

creationism kent hovind

creationism kent hovind is a phrase that brings attention to one of the most prominent figures in modern creationist thought. Kent Hovind is a controversial and influential advocate for young Earth creationism, known for his lectures, debates, and extensive writings. His work challenges mainstream scientific theories such as evolution and the age of the Earth, promoting instead a literal interpretation of the Biblical creation narrative. This article explores the life, teachings, and impact of Kent Hovind within the creationist movement. It also examines his arguments, criticisms, and the broader context of creationism in contemporary society. Those interested in understanding the creationism kent hovind approach will find detailed insights and relevant information organized for easy navigation.

Who is Kent Hovind?

Kent Hovind is an American Christian fundamentalist evangelist and a prominent figure in the creationist community. Born in 1953, he gained national attention through his "Creation Science Evangelism" ministry, where he presented young Earth creationism as a scientific alternative to evolutionary biology. Hovind's background includes a focus on education and ministry, which he combines to promote his views on origins. His work is characterized by public lectures, debates, and multimedia presentations that seek to defend a literal interpretation of the Bible, especially the creation account in Genesis.

Early Life and Ministry

Kent Hovind began his career as a public school teacher before entering full-time ministry. He founded Creation Science Evangelism in the late 1980s, aiming to educate the public about creationism from a Biblical perspective. His ministry quickly gained popularity, particularly among those skeptical of evolutionary theory. Hovind's engaging speaking style and use of visual aids helped him reach large audiences across the United States and internationally.

Legal Issues

In addition to his ministry, Kent Hovind has been involved in several legal controversies, including charges related to tax evasion. These legal battles have affected his public image but have not diminished his influence within certain creationist circles. His supporters often view these issues as persecution for his religious beliefs.

Core Beliefs of Creationism Kent Hovind

The foundation of creationism kent hovind centers on a literal interpretation of the Bible's creation narrative. He advocates for a young Earth, estimated to be around 6,000 to 10,000 years old, which contrasts sharply with the scientific consensus of a 4.5 billion-year-old planet. Hovind's teachings emphasize the accuracy of the Genesis account and reject evolutionary theory and deep time concepts.

Young Earth Creationism

Kent Hovind argues that the Earth was created in six literal 24-hour days, as described in Genesis. He believes that all life forms were created directly by God, and that fossils and geological formations can be explained within this framework. This view opposes the long timelines proposed by mainstream geology and evolutionary biology.

The Flood and Its Effects

Central to Hovind's creationism is the belief in a global flood, commonly referred to as Noah's Flood. He claims that this catastrophic event accounts for much of the fossil record and geological strata observed today. The flood is used to explain phenomena such as fossilization and sediment layers without invoking millions of years.

Key Arguments Presented by Kent Hovind

Kent Hovind utilizes a variety of arguments to support creationism and challenge evolutionary theory. His presentations often include scientific-sounding claims intended to discredit common evolutionary explanations. These arguments form the core of his creationist apologetics and are widely circulated within his ministry materials.

Critique of Radiometric Dating

Hovind frequently critiques radiometric dating methods, arguing that they are unreliable and produce inconsistent results. He contends that these methods assume certain conditions that cannot be verified, thus undermining the credibility of age estimates that span millions or billions of years.

The Second Law of Thermodynamics

One of Hovind's favorite scientific arguments involves the Second Law of Thermodynamics, which he claims contradicts evolutionary processes. He argues that natural systems tend toward disorder rather than increased complexity, making the development of life through natural selection impossible.

Complexity of Life and Irreducible Complexity

Hovind often points to the complexity of biological systems as evidence against evolution. He highlights the concept of irreducible complexity, where certain biological structures are said to be too complex to have evolved incrementally. According to him, this complexity implies design by an intelligent creator.

Controversies and Criticisms

Kent Hovind's approach to creationism has sparked significant controversy, both within scientific communities and among other creationists. Critics argue that his interpretations misrepresent scientific data and that his legal issues have overshadowed his educational efforts. Nonetheless, his work remains influential among certain religious groups.

Scientific Criticism

Many scientists and educators criticize Hovind for promoting pseudoscience and misusing scientific terminology. His rejection of established scientific principles, such as radiometric dating and evolutionary biology, is seen as fundamentally flawed by the mainstream scientific community. Peer-reviewed research overwhelmingly supports evolutionary theory and an ancient Earth, contrasting with Hovind's claims.

Legal and Ethical Issues

Hovind's conviction for tax-related offenses has led to scrutiny of his ministry's operations. These legal troubles have raised questions about the organizational practices of his outreach efforts. Despite this, his followers often interpret these events as part of a larger spiritual battle against secularism.

Internal Creationist Debates

Even within creationist circles, Hovind's methods and interpretations are sometimes debated. Some creationists prefer more scientifically nuanced approaches, such as old Earth creationism or intelligent design, which differ from Hovind's strict young Earth stance. These internal debates highlight the diversity within creationist thought.

Impact on the Creationist Movement

Kent Hovind has had a lasting impact on the creationist movement by popularizing young Earth creationism through accessible media and public speaking. His engaging style and prolific output have inspired many to question evolutionary science and adopt creationist views. He remains a polarizing but undeniably influential figure.

Popularization of Creation Science

Through seminars, videos, and books, Hovind has brought creation science to a broad audience. His ability to simplify complex scientific concepts into layman's terms has contributed to the growth of creationist education efforts across the United States and beyond.

Influence on Christian Education

Hovind's materials are often used in homeschooling and church-based educational programs. His work supports curricula that emphasize Biblical literalism and creationist explanations for natural history, shaping the worldview of many students within religious communities.

Legacy and Continuing Outreach

Despite legal setbacks, Kent Hovind's ministry continues to distribute creationist content. His legacy includes a network of supporters and educators who maintain his message and continue to challenge evolutionary science in various forums.

Educational Materials and Outreach

Kent Hovind's ministry produces a wide range of educational resources aimed at promoting creationism. These include video series, lectures, books, and online content designed to equip believers with arguments against evolution and support for Biblical creation.

DVDs and Video Lectures

One of the hallmark features of creationism kent hovind is his extensive collection of DVDs and video lectures. These materials cover topics such as dinosaurs, the age of the Earth, and critiques of evolutionary theory. The videos are used in churches, schools, and home study environments.

Books and Written Publications

Hovind has authored numerous books that outline his creationist views and provide detailed critiques of evolutionary science. These publications serve as foundational texts for those interested in young Earth creationism and are often cited within creationist literature.

Seminars and Public Speaking

Public seminars and debates are a core part of Hovind's outreach strategy. These events allow for direct engagement with audiences and provide opportunities for Q&A sessions that reinforce his teachings. His dynamic speaking style is a key factor in his outreach success.

List of Common Topics Covered in Hovind's Educational Materials

- Origins of the Universe and Earth
- Critiques of Evolutionary Theory
- The Biblical Flood and Fossil Record
- Age of the Earth Debate
- Scientific Laws and Creationism
- Dinosaurs and Humans Coexisting

Frequently Asked Questions

Who is Kent Hovind and what is he known for in creationism?

Kent Hovind is an American Christian fundamentalist evangelist known for his strong advocacy of young Earth creationism and his opposition to evolutionary theory. He is known for his seminars, debates, and creationist ministry called Creation Science Evangelism.

What are the main arguments Kent Hovind uses to support creationism?

Kent Hovind argues that the Earth is approximately 6,000 years old based on a literal interpretation of the Bible, particularly the Book of Genesis. He challenges evolutionary theory by questioning radiometric dating methods, the fossil record, and the complexity of biological systems, asserting that life was created by God in its present form.

Has Kent Hovind faced any controversies related to his creationism work?

Yes, Kent Hovind has been involved in several controversies, including legal issues unrelated to his creationism work. He was convicted on tax-related charges and served time in prison. These controversies have affected his reputation but have not diminished his influence within certain

creationist circles.

What impact has Kent Hovind had on the creationism movement?

Kent Hovind has been influential in popularizing young Earth creationism, especially among evangelical Christians. His seminars, DVDs, and online videos have reached a wide audience, making complex scientific topics accessible from a creationist perspective and encouraging skepticism of mainstream science.

How do mainstream scientists view Kent Hovind's creationist claims?

Mainstream scientists overwhelmingly reject Kent Hovind's creationist claims, considering them pseudoscientific. The scientific community supports evolutionary theory and an ancient Earth based on extensive evidence from multiple disciplines, including geology, biology, and physics, which contradicts Hovind's young Earth creationism.

Additional Resources

1. Unlocking the Mysteries of Creation

This book by Kent Hovind presents a comprehensive defense of young Earth creationism. It explores scientific evidence that supports the biblical account of creation, challenging mainstream evolutionary theory. Hovind uses simple language and engaging arguments to make complex topics accessible to a broad audience.

2. Creation Science Evangelism

In this work, Kent Hovind outlines strategies for effectively sharing the creationist viewpoint. The book combines scientific facts with evangelistic methods, encouraging believers to confidently present creationism in conversations. It includes practical tips on debate and apologetics, aiming to equip readers for outreach.

3. The Creation Series: Dinosaur Days

This book focuses on the coexistence of humans and dinosaurs, a key argument in Hovind's creationist teachings. It challenges conventional timelines and fossil interpretations used by evolutionists. The narrative supports a literal interpretation of the Bible's creation story, emphasizing the recent origin of life on Earth.

4. God's Design: Evidence for Creation

Kent Hovind explores various scientific phenomena that he argues point to intelligent design. The book covers topics such as DNA complexity, the fossil record, and the laws of physics. It aims to demonstrate that naturalistic explanations are insufficient to account for life and the universe.

5. Scientific Creationism: The Facts and the Fallacies

This title critically examines evolutionary theory and presents creationism as a scientifically viable alternative. Hovind addresses common objections to creationism and provides rebuttals supported by biblical and scientific data. The book serves as a resource for those interested in understanding the creationism versus evolution debate.

6. *The Young Earth: A Biblical and Scientific Perspective*

Hovind argues for a young Earth, roughly 6,000 years old, based on biblical genealogies and scientific observations. The book discusses radiometric dating, geological formations, and fossil evidence from a creationist standpoint. It is designed to challenge the conventional old Earth views held by many scientists.

7. *Creationism and the Flood: Understanding Noah's Impact*

This book delves into the global flood described in the Bible, explaining its significance in creationist thought. Hovind discusses how the flood could account for fossil layers and geological features. It provides a framework for interpreting natural history through the lens of biblical events.

8. *Debating Evolution: Creationism in the Public Square*

Kent Hovind addresses the controversies surrounding the teaching of creationism and evolution in schools. The book offers insights into legal, educational, and cultural challenges faced by creationists. It encourages readers to engage thoughtfully in public discourse on origins.

9. *Creation Science for Kids: Teaching Truth in a Secular World*

Aimed at younger audiences, this book simplifies creationist concepts for children and parents. Hovind uses stories, illustrations, and easy-to-understand explanations to teach biblical creationism. It serves as a resource for families wanting to introduce creation science in a homeschool or church setting.

creationism kent hovind: Debates 21-30 Kent Hovind, 2023-05-05 This DVD series features ten debates on the topic of creation vs. evolution, between Kent Hovind and various opponents, with the support of Standing For Truth on YouTube. The debates cover a range of topics, from the age of the earth and the fossil record, to the origin of life and the evidence for intelligent design. The DVD series is designed to appeal to anyone interested in the ongoing debate between creationism and evolution, whether they are already familiar with Kent Hovind's work or not. The debates are presented in a respectful and engaging manner.

creationism kent hovind: Evolution Vs. Creationism Eugenie Carol Scott, 2005 Almost eighty years after the Scopes trial, the debate over the teaching of evolution continues to rage. There is no easy resolution--it is a complex topic with profound scientific, religious, educational, and legal implications. How can a student or parent understand this issue, which is such a vital part of education? Evolution vs. Creationism provides a badly needed, comprehensive, and balanced survey. Written by one of the leading advocates for the teaching of evolution in the United States, this accessible resource provides an introduction to the many facets of the current debate--the scientific evidence for evolution, the legal and educational basis for its teaching, and the various religious points of view--as well as a concise history of the evolution-creationism controversy. Each of the four sections of Evolution vs. Creationism provides a resource that will assist the reader in better understanding these issues. The first section addresses the nature of how evolution works as part of

the scientific enterprise, as well as a summary of the relationship between religious beliefs and science. A section on the history of the controversy provides a handy synopsis of the lengthy struggles, from before Darwin to the present day, between advocates of creationism and the proponents of evolution. A collection of primary source documents addressing cosmology, law, education, and religious issues from all sides of the debate constitute the third section. The book concludes with a selection of resources for further information for those who wish to study the topic in more depth.

creationism kent hovind: The Scientific Case Against Scientific Creationism Jon P. Alston, 2003-09 Sociologist Jon P. Alston offers a unique and clear analysis of the weaknesses of scientific creationism and intelligent design by identifying what creationists say when they reject evidence for evolution. He demonstrates how scientific creationists accept non-scientific statements that contradict established scientific knowledge. Acceptance of anti-evolutionary knowledge also demands acceptance of a literal six-day creation and other statements contradicting scientific findings. Few persons have read so closely the writings of scientific creationists to illustrate how anti-scientific anti-evolutionists become when they criticize the fact of evolution. Creationists are forced to develop just-so stories to defend their literal interpretations of Biblical scripture. Alston finds creationists cannot defend their religious beliefs using established scientific methodologies and principles.

creationism kent hovind: *American Creationism, Creation Science, and Intelligent Design in the Evangelical Market* Benjamin L. Huskinson, 2020-08-19 'In this compelling and thoroughly researched book, Benjamin Huskinson demonstrates that just as there is broad diversity within evangelicalism, so too there is broad diversity among "creationists." His work on the Intelligent Design movement is superb, and he prompts me to rethink my long held conviction that Intelligent Design is merely the most recent evolutionary form of creationism. This is a very fine book.' —Randall Balmer, Author of *Evangelicalism in America* and writer-host of "In the Beginning": The Creationist Controversy 'Benjamin Huskinson's study of American creationism will be an eye-opener for those who sit on the opposite side of the evolution debate. He shows that far from being a unified assault on Darwinism, the campaign was actually a sequence of separate movements launched by rival evangelical groups competing for influence within their own community.' —Peter Bowler, Author of *Monkey Trials and Gorilla Sermons: Evolution and Christianity from Darwin to Intelligent Design* 'A thoughtful and careful analysis that throws as much light on the diversity of American evangelicalism as it does on Christian attitudes to evolutionary theory. Huskinson offers a smart analysis of religious anti-evolution movements which neither demonises nor ridicules but seeks to understand the tenets and beliefs of a movement far more complex and multivalent than most of us appreciate. A must-read for science communicators.' —Philippa Levine, Walter Prescott Webb Chair in History and Ideas, University of Texas at Austin, USA This book explores the cultural history of anti-evolution efforts in the United States from 1960 to the present, refuting several popular narratives about creation science in evangelical America. Separating theological terms like "creationism" from cultural movements such as "creation science" and "intelligent design" in an evangelical marketplace of ideas, it contests assumptions that evangelical movements against evolution are homogeneous, and it argues that intelligent design is not an off-shoot of the creation-science movement. It demonstrates that the rationale of creationist groups is relational as well as ideological, showing that the social function of American creationism, which is to establish the boundaries of 'orthodox' religion, is key to understanding the competing strategies of creation-science organisations.

creationism kent hovind: Young Earth Creationism Source Wikipedia, 2013-09 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 64. Morris, Ken Ham, Jonathan Sarfati, Creationist museum, Creation Ministries International, Duane

Gish, Thomas G. Barnes, Creation Research Society, Robert V. Gentry, Legal controversy between Answers in Genesis and Creation Ministries International, John D. Morris, Grand Canyon: A Different View, Creation Science Movement, Nancy Pearcey, John Woodmorappe, International Conference on Creationism, Jack Cuozzo, Carl Wieland, Special creation, Geoscience Research Institute, Monty White, Museum of Earth History, The Mysterious Islands.

creationism kent hovind: Creationism in Europe Stefaan Blancke, Hans Henrik Hjermitsev, Peter C Kjærgaard, 2014-12-15 A history of Creationism in Europe, from its reception to its rise and the response that has followed. For decades, the creationist movement was primarily situated in the United States. Then, in the 1970s, American creationists found their ideas welcomed abroad, first in Australia and New Zealand, then Korea, India, South Africa, Brazil, and elsewhere—including Europe, where creationism plays an expanding role in public debates about science policy and school curricula. In this, the first comprehensive history of creationism in Europe, leading historians, philosophers, and scientists narrate the rise of—and response to—scientific creationism, creation science, intelligent design, and organized antievolutionism in countries and religions throughout Europe. Providing a map of creationism in Europe, the authors chart the history of creationist activities and strategies. Over the past forty years, creationism has spread swiftly among European Catholics, Protestants, Jews, Hindus, and Muslims, even as anti-creationists sought to halt it. Anti-evolution messages gained such widespread approval, in fact, that in 2007 the Parliamentary Assembly of the Council of Europe passed a resolution advising member states to “defend and promote scientific knowledge” and “firmly oppose the teaching of creationism as a scientific discipline on an equal footing with the theory of evolution.” Creationism in Europe offers an introduction to the cultural history of modern Europe, the variety of worldviews in Europe, and the interplay of science and religion in a global context. It will be of interest to students and scholars in the history and philosophy of science, religious studies, and evolutionary theory, as well as policy makers and educators concerned about the spread of creationism in our time.

creationism kent hovind: Creationism and Anti-Creationism in the United States Tom Kaden, 2018-09-20 This book deals with professional creationist and anti-creationist organizations in America, and describes how the “conflict between science and religion” is the result of the interaction between these two groups. It retraces their history from the 1960s onwards, and identifies crucial turning points that led to new forms of creationism and anti-creationism. It explains their strategies, labels and arguments as effects of this history and structure. Taking a field theoretical approach, the book avoids problems of prior creationism research, making it possible to identify the mechanisms through which creationism generates new strategies, arguments, and media output. The field model is used as an interpretive tool to make sense of some of the most important creationist and anti-creationist publications and media statements.

creationism kent hovind: Foundational Falsehoods of Creationism Aron Ra, 2016-10-01 Religious fundamentalists and biblical literalists present any number of arguments that attempt to disprove evolution. Those with a sympathetic ear often fail to critically examine these creationist claims, leading to an ill-informed public and, perhaps more troubling, ill-advised public policy. As Aron Ra makes clear, however, every single argument deployed by creationists in their attacks on evolution is founded on fundamental scientific, religious, and historical falsehoods—all of them. Among their most popular claims is that evolution is a religion, that there are no transitional species, that there are no beneficial mutations, and that supposedly sacred scripture is the infallible word of God. Yet, as the evidence and data plainly show, each of these claims is demonstrably and unequivocally false. There is simply no truth to creationism whatsoever, and the entire enterprise rests on a foundation of falsehoods. This book explains and exposes the worst of these lies, and should be read by all who honestly care about following the evidence no matter where it might lead in pursuit of the truth.

creationism kent hovind: Exploring Origins Hank Kevin Ravel Zouho, 2025-03-02 Are we the product of evolution, divine creation, or something beyond our understanding? Exploring Origins: Science, Faith, and the Pursuit of Truth bridges the gap between science and belief, challenging

conventional narratives. This book takes readers on a fascinating journey through biology, cosmology, philosophy, and theology, examining the origins of life and the mysteries of existence. Whether you're a skeptic, a believer, or simply curious, this thought-provoking exploration offers a fresh perspective on humanity's biggest questions.

creationism kent hovind: Creationism's Trojan Horse Barbara Forrest, Paul R. Gross, 2007 The Wedge has intruded itself successfully into educational politics at the local, state, and now national levels.--BOOK JACKET.

creationism kent hovind: The Creationist Debate Arthur McCalla, 2006-08-15 This book places the present Creationist opposition to the theory of evolution in historical context by setting out the ways in which, from the seventeenth century onwards, investigations of the history of the earth and of humanity have challenged the biblical views of chronology and human destiny, and the Christian responses to these challenges. The author's interest is not primarily directed to questions such as the epistemological status of scientific versus religious knowledge or the possibility of a Darwinian ethics, but rather to the problems, and various responses to the problems, raised in a particular historical period in the West for the Bible by the massive extension of the duration of geological time and human history.

creationism kent hovind: The Counter-Creationism Handbook Mark Isaak, 2007-01-12 Those opposed to the teaching of evolution often make well-rehearsed claims about science that sound powerful and convincing. This work seeks to serve as a resource for addressing over 400 of the most prevalent claims made by creationists. Each claim is followed by a scientifically valid rebuttal.

creationism kent hovind: Evolution and Creationism Christian C. Young, Mark A. Largent, 2007-06-30 As recently seen by the Kitzmiller vs. Dover case, the evolution versus creation debate never goes away. The best way to understand these debates is to read the arguments of the individuals involved. This reference work provides over 40 of the most important documents to help readers understand the debate in the eyes of the people of the time. Each document is from a major participant in the debates — from the predecessors of Darwin to the judges of the influential court cases of the present day. The editors have included an introduction and analysis of each document that places it within historical and scientific context. *Evolution and Creationism: A Documentary and Reference Guide* aims to enhance our understanding of the debate by presenting over 40 documents that shed light on the origins, goals, and history of the ongoing debate. The volume examines such topics as Darwin's theory of natural selection, the rise of Fundamentalism and its opposition to evolution, and evolution and its discontents at the beginning of the 21st century. In addition, the work includes an extensive bibliography and reference guide to relevant print and electronic resources.

creationism kent hovind: Evolution Vs. Creationism Eugenie C. Scott, 2009-08-03 Presents the scientific evidence for evolution and reasons why it should be taught in schools, provides various religious points of view, and offers insight to the evolution-creationism controversy.

creationism kent hovind: Old Earth Creationism on Trial Tim Chaffey, Jason Lisle, 2008 THIS BOOK IS ABOUT THE DIVISION IN THE CHURCH ON YOUNG EARTH VERSES OLD EARTH BELIEF

creationism kent hovind: Scientists Confront Intelligent Design and Creationism Andrew J. Petto, Laurie R. Godfrey, 2007 With the pseudoscience of creationism rising again under the guise of intelligent design, this powerful collection eviscerates the new assault on evolution and reveals the pervasive and insidious threat posed to genuine science by ID proponents like Phillip Johnson, Michael Behe, and William Dembski. The sixteen original essays address two key issues: the overwhelming scientific evidence for evolution gathered over 150 years and the dubious underpinnings of creationism; and how society can mount better educational and legal policies to prevent a theological takeover of our public and scientific institutions. The book includes powerful voices in the modern culture war against ID, including Kevin Padian, paleontologist and expert witness in the landmark lawsuit of Kitzmiller v. Dover. With creationist arguments forever morphing

and reappearing under new aliases, this new confrontation is a must-read for teachers, students, and general readers, and a ringing and lasting refutation of creationism's fraudulent claims.

creationism kent hovind: *Why Darwin Matters* Michael Shermer, 2024-09-04 Shermer is savage about the shortcomings of intelligent design and eloquent about the spirituality of science . . . An invaluable primer. — Los Angeles Times Book Review Science is on the defensive. Half of Americans reject the theory of evolution and Intelligent Design campaigns are gaining ground. Classroom by classroom, creationism is overthrowing biology. In *Why Darwin Matters*, bestselling author Michael Shermer explains how the newest brand of creationism appeals to our predisposition to look for a designer behind life's complexity. Shermer decodes the scientific evidence to show that evolution is not just a theory and illustrates how it achieves the design of life through the bottom-up process of natural selection. Shermer, once an evangelical Christian and a creationist, argues that Intelligent Design proponents are invoking a combination of bad science, political antipathy, and flawed theology. He refutes their pseudoscientific arguments and then demonstrates why conservatives and people of faith can and should embrace evolution. He then appraises the evolutionary questions that truly need to be settled, building a powerful argument for science itself. Cutting the politics away from the facts, *Why Darwin Matters* is an incisive examination of what is at stake in the debate over evolution. With zest but without gloating, Shermer takes on the arguments against evolution and mows them down. — The Washington Post Let[s] the air out of intelligent design's tires . . . with admirable patience and humility, he spells out each of the fancy I. D. tenets [and] shows how imperfect evolution, and not intelligent design, has been, for generations, the only quantifiable driver behind nature's wonders. — Salon

creationism kent hovind: Designer Science C.W. Howell, 2025-09-09 Designer Science is the first full-length history of intelligent design, an antievolutionary movement from the turn of the 21st century that tried to rewrite the rules of science and had a lasting impact on public perception of science in America--

creationism kent hovind: *Woe Unto The Pastors* Betty Joyce Glover, 2009-12-11 Wake up Church! We have been deceived! Prosperity is not working! It's only in the pockets of the Pastors. When we give the tithe our bills are still due and our mortgage has foreclosed! First fruit must mean something else? Because it's not working for me I haven't received 100%; 40%; or 60%! Church, wake up! It's time for us to make those who wrong God's people, accountable for their deeds. I have heard so many preachers' say, as it is in the natural so it is in the spirit. So the fraud that was caused by Wall Street, Banks, Mortgage companies, Madoff, and the others that have been unveiled the same deception will be unveiled in the church for all to see, woe unto the pastors. Until we repent and get back to the Bible and read it! Woe unto us! Because many of us don't read the bible, for ourselves, we just accept what our pastors tell us as the true and living word of God, but even our pastors have their own agenda. Ministry in this country has become a multi-million dollar industry, anyone with a little knowledge of the bible, a booming voice, and stage presence can and will deceive you! Betty Joyce Glover using her maiden name was born and raised in the South in the state of Alabama where she still resides. She is the mother of two daughters and four grandchildren. (Trey, Jaron, Logan, and Lauryn) The person, who has inspired her the most, is her mother Mrs. Willie H. Williams. Who is the mother of eight children, seven living and Sandra, the first child died at the age of 33, same age as our Lord and Savior, Jesus Christ WHEN HE DIED.

creationism kent hovind: *Getting from Here to Eternity* Kyle D Huckins, 2014-09-15 What does the Word of God have to say about today's issues? Religion writer Kyle Huckins addresses contemporary controversies and ancient biblical wisdom in this collection of more than one hundred of his national award-winning newspaper columns.
