visual arts, music, the creative industries, and social inclusion. These contributions not only make games a focus but incorporate playful research writing strategies, demonstrating methods of what we term ludic inquiry. This includes chapters written using arts-based research, practice-led research, poetic inquiry, narrative inquiry, autoethnography, duoethnography, and more. Organised across four themes – 'philosophical sparks', 'lived experiences', 'pedagogical perspectives', and 'the spirit of play' – this book emphasises the radical egalitarian possibilities inherent in critical attention to games and how we play (or get played by) them. Its fresh insights will interest all readers interested in creatively remaking our worlds.

clark creative education answers: Faith-Based Education That Constructs HeeKap Lee, 2010-08-09 Constructivism is everywhere. It is a hot issue at this time in the field of philosophy, education, technology, and religion. However, can constructivism be an alternative approach in faith-based education? While some conclude that Jesus knew learning was an active knowledge-creating process, and that he always encouraged his disciples to think deeply and go beyond the surface level, others would find that constructivism undercuts faith-based education because of its claims to relativity. For example, constructivists claim that meaning is imposed on the world by us rather than existing in the world independently from us. Thus, they proclaim that truth is relative to particular times, places, and people. Christians hold that truth does exist absolutely. So how can there be a way forward for faith-based educators who see the good in the constructivist approach? In Faith-Based Education that Constructs readers will find a unique approach whereby constructivism may appropriately be applied to a faith-based education setting. Although disagreement can occur between constructivism and faith-based education, this book concludes that constructivist thought and Christian faith-based education are, in the end, congruent and harmonious in significant ways. Those faith-based educators who continue to hold cautionary views of radical constructivist assertions against absolute truths need not disregard all other aspects of constructivism.

clark creative education answers: Roads to Prosperity Gary S. Sands, Laura A. Reese, 2017-11-06 Explores popular economic development strategies in midsize Canadian urban areas. Roads to Prosperity: Economic Development Lessons from Midsize Canadian Cities explores the relative prosperity of midsize Canadian urban areas (population 50,000 to 400,000) over the past two decades. Communities throughout North America have strived for decades to maintain and enhance the prosperity of their residents. In the areas that are the focus of this research, the results of these efforts have been mixed—some communities have been relatively successful while others have fallen further behind the national averages. Midsize cities often lack the resources, both internal and external, to sustain and enhance their prosperity. Policies and strategies that have been successful in larger urban areas may be less effective (or unaffordable) in smaller ones. Roads to Prosperity first examines the economic structure of forty-two Canadian urban regions that fall within the midsize range to determine the economic specializations that characterize these communities and to trace how these specializations have evolved over the time period between 1991 and 2011. While urban areas with an economic base of natural resource or manufacturing industries tend to retain this economic function over the years, communities that rely on the service industries have been much more likely to experience some degree of restructuring in their economies over the past twenty years. The overall trend among these communities has been for their employment profiles to become more similar and for their economic specialization to fade over time. The second part of the book looks at a number of currently popular economic development strategies as they have been applied to midsize urban areas and their success and failures. While there appears to be no single economic development strategy that will lead to greater prosperity for every community, Sands and Reese explore the various factors that help explain why some work and others don't. Those with an interest in urban planning and community development will find this monograph highly informative.

Clover, Kathy Sanford, Kerry Harman, 2022-04-07 This book argues that feminist aesthetics as practices of adult education can inform our responses to gendered, racial, class and ecological injustices. It illustrates the critical, creative, and provocative pedagogical theorising, research, and engagement work of feminist adult educators and researchers who work in diverse community, institutional, and social movement contexts across North America and Europe. This book captures the complexity, diversity, energy, and imagination of those who theorise, decolonise, facilitate, investigate, visualize, story, and create within the politics of gender (in)justice and radical change.
