daniel pompa dc: *Fat for Fuel* Dr. Joseph Mercola, 2018-12-31 For over a century, we've accepted the scientific consensus that cancer results from genetic disease due to chromosomal damage in cell nuclei. But what if cancer isn't a genetic disease after all? What if scientists are chasing a flawed paradigm, and cancer isn't a disease of damaged DNA but rather of defective metabolism as a result of mitochondrial dysfunction? What if that startling truth could revolutionize our understanding of other diseases as well—and show us a radical new path to optimal health? In this groundbreaking guide, the first of its kind, New York Times best-selling author and leading natural-health practitioner Joseph Mercola explains how nearly all disease is caused by defective metabolic processes. Then he reveals what's really causing your metabolism to go haywire: damage and dysfunction in the mitochondria, thousands of which are at work in nearly every cell in your body, generating 90 percent of the energy you need to stay alive and well. When mitochondria become damaged in large numbers, it is impossible to stay healthy. Dr. Mercola shows you that you can take control of your health simply by giving your body the proper fuel—and it's not what you've likely been led to believe. A ketogenic diet, very low in carbohydrates and high in healthy fats, is the way to optimize the biochemical pathways that suppress disease and support healing. And the benefits can be astonishing—not only in treating or preventing serious illness, but in boosting your brainpower, increasing your energy, helping you lose weight and keep it off, and much more. As you read this book, you'll learn in clear, rational terms how your body works at a molecular level. You'll finally understand the type of fuel it's designed to burn in the most efficient way possible. You'll find detailed guidelines for starting and sticking with a ketogenic eating plan. And you won't have to wait a decade or two for metabolic mitochondrial therapy to make its way into the mainstream. You can build a healthier body and brain at the cutting edge of this exciting new discipline, starting right now.

Untuk itu perlu dilakukan diversifikasi pemanfaatan energi sehingga pemanfaatan energi baru dan terbarukan (EBT) menjadi keharusan untuk dimanfaatkan. Sekarang ini pemerintah melakukan kebijakan nasional untuk melaksanakan pemanfaatan bauran energi yang berasal dari EBT. Energi surya merupakan salah satu bagian dari sumber daya EBT, perlu mendapat perhatian. Energi surya penghasil energi langsung berupa jenis termal dan fotovoltaik. Pemanfaatan energi surya jenis termal melibatkan, alat konversi energi berupa alat kolektor sebagai pengumpul energi matahari yang berguna untuk pemanasan fluida kerja yang mengalir di dalamnya. Fluida antara lain berupa udara, air, refrigeran sebagai zat untuk pendinginan, misalnya larutan ammonia, dan lain-lain. Jenis fotovoltaik prinsipnya mengubah energi gelombang elektromagnetik matahari

langsung menjadi energi listrik, yang diubah di dalam sel surya (solar cell). Selanjutnya, energi tersebut dapat digunakan untuk keperluan rumah tangga, penerangan jalan, menjalankan alat pendingin, dan lain-lain. Keuntungan pemanfaatan energi surya, di samping ramah lingkungan, tersedia sepanjang masa, juga dapat dimanfaatkan di pedesaan sekalipun. Secara ringkas buku ini membahas: • Pemahaman tentang radiasi matahari di luar atmosfer bumi dan radiasi di permukaan bumi; Geometri radiasi matahari dan sudut tiba radiasi; Alat ukur radiasi dan prediksi radiasi global dan difusi; Perhitungan panjang hari dan waktu lokal. • Cara kerja kolektor zat cair, kinerja dan efisiensi. Transmisi radiasi dari sistem penutup sampai ke absorber. Analisis transien dan pengetesan kolektor. • Pembahasan tentang kinerja alat pemanas udara, penjelasan beberapa tipe lain alat pemanas udara, prosedur pengetesan dan aplikasi alat pemanas udara. • Penjelasan kolektor-kolektor konsentrasi, menggunakan reflektor, kolektor parabolik silinder, mode jejak dan orientasi dan analisis kinerja. • Penjelasan tentang alat distilasi air asin dengan tenaga surya, sirkuit pada alat distilasi tenaga surya • Pengetahuan tentang semikonduktor, doping, efek fotovoltai, karakteristik arus-tegangan, contoh-contoh soal aplikasi dan penyelesaiannya. • Pengenalan material berubah fase padat cair (PCM), senyawa-senyawa serta sifat-sifat fisik alkana dan lilin paraffin, penjelasan tentang alat penyimpan panas laten. Buku ini dilengkapi dengan contoh-contoh perhitungan, dan pada akhir setiap bab diberikan penyelesaian soal-soal disertai pertanyaan-pertanyaan guna menambah pemahaman tentang masalah pemanfaatan energi surya.

Sin embargo, ¿y si estamos equivocados? ¿Y si estamos pensando en el punto de salida equivocado lo que nos hace abordar la enfermedad más mortal en el mundo de forma equivocada? En esta magnífica guía, Joseph Mercola entra al debate y nos enseña cómo la mayoría de las enfermedades se generan por procesos metabólicos defectuosos. Budidaya lebah Trigona memiliki prospek sangat tinggi secara ekonomi oleh karena itu lebah jenis ini banyak dibudidayakan. Kunci sukses budidaya lebah Trigona dipengaruhi oleh kemampuan pemindahan atau pemecahan koloni, penggunaan metode budidaya (log, stup, topping) yang sesuai, ketersediaan vegetasi dan penanganan hama pengganggu. Secara umum budidaya lebah Trigona dapat menggunakan 3 metode, yaitu budidaya menggunakan stup tunggal, budidaya menggunakan log dengan topping, dan budidaya menggunakan stup dengan topping. Penggunaan metode tersebut sangat ditentukan oleh jenis lebah Trigona yang dibudidayakan.

Teknik pemindahan dan pemecahan koloni merupakan faktor penting dalam budidaya lebah. Pecah koloni berperan mengurangi kegiatan perburuan koloni lebah Trigona di alam liar. Hal tersebut dapat meminimalkan penebangan pohon dan memberikan sumbangan terhadap kelestarian hutan. Namun seringkali proses pemecahan koloni lebah gagal dilakukan karena dilakukan dengan teknik yang tidak tepat. Panen madu perlu dilakukan dengan teknik yang tepat. Secara umum panen madu dilakukan dengan cara manual, menggunakan peralatan mekanis dan pompa. Teknik panen madu pada lebah Trigona dilakukan tergantung dari jenis lebah Trigona yang dibudidayakan. Penggunaan pompa sebagai peralatan panen sangat diperlukan guna mengatasi permasalahan panen secara manual atau mekanis. Setiap teknik panen memiliki keunggulan masing-masing, hal terpenting yang harus dilakukan adalah menerapkan teknik panen dengan benar.

(Data WHO, 5 April 2020) dimana di Indonesia terdapat 2273 kasus positif COVID19 dengan 164 orang yang dinyatakan sembuh dan 198 orang meninggal dunia (Data covid19.go.id, 5 April 2020). Di Sumatera Selatan terdapat 16 kasus positif COVID19 dengan 1 orang sembuh dan 2 orang meninggal dunia (Data corona.sumselprov.go.id, 5 April 2020) Penyebaran COVID-19 terjadi sangat cepat dan meluas karena dapat menular melalui kontak dari manusia ke manusia. Pemerintah telah menerbitkan peraturan tentang Pembatasan Sosial Berskala Besar (PSBB) melalui Peraturan Pemerintah No. 21 Tahun 2020 dan Permenkes No. 9 Tahun 2020. Hingga saat ini, berita seputar COVID-19 masih menjadi perhatian utama semua negara untuk waspada dan tetap siaga menghadapi COVID-19 yang belum ditemukan obat dan vaksinnnya. Sebagai upaya pencegahan penularan, kami Tim Laboratorium Perangkat Keras dan Komponen Fasilkom UNSRI mencoba melakukan kegiatan PKM dengan membuat Bilik Sterilisasi/Desinfektan yang ditempatkan di Lingkungan Fasilkom Universitas Sriwijaya. PKM ini merupakan wujud kepedulian kami sebagai bagian masyarakat terhadap pandemik COVID19 yang sedang dihadapi saat ini. Upaya ini kami akui belum maksimal dalam mencegah penularan namun merupakan langkah awal upaya pencegahan yang akan kami kembangkan dengan bantuan teknologi ilmu komputer. Sebagai bentuk tanggung jawab kami sebagai pelaksana kegiatan, maka kami menyusun laporan ini dan menerbitkannya sebagai antisipasi dan siap siaga dalam penanganan kasus penyebaran virus tersebut di Indonesia khususnya di kota Palembang. Kami mengucapkan terima kasih dan memberikan penghargaan yang tinggi kepada Tim Laboratorium Perangkat Keras dan Komponen Fasilkom UNSRI yang telah sigap dan cepat melaksanakan kegiatan PKM dan menyusun laporan ini. Semoga laporan ini bermanfaat bagi Sejawat sekalian dalam menangani kasus COVID-19 di pelayanan kesehatan di Indonesia umumnya dan di kota Palembang khususnya.
