This book outlines that its economic importance is matched by its significance as a cultural and aesthetic phenomenon. Through a series of ethnographic insights into some of the key sites of mass Mediterranean tourism, it focuses on package tourists' experiences of the serial, banal and depthless spaces that are mushrooming along the coast and the enchantments, dissolutions and dreams that saturate them. Moving away from the notion of authentic places corrupted by mass tourism, the book shows how new forms and spaces are made and remade by the mobilities and performances of locals, workers and tourists. Finally, the book looks at the complex materialities of mass tourism and the many networks that make it possible.

corrupted seas how to: Teaching, Responsibility, and the Corruption of Youth Tina Besley, Michael A. Peters, 2019-02-19 Teaching, Responsibility, and the Corruption of Youth explores the concept and practice of responsibility in education and teaching in the new post-Cold War era after the long run of globalization and liberal internationalism has been disrupted by the rise of populism, anti-immigration sentiments and new forms of terrorism. The old liberal values and forms of tolerance have been questioned. Responsibility is a complex concept in our lives with moral, social, financial and political aspects. It embraces both legal and moral forms, and refers to the state of being accountable or answerable for one's actions implying a sense of obligation associated with being in a position of authority such as a parent, teacher or guardian having authority over children. First used with schools in 1855, the concept's legal meaning was only tested in the 1960s when student conduct, especially when materially affecting the rights of other students, was not considered immune by constitutional guarantees of freedom. This volume investigates the questions left with us today: What does responsibility mean in the present era? Does loco parentis still hold? What of the rights of students? In what does teacher responsibility consist? Can student autonomy be reconciled with market accountability? To what extent can responsibility of or for students be linked to 'care of the self' and 'care for others'? And, most importantly, to what extent, if any, can teachers be held accountable for the actions of their students?

corrupted seas how to: Corruption and Economic Growth in Africa David N. Abdulai, 2023-12-28 Corruption is one of the major challenges impeding Africa's growth and development efforts and its impact is much more pronounced at this point of the continent's development trajectory. Corruption has political, economic, and social consequences and this book argues that any efforts to help Africa grow and develop must prioritise the fight against it, so that the aid and funding given for projects in the region can continue to be sustained. The book also tackles the issue of national security and instability caused by corruption. The author argues that progress cannot happen in countries and environments where instability exists and persists. Corruption in Africa has contributed to instability and other national security challenges, especially in fragile states on the continent. The book starts by looking at the three major types of corruption: petty, grand, and systemic and then goes on to address the different categories of corruption such as bureaucratic, legislative, political, as well as public and private sector aspects. It also deals with common forms of corruption as well as some of the causes, such as bad governance and excessive greed, to mention a few. Further, it critically examines how current political systems on the continent contribute to this condition. The book argues that some of the solutions that have been proposed to date are not viable or have not worked in practice, and through applied research, offers workable solutions that policy makers, African politicians, academics, and students of economics and development can use as a reference guide in the fight against corruption.

corrupted seas how to: Proof of Corruption Seth Abramson, 2020-09-08 In the third volume of his Proof series, New York Times bestselling author Seth Abramson takes readers on a deep dive into the Ukraine scandal, revealing it to be more sinister, complex, and transnational than previously thought. Abramson's research on Trump administration corruption positions the Ukraine scandal as

the foreseeable culmination of years of clandestine machinations involving scores of players, from Beijing to Budapest, Ankara to Caracas, Warsaw to Jerusalem, Kyiv to Riyadh, and Moscow to D.C. While many know about the July 2019 telephone call that ignited the Ukraine scandal, most don't know about the concurrent attempts by members of Trump's inner circle to take over Ukraine's national gas company and bolster dangerous pro-Kremlin Ukrainian oligarchs—moves that would have benefited Putin and destabilized Ukraine's government and economy. In Beijing, Trump's dealings with the Chinese government not only enriched him and his family, but also culminated in him successfully seeking 2020 election interference from Xi Jinping in the form of closely held information about Joe Biden. In Venezuela, many of the actors involved in the Ukraine scandal engaged in similarly secretive, Kremlin-friendly negotiations that undermined U.S. policy. In Syria and Iraq, Trump's personal indebtedness to autocrats in Turkey, Israel, Saudi Arabia, and the UAE cost untold lives. And Abramson brings the story back to an increasingly fractured and depleted United States, where the COVID-19 pandemic exposes the staggering domestic consequences of the Trump administration's foreign machinations. In *Proof of Corruption*, Seth Abramson lays bare Trump's decades-long pattern of corruption. This globe-spanning narrative is an urgent warning about the unprecedented threat posed by a corrupt president and his administration.

corrupted seas how to: *The Road to Xanadu* John Livingstone Lowes, 2023-01-01 It takes a great mind to study a great mind. The literary critic John Livingston Lowes puts his reputation on the line by choosing to analyse the sources, thoughts and imagination of the poet Samuel Taylor Coleridge. The result, 'The Road to Xanadu', is a remarkable and insightful examination of the creative processes and reading material that inspired 'The Rime of the Ancient Mariner' and 'Kubla Khan'. Lowes brilliantly uses his study of Coleridge as a springboard to a more wide-ranging analysis of the imagination. If you like Coleridge's work, you will be fascinated by this look into the mind of a literary giant. John Livingston Lowes (1867-1945) was an American scholar and critic of English literature. His best-known subjects were Samuel Taylor Coleridge and Geoffrey Chaucer, author of 'The Canterbury Tales'. His most famous work is 'The Road to Xanadu: A Study in the Ways of the Imagination', which examines the sources of Coleridge's 'The Rime of the Ancient Mariner' and 'Kubla Khan'.
