cool math games 66: *My Theory of Evolution Life with Meaning Part 2* William Coakley, 2023-11-28 My book is very unique and different from others. I talk about the news and what is going on with the government. Other things that I mentioned are my opinions on songs, movies, and shows that Hollywood produces and how they speak to me. My book is similar to my first one, as it has everything to do with evolution and my opinion on why we are all here right now on this planet. My book also covers my life story, and it is all based on facts on the world today. There are different sections in my book, and I tried to focus on celebrities more, hoping that they would reach out to me in person. My book also covers sports topics and how I view sports in a different way than you see in TV. My book has some biblical references, and I like to talk about Jesus sometimes. I mentioned parts about society and also how we can improve society with better rules and regulations. When I talk about movies, these are my opinions and I love watching Hollywood produce good shows and movies. I talked about the news a lot in my second book because I think the news is important and is relevant to our lives. I came up with my own information, but I really do think that the world is so important in today's world. I hope that everyone enjoys my second book.
