cnn 10 for students: *Is College a Lousy Investment?* Tara Jabbaar-Gyambrah, Seneca Vaught, 2018-02-22 Is College a Lousy Investment?: Negotiating the Hidden Cost of Higher Education discusses many of the economic misconceptions about earning a college degree. While it is widely believed that attending college guarantees wealth and success, students, concerned parents, and higher education professionals have neglected calculating the full-range of short-term and long-terms costs. Our work illustrates how the promotion of education merely as a commodity come at a high price for the individual and society. cnn 10 for students: *Walkout!* Diana D'Amico Pawlewicz, 2022-08-01 Teacher unions and their members have long stood as polarizing figures in a vast educational landscape. As in the Western films of the 1920s, policymakers, education reformers, and onlookers often assign union leaders and the teachers they represent either the white hats of heroes or the black hats of villains. Politicized efforts to reductively classify teacher unions as beneficial or dangerous have only served to obscure the extent to which labor militancy and teacher activism have become part and parcel of the American public school system and the primary mechanisms by which teachers' voices are heard – and heeded – in the policy arena. Teacher unions have grown in tandem with and in response to the expansion of the school bureaucracy and the acceleration of accountability reforms, and teachers' calls for recognition and reform are inseparable from broader movements for social change. Far more than either good or bad, teacher unions are the inevitable outgrowth of American public education as it stands today. This book offers an interdisciplinary exploration of the state of modern teacher unions, the complex spaces they operate in, and the connections between militancy, activism, and school reform. Breaking free from the white hat/black hat dyad that has for so long colored the lenses we use to understand unions, the chapters of this book engage a set of fundamental questions: Where did the modern moment of militancy come from, and in what ways is it a continuation or a departure from the approaches of previous organized teachers?; What is at stake in modern expressions of militancy for teachers, communities, and schools?; Beyond the flashpoint of the walkout, what is the effect of teacher activism?

Now their world is changing at warp speed, and classrooms too are seething with anxiety. This sequel raises the voices of diverse youth around the nation as they live through the mind-bending quandaries of this era and ask their teachers to notice. In *Fires in Our Lives*, Kathleen Cushman and her co-authors Kristien Zenkov and Meagan Call-Cummings (both leaders in bringing student voices to teacher education) present new first-person testimony on how today's youth experience the risks and challenges of high school. The students who speak here need their teachers more than ever as they navigate cultural, social, and political borders in their communities. Reinforced by classroom examples and supplemented with helpful takeaways, *Fires in Our Lives* offers a compelling dialogue about students' emotions, ideas, and developing agency. In a world that sorely needs the thoughtful participation of its rising

generation, this new staple belongs on every high school teacher's bookshelf.

Traumagenic events—episodes that have caused or are likely to cause trauma—color the experiences of K-12 students and the social studies curriculum they encounter in U.S. schools. At the same time that the global COVID-19 pandemic has heightened educators' awareness of collective trauma, the racial reckoning of 2020 has drawn important attention to historical and transgenerational trauma. At a time when social studies educators can simply no longer ignore “difficult” knowledge, instruction that acknowledges trauma in social studies classrooms is essential. Through employing relational pedagogies and foregrounding voices that are too often silenced, the lessons in *Hollywood or History? An Inquiry-Based Strategy for Using Film to Acknowledge Trauma in Social Studies* engage students in examining the role of traumatic or traumagenic events in social studies curriculum. The 20 *Hollywood or History?* lessons are organized by themes such as political trauma and war and genocide. Each lesson presents film clips, instructional strategies, and primary and secondary sources targeted to the identified K-12 grade levels. As a collection, they provide ready-to-teach resources that are perfect for teachers who are committed to acknowledging trauma in their social studies instruction.

A Globe & Mail Book of the Year A stimulating work on the politics of language. LA Review of Books As globalisation continues languages are disappearing faster than ever, leaving our planet's linguistic diversity leaping towards extinction. The science of how languages are acquired is becoming more advanced and the internet is bringing us new ways of teaching the next generation, however it is increasingly challenging for minority languages to survive in the face of a handful of hegemonic 'super-tongues'. In *Speak Not*, James Griffiths reports from the frontlines of the battle to preserve minority languages, from his native Wales, Hawaii and indigenous American nations, to southern China and Hong Kong. He explores the revival of the Welsh language as a blueprint for how to ensure new generations are not robbed of their linguistic heritage, outlines how loss of indigenous languages is the direct result of colonialism and globalisation and examines how technology is both hindering and aiding the fight to prevent linguistic extinction. Introducing readers to compelling characters and examining how indigenous communities are fighting for their languages, Griffiths ultimately explores how languages hang on, what happens when they don't, and how indigenous tongues can be preserved and brought back from the brink.

cnn 10 for students: Under Siege Jasmin Zine, 2022-04-05 The 9/11 attacks in the United States, the subsequent global “war on terror,” and the proliferation of domestic security policies in Western nations have had a profound impact on the lives of young Muslims, whose identities and experiences have been shaped within and against these conditions. The millennial generation of Muslim youth has come of age in these turbulent times, dealing with the aftermath and backlash associated with these events. Under Siege explores the lives of Canadian Muslim youth belonging to the 9/11 generation as they navigate these fraught times of global war and terror. While many studies address contemporary manifestations of Islamophobia and anti-Muslim racism, few have focused on the toll this takes on Muslim communities, especially among younger generations. Based on in-depth interviews with more than 130 young people, youth workers, and community leaders, Jasmin Zine’s ethnographic study unpacks the dynamics of Islamophobia as a system of oppression and examines its impact on Canadian Muslim youth. Covering topics such as citizenship, identity and belonging, securitization, radicalization, campus culture in an age of empire, and subaltern Muslim counterpublics and resistance, Under Siege provides a unique and comprehensive examination of the complex realities of Muslim youth in a post-9/11 world. Twenty years after the 9/11 attacks, Zine reveals how the global war on terror and heightened anti-Muslim racism have affected a generation of Canadians who were socialized into a world where their faith and identity are under siege.
